Health And Human Rights In A Changing World:

Health and Human Rights in a Changing World Michael Grodin, Daniel Tarantola, George Annas, Sofia Gruskin, 2013-07-04

Health and Human Rights in a Changing World is a comprehensive and contemporary collection of readings and original material examining health and human rights from a global perspective. Editors Grodin, Tarantola, Annas, and Gruskin are well known for their previous two volumes published by Routledge on this increasingly important subject to the global community. The editors have contextualized each of the five sections with foundational essays; each reading concludes with discussion topics, questions, and suggested readings. This book also includes Points of View sections originally written from perspectives by important authors in the field. Section I is a Health and Human Rights Overview that lays out the essential knowledge base and provides the foundation for the following sections. Section II brings in notions of concepts, methods, and governance, framing the application of health and human rights in particular. The Human Rights based Approaches to Health. Section III sheds light on issues of heightened vulnerability and special protection, stressing that the health and human rights record of any nation or any community is determined by what is being done and not done about those who are most in need. Section IV focuses on addressing system failures where health and human rights issues have been documented, recognized even at times proclaimed as priorities, and yet insufficiently attended to as a result of State denial, unwillingness, or incapacity. Section V examines the relevance of the health and human rights paradigm to a changing world, underscoring contemporary global challenges and responses. Finally, a Concluding Note brings together the key themes of this set of articles and attempts to project a vision of the future.

Reclaiming Human Rights in a Changing World Order Christopher Sabatini, 2022-10-07 Human rights and the international institutions that strive to protect them are under increasing attack from powerful actors on the global stage from recent political trends even within established democracies and from new technologies Together these threats have undermined what had been a fragile international consensus as recently as two decades ago about the importance of concerted international action to protect human rights and punish those who abuse them China Russia and other nondemocratic regimes have become increasingly bold in acting as if agreed upon international human rights standards no longer exist or at least do not apply to them More broadly domestic political movements based on nationalism religion and populism are challenging human rights norms on nearly every continent And new technologies including autonomous weapons systems and relentless digital surveillance have given national leaders new ways to control or even abuse their citizens with impunity This book examines these new challenges to international and regional human rights in Africa Europe Latin America and the Middle East It is the result of a year of workshops with human rights activists and young leaders from around the world with chapters written by a diverse group of leading scholars Beyond describing the challenges to human rights the book offers targeted practical recommendations for national and multilateral policymakers activists and scholars for concrete actions to protect human rights as well as improve public understanding of why doing so is essential *Reclaiming Human Rights in a Changing World Order* will interest scholars of international relations and human rights law domestic and international activists involved in human rights indeed anyone wanting to understand the implications for the liberal international order of the new geopolitical competition modern technology and political and social movements

Human Rights and Disability John-Stewart Gordon,Johann-Christian Pöder,Holger Burckhart,2017-07-14 The formerly established medically

based idea of disability with its charity based approach to treatment and services is being replaced by a human rights based approach in which people with impairments are no longer considered medical problems totally dependent on the beneficence of non impaired people in society but have fundamental rights to support inclusion and participation This interdisciplinary book examines the diverse concerns that people with impairments face in the context of human rights provides insights into new developments on important issues relating human rights to disability and features new approaches and solutions to vital problems in the current debate Oxford Textbook of Global Health of Women, Newborns, Children, and Adolescents Delan Devakumar,Jennifer Hall,Zeshan Qureshi,Joy Lawn,2019 The aim of this book is to provide a summary of the current concepts and challenges in global maternal and child health in a format that appeals to students of the subject the general public and current practitioners in the field It also provides study exercises that may inform tutors on undergraduate and postgraduate courses Vietnam's Children in a Changing World Rachel Burr,2006-03-24 Like the majority of children living in the global South today a large number of Vietnamese youths work to help support their families International human rights organizations have focused on these children seeking to bring their lives into line with an understanding of childhood that is generally accepted in the developed world In this ethnographic study Rachel Burr draws on her daily observations of working children in Hanoi and argues that these youngsters are misunderstood by the majority of agencies that seek to help them Most aid programs embrace a model of childhood that is based on Western notions of individualism and bountiful resources They further assume that this model is universally applicable even in cultures that advocate a collective sense of self and in countries that do not share the same economic advantages Burr presents the voices and experiences of Vietnamese children in the streets in a reform school and in an orphanage to show that workable solutions have become lost within the rhetoric propagated by aid organizations The reality of providing primary education or adequate healthcare for all children for instance does not stand a chance of being achieved until adequate resources are put in place Yet organizations preoccupied with the child rights agenda are failing to acknowledge the distorted global distribution of wealth in favor of Western nations Offering a unique firsthand look at the experiences of children in contemporary Vietnam this book also provides a broad analysis of how internationally led human rights agendas are often received at the local level Arctic Governance in a Changing World Mary Durfee,Rachael Lorna Johnstone,2019-01-14 This comprehensive text explains the relationship between the Arctic and the wider world through the lenses of international relations international law and political economy It is an essential resource for any student or scholar seeking a clear and succinct account of a region of ever growing importance to the international community Highlights include Broad coverage of national and human security Arctic economies international political economy human rights the rights of indigenous people the law of the sea navigation and environmental governance A clear review of current climate related change Emphasis on the sources of cooperation in the Arctic through international relations theory and law Examination of the Arctic in the broader global context illustrating

vectors of force in shaping and setting both personal and public responses to the complexities of biotechnology or what has been referred to as The New Biology All too often past considerations of this topic have neglected to recognise the synergistic influences of law as a catalyst for codifying contemporary values into normative standards Professor Smith reaches the conclusion that if traditional bioethical principles are to be seen as pertinent constructs for policy making they must be broadened through the law of public health and Human rights Law and Bioethics Intersections along the Mortal Coil casts law as the pivotal force in bringing stability to the ongoing debates on how to maintain bioethical relevance in decision making and in so doing it offers an excellent overview of the current bioethical issues in medical law considered in light of recent and ongoing technological developments in medicine This book will be of particular interest to academics and students of Law Political Science Philosophy and Economics *Global Strategic Assessment 2009: America's Security Role in a Changing World* Patrick M.
