in his philosophy more generally and in its development For example in the Critique of Pure Reason Kant outlines the method of philosophy in general by contrasting it with the method of mathematics in the Critique of Practical Reason Kant compares the Formula of Universal Law central to his theory of moral judgement to a mathematical postulate in the Critique of Judgement where he considers aesthetic judgment Kant distinguishes the mathematical sublime from the dynamical sublime This last point rests on the distinction that shapes the Transcendental Analytic of Concepts at the heart of Kant s Critical philosophy that between the mathematical and the dynamical categories These examples make it clear that Kant s transcendental philosophy is strongly influenced by the importance and special status of mathematics The contributions to this book explore this theme of the centrality of mathematics to Kant s philosophy as a whole This book was originally published as a special issue of the Canadian Journal of Philosophy **The British and Foreign Evangelical Review** ,1862

Systematic Theology John Miley,1893 Philosophical Perspectives on Newtonian Science Phillip Bricker,R. I. G. Hughes,1990 These original essays explore the philosophical implications of Newton s work They address a wide range of topics including Newton s influence on his contemporaries and successors such as Locke and Kant and his views on the methodology of science on absolute space and time and on the Deity Howard Stein compares Newton s refusal to lock natural philosophy into a preexisting system with the more rigid philosophical predilections of his near contemporaries Christian Huygens and John Locke Richard Arthur s commentary provides a useful gloss on Stein s essay Lawrence Sklar puzzles over Newton s attempts to provide a unified treatment of the various real quantities absolute space time and motion According to Phillip Bricker s responding essay however the distinctions Sklar draws do not go to the heart of the debate between realists and representationalists J E McGuire and John Carriero debate Newtons views of the relationship between the Deity and the nature of time and space Peter Achinstein looks at the tension between Newton s methodological views and his advocacy of a corpuscular theory of light he suggests that Newton could justify the latter by a weak inductive inference but R I G Hughes believes that this inference involves an induction Newton would be unwilling to make Immanuel Kant s critique of Newton s view of gravity is discussed and amplified by Michael Friedman In response Robert DiSalle raises a number of problems for Friedman s analysis Errol Harris and Philip Grier extend the discussion to the present day and look at the ethical implications of Newton s work Phillip Bricker is Associate Professor of Philosophy at the University of Massachusetts at Amherst R I G Hughes is Associate Professor of Philosophy at the University of South Carolina Philosophical Perspectives on Newtonian Science is included in the Johns Hopkins Series on the History and Philosophy of Science **An analysis of Mr. Locke's doctrine of ideas in his Essay on human understanding.
