## **Maths Literacy Grade 10 June Exam 2014:**

**Assessing Academic Literacy in a Multilingual Society** Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

**Leading Change in Your School** Douglas B. Reeves, 2009-04-14 Guiding schools through significant change is one of the toughest challenges educational leaders face but learning from the examples of those who have succeeded can make it less daunting. In *Leading Change in Your School* distinguished author and researcher Douglas B. Reeves offers lessons learned through his work with educators in thousands of schools around the world and presents real life examples of leaders who have met the challenge of change head on with impressive results for their schools and districts. Readers will also find practical resources for engaging their colleagues in change initiatives. Expanding on a number of his columns in the journal *Educational Leadership* Reeves offers insights and recommendations in four areas: Creating conditions for change including assessments to determine personal and organizational readiness for change; Planning change including cautionary notes about strategic planning; Implementing change including the importance of moving from rhetoric to day to day reality; and Sustaining change including the need to reorient priorities and values so that individual convenience gives way to a shared sense of the greater good. The change leaders both teachers and administrators whose stories Reeves tells come from varied districts but they share a passion for creating schools that work for all students. They are, Reeves says, people like you sharing similar challenges but perhaps with different results.

**The Pedagogy of Standardized Testing** Arlo Kempf, 2016-04-29 Based on a large scale international study of teachers in Los Angeles, Chicago, Ontario and New York, this book illustrates the ways increased use of high stakes standardized testing is fundamentally changing education in the US and Canada with a negative overall impact on the way teachers teach and students learn. Standardized testing makes understanding students' strengths and weaknesses more difficult and class time spent on testing consumes scarce time and attention needed to support the success of all students, further disadvantaging ELLs, students with exceptionalities, low income and racially minoritized students.

**Students of Color and the Achievement Gap** Richard R. Valencia, 2015-03-05 Students of Color and the Achievement Gap is a comprehensive landmark analysis of an incontrovertible racialized reality in U S K 12 public education the relentless achievement gap between low socioeconomic students of color and their economically advantaged White counterparts Award winning author and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap focusing on Black and Latino Latina students He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory an asset based perspective and a systemic inequality approach By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps Following each of these concerns Valencia provides a number of reform suggestions that can lead to systemic transformations of K 12 education Students of Color and the Achievement Gap makes a persuasive and well documented case that school success for students of color and the empowerment of their parents can only be fully understood and realized when contextualized within broader political economic and cultural frameworks

*Frontiers in the Acquisition of Literacy* Claire M. Fletcher-Flinn, 2015-09-28 Learning to read and to spell are two of the most important cultural skills that must be acquired by children and for that matter anyone learning a second language We are not born with an innate ability to read A reading system of mental representations that enables us to read must be formed in the brain Learning to read in alphabetic orthographies is the acquisition of such a system which links mental representations of visual symbols letters in print words with pre existing phonological sound and semantic comprehension cognitive systems for language Although spelling draws on the same representational knowledge base and is usually correlated with reading the acquisition processes involved are not quite the same Spelling requires the sequential production of letters in words and at beginning levels there may not be a

full degree of integration of phonology with its representation by the orthography Reading on the other hand requires only the recognition of a word for pronunciation Hence spelling is more difficult than reading and learning to spell may necessitate more complete representations or more conscious access to them The learning processes that children use to acquire such cognitive systems in the brain and whether these same processes are universal across different languages and orthographies are central theoretical questions Most children learn to read and spell their language at the same time thus the co ordination of these two facets of literacy acquisition needs explication as well as the effect of different teaching approaches on acquisition Lack of progress in either reading and or spelling is also a major issue of concern for parents and teachers necessitating a cross disciplinary approach to the problem encompassing major efforts from researchers in neuroscience cognitive science experimental psychology and education The purpose of this Research Topic is to summarize and review what has been accomplished so far and to further explore these general issues Contributions from different perspectives are welcomed and could include theoretical computational and empirical works that focus on the acquisition of literacy including cross orthographic research

Function and Education Mariëtte Huizinga,Dieter Baeyens,Jacob A. Burack,2018-09-21 Executive function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment The development of executive function relies on the maturation of associated brain regions as well as on stimulation in the child s social contexts especially the home and school Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting planning and organizing in academic success Accordingly in initiating this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators The contributors to this volume who hail from several different countries in Europe and North America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success

A Fight for the Soul of Public Education Steven Ashby,Robert Bruno,2016-11-04 In reaction to the changes imposed on public schools across the country in the name of education reform the Chicago Teachers Union redefined its traditional role and waged a multidimensional fight that produced a community wide school strike and transformed the scope of collective bargaining into arenas that few labor relations experts thought possible Using interviews first person accounts participant observation union documents and media reports Steven K Ashby and Robert Bruno tell the story of the 2012 strike that shut down the Chicago school system for seven days A Fight for the Soul of Public Education takes into account two overlapping parallel and equally important stories One is a grassroots story of worker activism told from the perspective of rank and file union members and their community supporters Ashby and Bruno provide a detailed account of how the strike became an international cause when other teachers unions had largely surrendered to corporate driven education reform The second story describes the role of state and national politics in imposing educational governance changes on public schools and draconian limitations on union bargaining rights It includes a detailed account of the actual bargaining process revealing the mundane and the transcendental strategies of both school
