televisions computers and monitors contain mercury dangerous chemicals and other harmful components The existing
literature on hazardous materials addresses the risks attached to specific materials and emphasizes compliance and personal
protective equipment PPE but not the life cycle management of the materials that represent the hazards A logistics treatment
of the subject is needed to understand the underlying supply chain management principles and apply solutions to reduce
overall use of hazardous materials Hazardous Material HAZMAT Life Cycle Management Corporate Community and

materials and covers the U S regulatory framework and standards governing the transport and use of such materials Section
II examines institutional and organizational program elements and provides guidelines for developing these programs to
reduce liability and risk while lowering point source pollution and total hazardous waste production The logistics approach to
hazardous materials yields exponential benefits in costs and the reduction or elimination of such materials It limits
organizational liability and at the same time reduces the costs associated with hazardous waste management and disposal
