Information and Communication Technologies for Women's Socioeconomic Empowerment Samia Melhem, Claudia Morrell, Nidhi Tandon, 2009-10-02 This paper reviews how women in the developing world access and use information and communication technology ICT It examines the discourse and controversies surrounding the digital gender divide including links to poverty and illiteracy Major themes concerning women and ICTs are explored such as women in the ICT workforce how girls and women relate differently to ICT and opportunities and barriers for women in science and technology in general Current research relating to gender and ICT is often country specific and is more prevalent in developed countries than in developing countries This paper suggests where additional research is needed on barriers to women's entry and access to ICT The overall objective of this paper is to influence policy dialogue around women and ICT for development by raising awareness of the digital gender divide Economic opportunity for women in ICT will not be realized until policies address gender considerations and ensure that ICT investment contributes to more sustainable and equitable development

Information and Communication Technologies for Women's Socio-economic Empowerment Samia Melhem, Nidhi Tandon, Claudia Morrell, 2009 The report will provide a brief overview of major themes for women and ICTs including issues for girls versus women the ICT workforce and opportunities versus the threat of ICTs for women's lives The report will discuss as well the issue of women and Sciences and Technologies Several policy recommendations will be drawn amongst which The economic opportunities women can bring to development through ICTs will not be realized unless policies for all mainstream efforts take gender considerations into account Policy makers should host forums that allow gender experts to debate the issues and **AI and education** UNESCO, 2025-09-05 **Digital Transformation for Promoting**

Inclusiveness in Marginalized Communities Zhou, Munyaradzi, Mahlangu, Gilbert, Matsika, Cyncia, 2022-06-24 One of the realities characterizing the globe is the exclusion of marginalized communities in digital transformation Their exclusion has resulted in a lack of participation in the digital space which has catastrophic consequences on the digital economy To promote digital inclusiveness in marginalized communities there is a need to deconstruct the illusion that digital transformation is an urban phenomenon Digital Transformation for Promoting Inclusiveness in Marginalized Communities discusses how digital transformation can be utilized to promote inclusiveness in marginalized communities by exploring opportunities and challenges and determining change mechanisms required to enhance digital transformation in marginalized communities Covering a range of topics such as augmented reality and remote communities this reference work is ideal for government employees technologists policymakers industry professionals researchers scholars academicians instructors and students **World Development Report 2012** The International Bank for Reconstruction and Development / The World Bank The International Bank for Reconstruction and Development / The World Bank, 2011-09-28 The

lives of women around the world have improved dramatically at a pace and scope difficult to imagine even 25 years ago. Women have made unprecedented gains in rights, education, health, and access to jobs and livelihoods. More countries than ever guarantee equal rights in property, marriage, and other domains. Gender gaps in primary schooling have closed in many countries, while in a third of all countries, girls now outnumber boys in secondary school. And more young women than men attend universities in 60 countries. Women are using their education to participate more in the labor force; they now make up 40 percent of the global labor force and 43 percent of its farmers. Moreover, women now live longer than men in every region of the world. Despite the progress, gaps remain in many areas. Women are more likely to die relative to males in many low and middle income countries than their counterparts in rich countries, especially in childhood and during their reproductive years. Primary and secondary school enrollments for girls remain much lower than for boys in many Sub-Saharan African countries and some parts of South Asia, as well as among disadvantaged populations. Women are more likely than men to work as unpaid family laborers or in the informal sector to farm smaller plots and grow less profitable crops, operate in smaller firms and less profitable sectors, and generally earn less. Women, especially poor women, have less say over decisions and less control over household resources. And in most countries, fewer women participate in formal politics than men and are underrepresented in the upper echelons.

The World Development Report 2012: Gender Equality and Development argues that closing these persistent gender gaps matters. It matters because gender equality is a core development objective in its own right. But it is also smart economics. Greater gender equality can enhance productivity, improve development outcomes for the next generation, and make institutions more representative. Building on a growing body of knowledge on the economics of gender equality and development, the Report identifies the areas where gender gaps are most significant, both intrinsically and in terms of their potential development payoff, and where growth alone cannot solve the issues. It then sets forth four priorities for public action: Reducing excess female mortality and closing education gaps where they remain; Improving access to economic opportunities for women; Increasing women's voice and agency in the household and in society; Limiting the reproduction of gender inequality across generations.

The New Silk Road leads through the Arab Peninsula, Anna Visvizi, Miltiadis D. Lytras, Wade Alhalabi, Xi Zhang, 2019-07-10. This book is an incisive query into the origins, implications, and opportunities that China's Belt and Road Initiative creates for stakeholders in Asia and the Arab World. It emphasises the role of cutting edge technology in boosting collaboration in the fields of politics, economics, business, and culture across regions, countries, and continents.

World Development Report 2012, World Bank, 2011-09-01. This year's World Development Report looks at facts and trends regarding the various dimensions of gender equality in the context of the development process.

ICT as a Driver of Women's Social and Economic Empowerment, Dhaundiyal, Pankaj, Moid, Sana, 2023-04-05. The role of information and communication technologies as a tool for development has attracted the sustained attention of various agencies worldwide. If the gender dimensions of information and

communication technologies in terms of access and use capacity building opportunities employment and potential for empowerment are explicitly identified and addressed information and communication technologies can be a powerful catalyst for the political and social empowerment of women and the promotion of gender equality ICT as a Driver of Women's Social and Economic Empowerment contributes to the growing body of literature and present state of knowledge by offering evidence on how new information and communication technologies impact women's economic and social empowerment and overall welfare creation leading to inclusive growth Covering key topics such as economics entrepreneurship digital technologies and inclusion this premier reference source is ideal for industry professionals policymakers administrators business owners managers researchers academicians scholars practitioners instructors and students *World Development Report 2016* World Bank Group, 2016-01-14 Digital technologies are spreading rapidly but digital dividends the broader benefits of faster growth more jobs and better services are not If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone why can't others around the world do the same If 8 million entrepreneurs in China one third of them women can use an e-commerce platform to export goods to 120 countries why can't entrepreneurs elsewhere achieve the same global reach And if India can provide unique digital identification to 1 billion people in five years and thereby reduce corruption by billions of dollars why can't other countries replicate its success Indeed what's holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver Two main reasons First nearly 60 percent of the world's population are still offline and can't participate in the digital economy in any meaningful way Second and more important the benefits of digital technologies can be offset by growing risks Startups can disrupt incumbents but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms Employment opportunities may be greater but not when the labor market is polarized The internet can be a platform for universal empowerment but not when it becomes a tool for state control and elite capture The World Development Report 2016 shows that while the digital revolution has forged ahead its analog complements the regulations that promote entry and competition the skills that enable workers to access and then leverage the new economy and the institutions that are accountable to citizens have not kept pace And when these analog complements to digital investments are absent the development impact can be disappointing What then should countries do They should formulate digital development strategies that are much broader than current information and communication technology ICT strategies They should create a policy and institutional environment for technology that fosters the greatest benefits In short they need to build a strong analog foundation to deliver digital dividends to everyone everywhere *Designing Social Innovation for Sustainable Livelihoods* Gavin Brett Melles, 2022-02-14 This volume discusses how design broadly understood as design of business policy product system etc can produce socially responsible innovations with livelihoods consequences Sustainable Livelihoods Framework SLF is a robust framework for analysing and measuring social impact for excluded populations and groups This is

illustrated with case studies from India Sri Lanka Bangladesh Nepal by discussing how initiatives concerned with design in the broad sense have the potential to create sustainable livelihoods This volume will be of interest to scholars and practitioners in Sustainable Development and Design **Women and ICT in Africa and the Middle East** Doctor Anne Webb, Doctor Ineke Buskens, 2014-10-09

What is the link between information communication technology and women s empowerment in today s development context How can ICT facilitate the pursuit of a better world Exploring the rich complexity of the contexts in which they live and work the authors of Women and ICT in Africa and the Middle East offer a multitude of perspectives and experiences avoiding simplistic answers and solutions Based on analyses from twenty one research teams in fourteen countries this much needed human centred contribution to the fields of gender development and information communication technology questions demonstrates and suggests what it takes to wield the emancipatory potential of ICT Toward Gender Equality in East Asia and the Pacific World Bank, 2012-10-01

Communities in Developing Societies Darelle van Greunen, Jacques Steyn, 2015-11-25 Several decades of international aid predominantly granted by the highly developed world the haves for the use of ICT in developing regions known by several labels such as the have nots bottom of the pyramid the south or some time ago the third world have passed but the holy grail of turning these societies into the ideals defined by the donors is still elusive Previously the emphasis was on top down approaches in this endeavour Now priority is increasingly given to bottom up approaches putting the targeted communities first using methods such as co creation and living labs Information and Communication Technologies for Development ICT4D is still a domain in search of a common ground The many different perspectives from diverse ideologies paradigms and theoretical perspectives here lead to an interesting debate but meanwhile agents of social change are doing their best to change communities ostensibly for the better An ongoing endeavour this discussion requires further investigation of the complexities of techno societies The contributions to this volume range from explorations of theory models and methods to investigations into the practical implementation of ICT in communities covering the characteristics of social groups and different generations and gender issues as well as its applications in education and health As such the contributions in this book will inform continuing debates concerning the role of ICT in developing communities on the wrong side of all the technical and social divides in human societies **World Development Indicators 2010** World Bank, 2010-04-22
