Surface Area & Nets

AREA

A measurement of the number of unit squares that cover a flat surface or shape.

SURFACE AREA

A measurement of the sum of all the faces of a solid geometric figure.

NET

The figure (flat surface) that can be folded to form a surface (solid figure) or "foldable" model of a solid geometric figure.

PLANE FIGURE

A 2-dimensional geometric figure that is square or circle.

SOLID FIGURE

A 3-dimensional geometric figure that is cube or cylinder.

FACE AND EDGES

A solid with polygonal faces.

VERT

A point where two faces meet. A vertex where three faces meet is a corner.

SOLID FIGURE

Represented with a square net.

EDGE
A vertical line that separates the faces of a solid.

FACE

A polygon with square faces and three or more triangular faces that meet at an edge.

FACE

A flat surface that is a two-dimensional solid figure.

FACE

The polygon that forms the bottom of a pyramid.

PLANE FIGURE

Set of eight polygons that form a net.

VERT

A corner where two faces meet. A vertex where three faces meet is a corner.

The faces of the solid correspond to the polygons of the net.

FACE

A flat surface that is a two-dimensional solid figure.

The face that forms the bottom of a pyramid.

The surface area of a solid is the sum of the areas of the polygons that form its faces.

FACE		SHAPE	AREA FORMULA	AREA
A	front	triangle	$A = \frac{5 \cdot 5}{2}$	$A = \frac{5 \cdot 5}{2} = 12.5 \text{ units}^2$
B	right	triangle	$A = \frac{5 \cdot 5}{2}$	$A = \frac{5 \cdot 5}{2} = 12.5 \text{ units}^2$
C	back	triangle	$A = \frac{5 \cdot 5}{2}$	$A = \frac{5 \cdot 5}{2} = 12.5 \text{ units}^2$
D	left	triangle	$A = \frac{5 \cdot 5}{2}$	$A = \frac{5 \cdot 5}{2} = 12.5 \text{ units}^2$
E	base	square	$A = s \cdot s$	$A = 5 \cdot 5 = 25 \text{ units}^2$
TOTAL AREA			$12.5 \text{ units}^2 + 12.5 \text{ units}^2 + 12.5 \text{ units}^2 + 12.5 \text{ units}^2 + 25 \text{ units}^2 = 80 \text{ units}^2$

Math Graphic Organizers For Surface Area:

A Guide to Graphic Organizers James Bellanca, 2007-05-30 Creating a mindful rendering of student thinking with these graphic tools is at the heart of this extensive work K 12 teachers will applaud this effort as they use these graphic organizers in rich and relevant instructional activities Robin Fogarty Educational Consultant and Author An excellent aid in teaching students to gather and process data systematically develop critical thinking skills and become actively engaged learners Mary Jo Johnson Educational Evaluator North Carolina School for the Deaf Morganton NC Help students organize their thinking process content and work cooperatively Graphic organizers are effective research validated tools for supporting student achievement promoting students higher level thinking and strengthening learners visual and metacognitive skills In this combined update of *The Cooperative Think Tank I and II* James Bellanca offers teachers a collection of 24 ready to use graphic organizers to enhance student learning across subject areas and grade levels Presenting each graphic organizer in its own chapter the author includes lessons for introducing these engaging learning tools to students and offers tips for maximizing their positive learning effects Revised with current research new graphic organizers and a streamlined format this edition also provides guidelines for using graphic organizers to Support cooperative learning groups Help students process content Effectively assess students understanding of concepts For novice teachers or seasoned veterans Bellanca's extensive collection is the ideal guide to help you integrate graphic organizers into daily instruction *Content-Area Graphic Organizers for Math* Walch Publishing, 2004 Help students visualize what they're learning Helps students organize information for better comprehension Appeals to different learning styles Present essential teaching tools including concept maps flow charts and more **Teaching and Learning High School Mathematics** Charlene E. Beckmann, Denise R. Thompson, Rheta N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i.e. teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching *Teaching and Learning High School Mathematics* is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are

able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans

Enduring Issues In Special Education Barbara Bateman,John W. Lloyd,Melody Tankersley,2015-02-20 Enduring Issues in Special Education is aimed at any course in the undergraduate or graduate special education curriculum that is wholly or partly devoted to a critical examination of current issues in special education The book organizes 28 chapters into seven sections using familiar structuring principles what who where how when why and whither Each section begins with an introduction that provides historical legal and theoretical background information and organizing commentary for the chapters that follow The book s objective in addition to informing readers about the issues is to develop critical thinking skills in the context of special education Key features include the following Dialectic Format Each of the 28 chapters presents compelling reasons for addressing the issue at hand and specific ways to do so Because each issue is written from different perspectives and focuses on a variety of aspects readers are encouraged to weigh the arguments seek additional information and come up with synthesized positions of their own Organizing Framework The book s seven sections have been arranged according to a scheme that is the essence of most investigative reporting and provides a coherent easy to understand framework for readers Expertise All chapters are written by leading scholars who are highly regarded experts in their fields and conclude with suggested readings and discussion questions for additional study *Content Area Lessons Using Graphic Organizers, Grade 3* Debra Housel,2008 Teaching lessons that meet the standards for your grade level in reading writing science geography history and math **Getting to the Common Core** Sharon L. Spencer,Sandra Vavra,2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of

getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Value s of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research
