Haydn And The Performance Of Rhetoric:

Haydn and the Performance of Rhetoric Tom Beghin, Sander M. Goldberg, 2007 Accompanying CD ROM in pocket at the rear of book *The Multimediated Rhetoric of the Internet* Carolyn Handa, 2013-12-04 This project is a critical rhetorical study of the digital text we call the Internet in particular the style and figurative surface of its many pages as well as the conceptual design patterns structuring the content of those same pages Handa argues that as our lives become increasingly digital we must consider rhetoric applicable to more than just printed text or to images Digital analysis demands our acknowledgement of digital fusion a true merging of analytic skills in many media and dimensions CDs DVDs and an Internet increasingly capable of streaming audio and video prove that literacy today means more than it used to namely the ability to understand information however presented Handa considers pedagogy professional writing hypertext theory rhetorical studies and composition studies moving analysis beyond merely using the web towards thinking rhetorically about its construction and its impact on culture This book shows how analyzing the web rhetorically helps us to understand the inescapable fact that culture is reflected through all media fused within the parameters of digital technology **Clara Schumann Studies** Joe Davies, 2021-12-02 Develops a holistic and gender aware understanding of Clara Schumann as pianist composer and teacher in nineteenth century Germany **The Rhetoric and Symbolism of Forms in Romantic Music** Patrick Saint-Dizier, 2020-03-17 This book explores the contribution of the symbolic aspects of musical forms and structures to rhetoric and argumentation during the Romantic period While there are several studies on this topic dedicated to the Baroque era there are much fewer contributions on the Romantic period This book shows that the aesthetics of Romantic music are very strong persuasive and expressive and are paramount for communicating in our everyday life Investigating the impact of musical structures on our cognitive and psychological attitudes is the central issue of this book Within a cognitive science perspective it introduces the different elements of meaning conveyed by music through an analysis of several major works of composers of the Romantic era As such the book is an accessible introduction to anyone with a basic background in music and will be of interest to teachers and researchers in music psychology cognition linguistics and computer science **The Beethoven Syndrome** Mark Evan Bonds, 2019 The Beethoven Syndrome is the inclination of listeners to hear music as the projection of a composer's inner self This was a radically new way of listening that emerged only after Beethoven's death Beethoven's music was a catalyst for this change but only in retrospect for it was not until after his death that listeners began to hear composers in general and not just Beethoven in their works particularly in their instrumental music The Beethoven Syndrome Hearing Music as Autobiography traces the rise fall and persistence of this mode of listening from the middle of the eighteenth century to the present Prior to 1830 composers and audiences alike operated within a framework of rhetoric in which the burden of intelligibility lay squarely on the composer whose task it was to move listeners in a calculated way But through a confluence of musical philosophical social and economic changes the

paradigm of expressive objectivity gave way to one of subjectivity in the years around 1830 The framework of rhetoric thus yielded to a framework of hermeneutics concert goers no longer perceived composers as orators but as oracles to be deciphered In the wake of World War I however the aesthetics of New Objectivity marked a return not only to certain stylistic features of eighteenth century music but to the earlier concept of expression itself Objectivity would go on to become the cornerstone of the high modernist aesthetic that dominated the century s middle decades Masterfully citing a broad array of source material from composers critics theorists and philosophers Mark Evan Bonds s engaging study reveals how perceptions of subjective expression have endured leading to the present era of mixed and often conflicting paradigms of listening

Music's Fourth Wall and the Rise of Reflective Listening Cary C Boshamer Distinguished Professor of Music Emeritus Mark Evan Bonds, Mark Evan Bonds, 2025 Music s Fourth Wall and the Rise of Reflective Listening examines fundamental changes in concert hall listening since the Enlightenment with an emphasis on changing assumptions about the very act of listening itself Author Mark Evan Bonds shows how reflective distanced listening previously limited to professional musicians and connoisseurs ousted the earlier ideal of resonant self forgetful listening And for better or worse it is the ideal of reflective listening that has prevailed ever since

The Oxford Handbook of Topic Theory Danuta Mirka, 2014 Topics are musical signs that rely on associations with different genres styles and types of music making The concept of topics was introduced by Leonard Ratner in the 1980s to account for cross references between eighteenth century styles and genres While music theorists and critics were busy classifying styles and genres defining their affects and proper contexts for their usage composers started crossing the boundaries between them and using stylistic conventions as means of communication with the audience Such topical mixtures received negative evaluations from North German critics but became the hallmark of South German music which engulfed the Viennese classicism Topic theory allows music scholars to gain access to meaning and expression of this music The Oxford Handbook of Topic Theory consolidates this field of research by clarifying its basic concepts and exploring its historical foundations The volume grounds the concept of topics in eighteenth century music theory aesthetics and criticism Documenting historical reality of individual topics on the basis of eighteenth century sources it relates topical analysis to other methods of music analysis conducted from the perspectives of composers performers and listeners With a focus on eighteenth century musical repertoire The Oxford Handbook of Topic Theory lays the foundation under further investigation of topics in music of the nineteenth twentieth and twenty first centuries

Mozart's Music of Friends Edward Klorman, 2016-04-21 In 1829 Goethe famously described the string quartet as a conversation among four intelligent people Inspired by this metaphor Edward Klorman's study draws on a wide variety of documentary and iconographic sources to explore Mozart's chamber works as the music of friends Illuminating the meanings and historical foundations of comparisons between chamber music and social interplay Klorman infuses the analysis of sonata form and phrase rhythm with a performer's sensibility He develops a new analytical method called multiple agency that interprets the various players within an ensemble as participants in stylized social intercourse characters capable of surprising seducing outwitting and even deceiving one another musically This book is accompanied by online resources that include original recordings performed by the author and other musicians as well as video analyses that invite the reader to experience the interplay in time as if from within the ensemble
