Core Assumptions in Business Theory, 2025-05-08 The modern market based economy generates wealth but it lags on well being it has mastered efficiency but struggles with equity it boasts size but falls short on sustainability In other words our economy delivers performance but neglects progress i e well being equity and sustainability Many rightly call for tighter regulation higher true prices and longer term incentives Others appeal to corporate purpose shared value and stakeholder centricity Beyond regulation and the practice of business we must attend as well to education and the theory of business In particular we must look at business theory's core assumptions whose weaknesses are long known In an applied field such as business where theory tends to be normative flawed assumptions could act as a wedge cleaving apart performance and progress In this volume Subramanian Rangan brings together eminent social scientists and philosophers to explore core assumptions in each of the major fields of business including economics strategy marketing operations decision science leadership governance technology and finance This structured field by field reflection reveals and expands the bounds of our rationality Core Assumptions in Business Theory proposes a revised profit function that integrates harm outlines how economic actors may draw on moral philosophy to enact Pareto equity and not just Pareto efficiency

suggests a two stage rationality approach that can attend to well being and recasts marketing as consumer education and not merely demand promotion With an emphasis on education rather than regulation of economic power this volume argues that moral reasoning and moral roles can fruitfully supplement prudential reasoning and functional responsibilities Such an evolution will enable our economy to be both modern and moral This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations
