a guide to primary health care design

Geoffrey Purves

**Healthy Living Centres** explores the process of designing buildings for primary health care. With the message that good design means healthy living, **Geoffrey Purves** shows the beneficial effects that a good brief can bring to the staff, patients and visitors of health care facilities – and gives a practical guide to achieving this.

After reviewing the historical approach to primary health care and outlining key current and projected developments the book goes on to reveal the matrix of relationships that influence the design of the new generation of frontline medical practices – the Healthy Living Centres themselves. Purves sets new standards and procedures for uncovering and resolving the inherent conflicts of the design process, and shows how investment in effective architecture can be more beneficial to all users. International case studies including examples from the UK, US, Japan and South Africa provide technical detail and show what good design can achieve.

**Geoffrey Purves** is a chartered architect and an Honorary Research Associate at Durham University in the Centre for Arts and Humanities in Health and Medicine (CAHHM). He is also senior partner of Geoffrey Purves Partnership which has designed over 50 primary health care projects and has recently celebrated 25 years in business.
