Learner Performance in South Africa Charles Edward Wickens Simkins, Andrew Paterson, 2005 South Africa has done well to systematically expand its educational system and to lengthen the schooling experience of successive learner cohorts But the quality of the output from the school system has been questioned In seeking to identify the reasons for this it is important to relate educational outputs competencies as measured for instance by examinations or standardized tests to inputs Determining the relative contributions of the inputs of the school the household and the individual learner to educational outputs is not straightforward particularly since very little educational production function analysis has been undertaken in South Africa Until recently no South African school data has incorporated test results school characteristics and information on the household circumstances of individual learners necessary for this kind of analysis However the results from a survey of a sample of schools involved in the large scale Quality Learning Project QLP funded by the Business Trust have yielded such data The QLP data set offers a new analytical opportunity to address the question What are the effects of social and economic variables on educational outcomes in the QLP schools

Mathematics for Life and Work A Comparative Perspective on Mathematics to Inform Upper Secondary Reform in England OECD, 2024-11-05 Engagement and performance in mathematics at the upper secondary level have been the concern of successive governments in England This report was commissioned as part of the

country's policy reflections for transforming how maths is viewed and experienced in England. The report explores outcomes such as the share of students studying maths and performance across countries and how education systems internationally deliver mathematics in upper secondary. It also examines factors shaping maths education including the expectations set by curricula, student pathways, cultural perceptions and the needs of the labour market and higher education.

Improving Learning in South African Schools Cas H. Prinsloo, 2005. The QLP has been a multi-level, multi-site educational intervention that aimed to improve learner performance in 524 South African high schools. The QLP has been underpinned by the principle that mathematics and language are the foundations for all further learning. Therefore, educators at all grades in all learning areas also have to foster the development of better reading and writing skills. This is why, at educator and classroom level, improvement of mathematics and reading and writing abilities have been the main foci of the QLP. In order to ensure that schools get effective support and monitoring from districts and that the good practices gained from the project are institutionalised and therefore sustained, the programme has also focused on the development of district systems and officials.

Developing Maths Lesson Planning and Frameworks: Mastery, Logic and Reasoning in the Classroom Linda (Yuqian) Wang, Jeremy Dawson, Chris Brown, 2023-11-24. This book highlights the essential relationship between lesson planning and key mathematical elements such as mastery and reasoning. The exemplification of ideas through useful classroom strategies gives the book a practical basis as well as theoretical. I have no doubt that even experienced teachers will find this book enlightening and encourage them to re-evaluate elements of their practice.

Hayley Hands, Secondary PGCE Mathematics Lead, Newcastle University, UK. Developing Maths Lesson Planning and Frameworks provides much food for thought and includes many immediate take-aways to reflect on or try out. This book will help enhance any maths teacher's lesson planning, from the trainee teacher to the experienced practitioner.

Rose Marie Rochester, Archimedes NE Maths Hub Lead, BHCET Director of Maths, UK. Addressing the maths skills gap. Wang et al. propose a new method for maths lesson planning that harnesses the power of reasoning in mathematics teaching. Using a pedagogical approach called the Causal Connectivity Framework (CCF), this book helps teachers to support students in actively discovering the logical foundations upon which classroom activities are linked together. The authors have diverse expertise and experiences as maths teachers, teacher educators, and researchers, and this alternative approach is the result of long-term collaboration aimed at building up successful maths lessons from the very first steps of lesson planning.

Developing Maths Lesson Planning and Frameworks offers practical advice within a theoretical framework. It ties in with UK National Curriculum requirements. It contains detailed practical examples and visual aids throughout. Reasoning is a critical component of maths learning, making this essential reading for maths teachers and teacher trainees as they help students to achieve maths mastery.

Linda Wang is Assistant Professor and PGCE secondary maths Lead at Durham University, UK. She is particularly interested in curriculum design at both secondary and lower primary level mathematics and developing the educational impact partnership model to deliver

Continuing Professional Development CPD to future orientate Mathematics education Chris Brown is Professor of Education at the University of Southampton UK His research interests include using Professional Learning Networks PLNs to promote the collaborative learning of teachers as well as how research evidence can and should but often doesn't aid the development of education policy and practice Jeremy Dawson is Area Coordinator for the Advanced Maths Support Programme at Durham University UK He has worked in a variety of diverse school settings around North East England and has extensive experience of teaching mathematics from KS2 KS5 as well as contributing and assisting on gifted and talented programs for prospective university entrants

Changing the Subject J. Myron Atkin, Paul Black, 2005-11-01 Change in education is too often a process which enthusiasts ranging from top policy makers to groups of teachers plan and drive forward but in which they all find unexpected pitfalls Every innovation depends on the commitment of schools and teachers to make it work But often that commitment is lacking or is less than total or it turns to frustration as events develop This book is based on a set of stories from teachers and education professionals in thirteen OECD countries Twenty three case studies of educational innovation in science mathematics and technology have involved school teachers inspectors academics both subject specialists and educational researchers policy makers and advisors The case studies come from Australia Canada France Germany Ireland Japan the Netherlands Norway Scotland Spain Switzerland and the USA Drawing on this rich variety of material the authors concentrate on the origins and purposes of innovation within and across the science mathematics and technology curricula They consider the conceptions of the three subjects along with issues of teaching learning and assessment and explore the involvement of both teachers and students They reflect on the various strategies adopted to cope with or bring about change and offer valuable insights to advisors developers policy makers and practitioners both in schools and outside The writing team includes Paul Black King's College London Mike Atkin Stanford University Raymond Duval University of Lille Edwyn James Consultant OECD John Olson Queen's University of Kingston Ontario Dieter Pevsner Consultant London Senta Raizen National Centre for Improving Science Education Washington Maria Saez University of Valladolid Spain and Helen Simons

2029 Economic Crisis and Civil War in South Africa The Messenger,2014-07-17 The book analyses the current problems in South Africa Many people are seeing that unemployment and the plight of the masses will reach the point of no return The gradual decline of the economy is due to various factors but is exacerbated by corruption and lack of responsibility and accountability South Africa has reached a 50 year low in productivity due to affirmative action BEE and the perception of life owes me The current war between management and labour for higher wages will continue The threat of retrenchments will become a reality All the gold mines will follow The falling gold price predicts this All of this leads to only one thing our mutual enemy unemployment Teaching and Learning Secondary School Mathematics Ann Kajander,Jennifer Holm,Egan J Chernoff,2018-10-24 This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada The chapters address topics of broad applicability such as technology in learning mathematics recent interest in social justice contexts in the learning of mathematics as well as Indigenous education The voices of classroom practitioners the group ultimately responsible for implementing this new vision of mathematics teaching and learning are not forgotten Each section includes a chapter written by a classroom teacher making this volume unique in its approach We have much to learn from one another and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step *Research for Educational Change* Jill Adler,Anna Sfard,2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators

practitioners and undergraduate students interested in educational research Theorizing and Measuring Affect in Mathematics Teaching and Learning Chiara Andrà, Domenico Brunetto, Francesca Martignone, 2021-01-23 This book presents a literature review of and a state of the art glimpse into current research on affect related aspects of teaching and learning in and beyond mathematics classrooms Then research presented at the MAVI 25 Conference which took place in Intra Italy in June 2019 is grouped in thematic strands that capture cutting edge issues related to affective components of learning and teaching mathematics The concluding chapter summarises the main messages and sketches future directions for research on affect in mathematics education The book is intended for researchers in mathematics education and especially graduate students and PhD candidates who are interested in emotions attitudes motivations beliefs needs and values in mathematics education **Strategic Management in the Public Sector** Trevor H. Thys, Prof Charles Wait, Prof Ilse Truter, 2022-07-13 Chapter 1 Integrative strategic planning in South Africa Conceptual frameworks Chapter 2 Electoral mandate priorities policy and strategy Chapter 3 Economic planning economic policy or development policy Past present and future Chapter 4 Planning human resources Chapter 5 General management and leadership Chapter 6 Strategy formulation and environment analysis Chapter 7 Internal analysis and implementation Chapter 8 Strategy implementation and change management Chapter 9 Performance management system Chapter 10 Monitoring and evaluation Chapter 11 Health care in South Africa Chapter 12 Socio economic context of education **Visualisation and Epistemological Access to Mathematics Education in Southern Africa** Marc Schäfer, 2023-04-27 This book demonstrates that using visualisation processes in mathematics education can help to enhance teaching and learning and bridge the inequality gap that exists between well resourced and under resourced schools in Southern Africa Drawing on classroom research conducted in the Southern African region it examines how epistemological access in a context of gross inequality can be constructively addressed by providing research based solutions and recommendations The book outlines the visualisation process as an integral but often overlooked process of mathematics teaching and learning It goes beyond the traditional understanding of visualisation processes such as picture forming and using tools and considers visualisation processes that are semiotic in nature and includes actions such as gestures in combination with language It adds value to the visualisation in mathematics education research discourse and deliberation in Africa With a unique focus on Southern Africa and open avenues for further research and collaboration in the region it will be a highly relevant reading for researchers academics and post graduate students of mathematics education comparative education and social justice education
