Norman, 1996 Evolutionary in approach this book explores informatino systems development both analysis and design using an object oriented methodology combined with a relational database as part of the implementation *Object-oriented Analysis and Design with Applications* Grady Booch, 1994 This revision of Grady Booch s classic offers the first industry wide standard for notation in developing large scale object oriented systems Laying the groundwork for the development of complex systems based on the object model the

author works in C to provide five fully developed design examples along with many smaller applications Three of these capstone projects are new with this edition including an inventory tracking system which implements a client server The other four span problem domains as diverse as data acquisition for scientific tools framework artificial intelligence and command and control To measure progress metrics in object development are suggested so that the developer knows how the project is going In addition the author demonstrates good and bad object designs and shows how to manage the trade offs in complex systems *Journal of Object-oriented Programming* ,1998 **1997 IEEE First Workshop on Multimedia Signal Processing** Yao Wang,1997 Both theoretical aspects of signal processing and application orientated research activities are discussed in this text Topics include multimedia processing multimedia databases multimedia system design and implementation and human machine interface and perception **Great Software Debates** Alan M.
