

MATH REVIEW

Math Review is a study aid for students preparing for the SAT, ACT, and other standardized tests. It covers a wide range of mathematical topics, including algebra, geometry, and statistics. The review is organized into sections, each with a title and a list of topics. The topics are listed in a column on the left, and the corresponding text is in a column on the right. The text is written in a clear, concise, and easy-to-understand style. The review is a valuable resource for students who are preparing for standardized tests.

ALGEBRA

Variables

A variable is a symbol that represents a quantity that can change. Variables are used in algebra to represent unknown values. They are often represented by letters, such as x , y , and z . Variables can be used to write equations and inequalities. They can also be used to represent functions. Variables are a fundamental part of algebra and are used in many other areas of mathematics.

Equations

An equation is a statement that two expressions are equal. Equations are used to solve for unknown values. They are often written in the form $ax + b = c$, where a , b , and c are constants and x is a variable. Equations can be solved by using various methods, such as substitution, elimination, and factoring. Equations are a fundamental part of algebra and are used in many other areas of mathematics.

Functions

A function is a relationship between two sets of objects. A function maps each object in the first set to exactly one object in the second set. Functions are used to model real-world situations. They are often represented by graphs or tables. Functions are a fundamental part of algebra and are used in many other areas of mathematics.

Graphs

A graph is a visual representation of a function. It shows the relationship between the input and output values of a function. Graphs are used to analyze functions and to solve problems. They are often used in algebra and geometry. Graphs are a fundamental part of mathematics and are used in many other areas of science and engineering.

GEOMETRY

Points, Lines, and Planes

Points, lines, and planes are the basic building blocks of geometry. A point is a location in space. A line is a straight path that extends infinitely in both directions. A plane is a flat surface that extends infinitely in all directions. Points, lines, and planes are used to describe the properties of shapes and figures. They are a fundamental part of geometry and are used in many other areas of mathematics.

Angles

An angle is formed by two rays that share a common endpoint. Angles are used to measure the size of a turn. They are often measured in degrees. Angles are a fundamental part of geometry and are used in many other areas of mathematics.

Triangles

A triangle is a polygon with three sides. Triangles are used to study the properties of shapes and figures. They are often used in geometry and trigonometry. Triangles are a fundamental part of mathematics and are used in many other areas of science and engineering.

Quadrilaterals

A quadrilateral is a polygon with four sides. Quadrilaterals are used to study the properties of shapes and figures. They are often used in geometry and trigonometry. Quadrilaterals are a fundamental part of mathematics and are used in many other areas of science and engineering.

Properties of Shapes

The properties of shapes are used to describe their characteristics. Properties include the number of sides, the length of the sides, the angles, and the area. Properties are used to classify shapes and to solve problems. They are a fundamental part of geometry and are used in many other areas of mathematics.

Similar Figures

Similar figures are figures that have the same shape but not necessarily the same size. Similar figures are used to study the properties of shapes and figures. They are often used in geometry and trigonometry. Similar figures are a fundamental part of mathematics and are used in many other areas of science and engineering.

Volume and Surface Area

Volume and surface area are measures of the size of a three-dimensional object. Volume is the amount of space an object occupies. Surface area is the total area of the faces of an object. Volume and surface area are used to study the properties of three-dimensional objects. They are often used in geometry and trigonometry. Volume and surface area are a fundamental part of mathematics and are used in many other areas of science and engineering.

STATISTICS

Mean, Median, and Mode

Mean, median, and mode are measures of central tendency. The mean is the average of a set of numbers. The median is the middle number of a set of numbers. The mode is the number that appears most often in a set of numbers. Mean, median, and mode are used to describe the distribution of data. They are a fundamental part of statistics and are used in many other areas of science and engineering.
