Learning Beyond the Objective in Primary Education Ruth Wills, 2019-06-18 *Learning Beyond the Objective in Primary Education* explores an existential perspective for pedagogy proposed in response to the current technocratic paradigm of education prevalent in many countries worldwide. This new perspective is termed *Bildung's Repetition*. The book seeks to encourage policy makers and educational practitioners to consider the impact of education on children over and above the meeting of set targets and objectives. Located in a philosophical framework, this book considers how children might learn authentically in the light of their own personal contingency. A series of case studies reflecting the effectiveness of this perspective through the curriculum is provided, each illustrating how *Bildung's Repetition* allows for personalized meaningful learning within current structures. Recommendations for practice are provided, encouraging all stakeholders in education to consider the value of this perspective and effect a ten-degree shift within educational thought. This unique book fuses theory with practice and will be of great interest to academics, researchers, and students in the fields of primary education and teacher training. It will also be of interest to school leaders and practicing teachers.

Giving Beyond the Gift Elliot R. Wolfson, 2014-02-03 This book explores the co-dependency of monotheism and idolatry by examining the thought of several prominent twentieth-century Jewish philosophers: Cohen, Buber, Rosenzweig, and Levinas. While all of these thinkers were keenly aware of the pitfalls of scriptural theism to differing degrees, they each succumbed to the temptation to personify transcendence, even as they tried either to circumvent or to restrain it by apophatically purging kataphatic descriptions of the deity. Derrida and Wyschogrod, by contrast, carried the project of denegation one step further, embarking on a path that

culminated in the aporetic suspension of belief and the consequent removal of all images from God a move that seriously compromises the viability of devotional piety The inquiry into apophysis transcendence and immanence in these Jewish thinkers is symptomatic of a larger question Recent attempts to harness the apophatic tradition to construct a viable postmodern negative theology a religion without religion are not radical enough Not only are these philosophies of transcendence guilty of a turn to theology that defies the phenomenological presupposition of an immanent phenomenality but they fall short on their own terms inasmuch as they persist in employing metaphorical language that personalizes transcendence and thereby runs the risk of undermining the irreducible alterity and invisibility attributed to the transcendent other The logic of apophysis if permitted to run its course fully would exceed the need to posit some form of transcendence that is not ultimately a facet of immanence Apophatic theologies accordingly must be supplanted by a more far reaching apophysis that surpasses the theolatrous impulse lying coiled at the crux of theism an apophysis of apophysis based on accepting an absolute nothingness to be distinguished from the nothingness of an absolute that does not signify the unknowable One but rather the manifold that is the pleromatic abyss at being's core Hence the much celebrated metaphor of the gift must give way to the more neutral and less theologically charged notion of an unconditional givenness in which the distinction between giver and given collapses To think givenness in its most elemental phenomenological sense is to allow the apparent to appear as given without presuming a causal agency that would turn that given into a gift

Beyond the Final Frontier. Everything for the Theory of Everything Mihai Fătu Efori, Cristina Fătu-Hartmann, We are intelligent beings. This is why we are preoccupied with these questions: Who are we? Where are we coming from? Where are we going? But besides intelligence, we are endowed with yet another quality of the mind, and this is why we are troubled by even more enigmatic problems: Does God exist? Do we humans have a soul, or are we just the superior product of evolution of matter simply emerged from the Big Bang? This book is a provocation: set aside your intelligence for a while, at least for the duration of the journey we invite you on. We will travel as far as possible, and surprisingly, we are not going to navigate with our intelligence but with the other quality of our mind. It will guide us to the last frontier of matter, to the last frontier of time, and to the last frontier of knowledge. We will set out on this trip armed on one hand with what scientists tell us they discovered digging deep inside our universe, deep inside matter and deep inside time, and on the other hand also with what religion reveals for us. Who is telling the truth, science or religion? In the end, we will be surprised to find out that atheists and believers contradict each other absolutely in vain. In fact, they all say the exact same thing: Do you think this is a paradox? You are right. This is what your intelligence thinks. But this paradox is an impediment only for your intelligence. Our skillful guide will help us overcome this apparent setback. Do you want to know how? Open the book.
