The author's experience of having taught and observed hundreds of mathematics lessons is distilled into the essence of primary mathematics teaching. Dr Marcus Witt, Senior Lecturer in Primary and Early Years Mathematics Education, University of the West of England, UK.

Mathematics Teaching On Target Alan Schoenfeld, Heather Fink, Alyssa Sayavedra, Anna Weltman, Sandra Zuñiga-Ruiz, 2023-06-01. Mathematics Teaching On Target is a guidebook for improving mathematics teaching based on the Teaching for Robust Understanding (TRU) Framework and its five dimensions: The Mathematics Cognitive Demand, Equitable Access, Agency, Ownership and Identity, and Formative Assessment. You'll be guided to refine your classroom activities across the five TRU dimensions and your students will become more knowledgeable and resourceful thinkers and problem solvers. Each chapter in Mathematics Teaching On Target introduces a set of easy-to-use questions for the hands-on improvement of lesson activities such as: Think of an activity you use with your students. Is it as mathematically rich as it might be? Does it stretch your students in the right ways, inviting productive struggle? Can all students engage with it in ways that allow them to grow as mathematical thinkers? What evidence will student work provide, helping you revise the activity so that it works better both in the moment and next time? You'll find examples at the elementary, middle, and secondary levels for each dimension that show how addressing these questions can enhance mathematics instruction. Ideal for your individual classroom, learning community, or district level and wider professional development efforts, this book will enable you to help more students engage with mathematics in increasingly powerful ways. Beyond individual lessons, this book will also accelerate teacher development by helping you focus and reflect on what really counts in your instruction.
