Creating HDR Photos Harold Davis, 2012-07-24 Since the days of the first photographs artists have used various techniques to extend the range of lights and darks in their photos. Photographic masters such as Ansel Adams and Edward Weston spent countless hours burning and dodging their prints to create images with extended dynamic range. With the advent of digital photography new horizons in extending dynamic range are possible. HDR techniques now make it easy to extend the dynamic range of an image well beyond the capability of the human eye. In *Creating HDR Photos*, bestselling author Harold Davis covers the complete HDR workflow from choosing the subjects that work best for HDR through processing RAW files to unlock the dynamic power of HDR. You'll learn how to photograph multiple exposures and blend them into a single HDR image using various software programs. Best of all you will find out how to control the style of your HDR images from subtle to hyper-real using a range of photographic and post-processing techniques. Packed with stunning image examples *Creating HDR Photos* brings this essential digital technique within every photographer's grasp.

The Low Light Photography Field Guide Michael Freeman, 2014-04-29 In bright light it is easier to take a beautiful photograph with your DSLR. When the sun starts to go down or you are shooting indoors a whole new skill set is needed. This new addition to the successful Field Guide Series will help you shoot what potentially could be the most lovely image without the help of natural light. No more harsh flash photographs with dreary backgrounds and no more blurry night shots that were exposed too long. Opening with a section on the qualities of different kinds of low light the book then deals with ways of overcoming gloomy situations whether you are shooting hand-held or on a tripod. Post-production fixes are also covered allowing you to turn difficult shots into real works of art.

Monochromatic HDR Photography: Shooting and Processing Black & White High Dynamic Range Photos Harold Davis, 2013-10-15 Update The Kindle version of *Monochromatic HDR Photography: Shooting and Processing Black White High Dynamic Range Photos* currently available for sale has been corrected and updated to address formatting issues. *Monochromatic HDR Photography* is the first book intended to show photographers how to work at the intersection of two up-and-coming trends that are at the forefront of the digital revolution: Black White and High Dynamic Range imaging. The book explains techniques for extending dynamic range, monochromatic conversion methods and best practices where the two technologies intersect. Since successful digital monochromatic image creation generally requires using the color information inherent in RAW exposures most case studies will be presented in full color. In addition *Monochromatic HDR Photography* provides extensive coverage of the creative vision required to successfully create monochromatic HDR images and the workflow necessary to make art prints from this specialized image-making technique.

Landscape Photography Rob Sheppard, 2012 A guide to landscape photography using a DSLR camera covers such topics as light composition, perspective, lenses, black and white images and HDR.

Urban Exploration Photography Todd Sipes, 2014 Urban exploration photography, sometimes called urbex, is a unique photographic

genre that requires specific skills in order to produce compelling photographs In *Urban Exploration Photography A Guide to Creating and Editing Images of Abandoned Places* photographer Todd Sipes walks students through everything they need to know about composing shooting and processing photos of abandoned man made structures Sipes begins with a focused discussion on preparation for this unique genre of photography including what to bring both photography related and other such as clothes and accessories Then he dives into the chapters on shooting where he covers the role that composition plays in urban exploration photography the three major shooting styles or urban exploration photography general guidelines for camera settings and gear why you should bracket your shots and how to approach shooting in the dark including light painting using flashes and gels and using an intervalometer He also covers what kind of subject matter to shoot including organic and synthetic elements present in the urban exploration environment such as overgrowth graffiti paint and machinery as well as qualities of light to look for when shooting abandoned structures In the second part of the book Sipes tackles post processing including discussions of the various styles in urban exploration photography as well as the actual post processing techniques that take place in Lightroom and Photoshop as well as third party plug ins He also dedicates a section to Things to Avoid in post processing such as HDR fever over saturation halos and chromatic aberrations
