Industry 4.0, China 2025, IoT Wolfgang Babel, 2022-11-02 The book gives an overview about automation technology over the last 50 years based on my own experiences. It is a good summary for automation since 1970 for all who want to know about the context of automation developments and their standards. It is a fundamental summary and enables the reader to get experience in the complex field of automation. In detail the question is arisen whether Industry 4.0, China 2025, IoT, AI are a revolution or more an evolution of time-wise established available technologies in HW, SW and algorithms. Is the hype about Industry 4.0 justified or not? In that context a timeline since 1970 is shown for AI, ANN, essential milestones in automation e.g. OSI model, automation pyramid, standards for bus systems, main SW languages, robots, AI, ANN, pattern recognition, Ethernet, the 12 most important international field buses, their main features and characteristics, foundation of committees, harmonization and standardization efforts, OPC UA and cloud computing, field devices, PLCs, SCADA, MES, ERP and automation history. All that history is seen in the context of controller, DSP, Digital signal processor, FPGAs, Field Programmable Gate Arrays, ASICs, Application Specific Integrated Circuit, Chip on Board. It includes the HW history from Intel 8080 to octuple multicore processors. In the same way it is shown the history of field device out from laboratory into the field with all difficulties and benefits of that transition. The issues are summarized in a pyramid of complexity. Requirements for robustness and safety are shown for field devices. In the same way it is shown the development of mainframes, workstations and PCs. SAP, a leading ERP System is explained in more detail. Specially it is figured out how SAP works and what has to be considered in working with such kind of system. The differences between MES and ERP systems are discussed specially also for future combined SAP MES systems. Explained are the problems of midsized companies, SMEs in dealing with Industry 4.0 and automation. Further examples are given and discussed for automatized quality control in automotive, PCB handling, CIGS Solar cell production. Also shown is the upgrade for older products and make them ready for automation standards. In detail the history of the modern robotics is shown for the automotive industry. In summary also is figured out the Industry 5.0 which is just coming up more and more.
