empowering companies children It reflects the commitment of the state to promote an ideal and progressive value system Recent years have seen several key developments in the law policy and practice related to child rights Significantly with the adoption of the United Nations Convention on the Rights of the Child in 1989 a rights based approach has acquired prominence in the child rights discourse across the world The book analyses the laws in the light of court judgments and policy initiatives taken in India It also examines the interventions and strategies employed by non governmental organizations in recommending legislative reforms in support of children This fully revised third edition focuses on the new legal developments in India such as the Juvenile Justice Care and Protection of Children Act 2015 the new Central Adoption Resource Agency guidelines the Right of Children to Free and Compulsory Education Act 2009 and the National Food Security Act 2013 thus attempting to integrate the law in theory and field practice Medical Management of Abortion World Health Organization, 2019-01-30 Medical abortion care encompasses the management of various clinical conditions including spontaneous and induced abortion both viable and non viable pregnancies incomplete abortion and intrauterine fetal demise as well as post abortion contraception Medical management of abortion generally involves either a combination regimen of mifepristone and misoprostol or a misoprostol only regimen Medical abortion care plays a crucial role in providing access to safe effective and acceptable abortion care In both high and low resource settings the use of medical methods of abortion have contributed to task shifting and sharing and more efficient use of resources Moreover many interventions in medical abortion care particularly those in early pregnancy can now be provided at the primary care level and on an outpatient basis which further increases access to care Medical abortion care reduces the need for skilled surgical abortion providers and offers a non invasive and highly acceptable option to pregnant individuals **Decriminalising Abortion in the UK** Sally Sheldon, Kaye Wellings, 2020-03-23 Available Open Access under CC BY NC licence The public and parliamentary debate about UK abortion law reform is often diverted away from key moral and political questions by disputes regarding basic questions of fact And all too often claims of scientific fact are ideologically driven But what effect would decriminalisation be likely to have on women s health What would be the impact on the incidence of abortions Would decriminalisation equate to deregulation sweeping away necessary restrictions on dangerous or malicious conduct With each chapter written by leading experts in the fields of medicine law reproductive health and social science this book offers a concise and authoritative account of the evidence regarding the likely impact of decriminalisation of abortion in the UK Choice and conscience: Lessons from South Africa for a global debate Satang Nabaneh, 2023-11-08 Choice and Conscience offers a fresh and insightful perspective on the highly debated issue of conscientious objection in abortion care Satang Nabaneh's socio legal approach which draws on both traditional legal scholarship and African feminist intellectual traditions provides a nuanced understanding of how legal norms construct and maintain power relations By focusing on the experiences of nurses in South Africa Nabaneh explores the complexities of conscience discretionary power and socio cultural and political factors that influence nurses decisions about whether or not to conscientiously object In the wake of the recent rollback of abortion rights in the United States and the trend towards liberalisation within the African region Nabaneh provides an important African perspective on how the international human rights framework should strike a contextual balance between freedom of conscience and ensuring access to abortion Choice and Conscience will interest lawyers activists policymakers scholars and students exploring the dynamic intersections of law healthcare and gender politics Choice and Conscience stands as a significant and valuable addition to the ongoing global scholarship on this critical issue It underscores the vital concept that intersectionality should occupy a central place in our examination of how various local contexts give rise to layered forms of privilege and disadvantage Dr Tlaleng Mofokeng UN Special Rapporteur on the right to health Nabaneh's study of law in action zeros in on South African nurses gatekeepers who often object to the practice for reasons of conscience Her interviews of these nurses and her analysis complicate our understanding of challenges to abortion access providing lessons applicable not only to South Africa and other African countries but everywhere where there is a gap between formal law and its application Mindy Jane Roseman JD PhD Yale Law School Written from an African feminist perspective this book offers fresh insights into our understanding of the intersection between politics mobilisation of discretionary power and the exercise of conscientious objection to abortion by mid level providers Charles Ngwena Professor of Law Centre for Human Rights University of Pretoria This book offers powerful insights about how informal and background norms in health systems function constrain or enable reproductive justice Focusing on conscientious objection to abortion by nurses including midwives in South Africa Nabaneh sketches the importance of a feminist analysis that is situated in Africans lived realities Alicia Ely Yamin
