Healing Spaces The Science Of Place And Well Being:

Healing Spaces Esther M. Sternberg MD, 2009-05-31 Sternberg explores the marvelously rich nexus of mind and body perception and place The book shows how a Disney theme park or a Frank Gehry concert hall a labyrinth or a garden can trigger or reduce stress induce anxiety or instill peace

Healing Spaces, Modern Architecture, and the Body Sarah Schrank, Didem Ekici, 2016-07-15 Healing Spaces Modern Architecture and the Body brings together cutting edge scholarship examining the myriad ways that architects urban planners medical practitioners and everyday people have applied modern ideas about health and the body to the spaces in which they live work and heal The book s contributors explore North American and European understandings of the relationship between physical movement bodily health technological innovation medical concepts natural environments and architectural settings from the nineteenth century through the heyday of modernist architectural experimentation in the 1920s and 1930s and onward into the 1970s Not only does the book focus on how professionals have engaged with the architecture of healing and the body it also explores how urban dwellers have strategized and modified their living environments themselves to create a kind of vernacular modernist architecture of health in their homes gardens and backyards This new work builds upon a growing interdisciplinary field incorporating the urban humanities geography architectural history the history of medicine and critical visual studies that reflects our current preoccupation with the body and its corresponding therapeutic culture

Psychological Trauma Ana Starcevic, 2019-11-13 Trauma presents as a negative experience or situation of an individual in which coping mechanisms do not always work perfectly This leads to the appearance of disturbing behavior thinking or developing disorders in the area of mental illnesses Psychological trauma is related to chronic and repetitive experiences and the term and situation that refer to it must be consider objectively because it is up to each survivor to determine if it is traumatic Future studies in the area of psychological trauma need to be conducted with the aim of defining anatomical correlates of stress and its underlying pathophysiological mechanisms

Therapeutic Landscapes Clare Cooper Marcus, Naomi A Sachs, 2013-09-20 This comprehensive and authoritative guide offers an evidence based overview of healing gardens and therapeutic landscapes from planning to post occupancy evaluation It provides general guidelines for designers and other stakeholders in a variety of projects as well as patient specific guidelines covering twelve categories ranging from burn patients psychiatric patients to hospice and Alzheimer s patients among others Sections on participatory design and funding offer valuable guidance to the entire team not just designers while a planting and maintenance chapter gives critical information to ensure that safety longevity and budgetary concerns are addressed

Sound and Noise Marcia Jenneth Epstein, 2020-10-30 This book is about how you listen and what you hear about how to have a dialogue with the sounds around you Marcia Jenneth Epstein gives readers the impetus and the tools to understand the sounds and noise that define their daily lives in this groundbreaking interdisciplinary study of how auditory stimuli impact both individuals and communities Epstein employs

scientific and sociological perspectives to examine noise in multiple contexts as a threat to health and peace of mind as a motivator for social cohesion as a potent form of communication and expression of power She draws on a massive base of specialist literature from fields as diverse as nursing and neuroscience sociology and sound studies acoustic ecology and urban planning engineering anthropology and musicology among others synthesizing and explaining these findings to evaluate the ubiquitous effects of sound in everyday life Epstein investigates speech and music as well as noise and explores their physical and cultural dimensions Ultimately she argues for an engaged public dialogue on sound built on a shared foundation of critical listening and provides the understanding for all of us to speak and be heard in such a discussion *Sound and Noise* is a timely evaluation of the noise that surrounds us how we hear it and what we can do about it

Sheridan, Randall H. McGuire, 2019-11-12 *The Border and Its Bodies* examines the impact of migration from Central America and Mexico to the United States on the most basic social unit possible the human body It explores the terrible toll migration takes on the bodies of migrants those who cross the border and those who die along the way and discusses the treatment of those bodies after their remains are discovered in the desert The increasingly militarized U S Mexico border is an intensely physical place affecting the bodies of all who encounter it The essays in this volume explore how crossing becomes embodied in individuals how that embodiment transcends the crossing of the line and how it varies depending on subject positions and identity categories especially race class and citizenship Timely and wide ranging this book brings into focus the traumatic and real impact the border can have on those who attempt to cross it and it offers new perspectives on the effects for rural communities and ranchers An intimate and profoundly human look at migration *The Border and Its Bodies* reminds us of the elemental fact that the border touches us all **Health Progress**, 2010 **Modernity and the Construction of Sacred**

Space Aaron French, Katharina Waldner, 2024-07-01 This volume focuses on the connection between modern design and architectural practices and the construction of sacred spaces Not only language and ritual but space place and architecture

play a significant role in constructing special or religious spaces However this concept of a constructed sacred space remains undertheorized in religious studies and the history of art and architecture in general This volume therefore revisits the question of a modern sacred space from an interdisciplinary perspective focusing on religion space and architecture during the emergence of the modern period and up until contemporary times Revisiting the ways in which modern architects and artists have endeavored to create sacred spaces and buildings for the modern world will address the underlying questions of how religious ideas especially those related to esotericism and to alternative religiosities have transformed the way sacred spaces are conceptualized today *Happy City: Transforming Our Lives Through Urban Design* Charles

Montgomery,2013-11-12 A journalist travels the world and investigates current socioeconomic theories of happiness to discover why most modern cities are designed to make us miserable what we can do to change this and why we have more to learn from poor cities than from prosperous ones **Nature by Design** Stephen R. Kellert,2018-01-01 A gorgeously

illustrated accessible book that provides a holistic summary of the key elements for good biophilic design **Introducing Human Geographies** Kelly Dombroski,Mark Goodwin,Junxi Qian,Andrew Williams,Paul Cloke,2024-07-09 Introducing Human Geographies is a travel guide into the academic subject of human geography and the things that it studies The coverage of the new edition has been thoroughly refreshed to reflect and engage with the contemporary nature and direction of human geography This updated and much extended fourth edition includes a diverse range of authors and topics from across the globe with a completely revised set of contributions reflecting contemporary concerns in human geography Presented in four parts with a streamlined structure it includes over 70 contributions written by expert international researchers addressing the central ideas through which human geographers understand and shape their subject It maps out the big foundational ideas that have shaped the discipline past and present explores key research themes being pursued in human geography s various sub disciplines and identifies emerging collaborations between human geography and other disciplines in the areas of technology justice and environment This comprehensive stimulating and cutting edge introduction to the field is richly illustrated throughout with full colour figures maps and photos The book is designed especially for students new to university degree courses in human geography across the world and is an essential reference for undergraduate students on courses related to society place culture and space *Handbook of Research on Methodologies*

for Design and Production Practices in Interior Architecture Garip, Ervin,Garip, S. Banu,2020-11-20 Studio environments can be defined as multi dimensional integrated production spaces where basic design trainings take place and where design issues including theoretical notions such as sociological political phenomenological and other dimensions are discussed Present approaches within the literature and social media on this topic gives cause for students to evaluate their future professions over finished and pictorial products rather than ontological and processual means While there are many resources available on the present approaches of aesthetics and visuality of interior spaces there is not much research

available on new design methodologies related design processes and new applied methods in interior architecture Based on different contexts these methods of design practice have the potential to enrich design processes and create multiple discussion platforms within project studios as well as other design media These different representations and narration methods for research in the context of interior architecture can be effectively used in design processes The Handbook of Research on Methodologies for Design and Production Practices in Interior Architecture proposes new design methodologies and related design processes and introduces new applied method approaches while presenting alternative methods that have been used within design studios in the field of interior architecture The chapters deal with four major sections the design process and interdisciplinary approaches then scenario development and content followed by material texture and atmosphere and concluding with new approaches to design While highlighting topics such as spatial perception design strategies architectural atmosphere and design thinking this book is of interest to architects interior designers practitioners stakeholders researchers academicians and students looking for advanced research on the new design methodologies and processes for interior architecture Natural Environments and Human Health Alan W Ewert, Denise S Mitten, Jillisa R Overholt, 2014-04-25 The role natural environments play in human health and wellbeing is attracting increasing attention There is growing medical evidence that access to the natural environment can prevent disease aid recovery tackle obesity and improve mental health This book examines the history of natural environments being used for stress reduction enjoyment aesthetics and catharsis and traces the development of the connection between humans and the environment and how they impact our personal and collective health *Mental Health and Wellbeing in the Anthropocene* Jamie McPhie, 2019-01-22 This book makes the unorthodox claim that there is no such thing as mental health It also deglamourises nature based psychotherapies deconstructs therapeutic landscapes and redefines mental health and wellbeing as an ecological process distributed in the environment rather than a psychological manifestation trapped within the mind of a human subject Traditional and contemporary philosophies are merged with new science of the mind as each chapter progressively examples a posthuman account of mental health as physically dispersed amongst things emoji photos tattoos graffiti cities mountains in this precarious time labelled the Anthropocene Utilising experimental walks play scripts and creative research techniques this book disrupts traditional notions of the subjective self resulting in an Extended Body Hypothesis a pathway for alternative narratives of human environment relations to flourish more ethically This transdisciplinary inquiry will appeal to anyone interested in non classificatory accounts of mental health particularly concerning areas of social and environmental equity post nature Dancing in the Rain Jerome T. Murphy, 2019-01-02 Dancing in the Rain offers a lively and accessible guide aimed at helping education leaders thrive under pressure by developing the inner strengths of mindfulness and self compassion expressing emotions wisely and maintaining a clear focus on the values that matter most Jerome T Murphy a scholar and former dean who has written and taught about the inner life of education leaders argues that the main barrier to

thriving as leaders is not the outside pressures we face but how we respond to them inside our minds and hearts In this concise volume Murphy draws on a combination of Eastern contemplative traditions and Western psychology as well as his own experience and research in the field of education leadership He presents a series of exercises and activities to help educators take discomfort more in stride savor the joys and satisfactions of leadership work and thrive as effective leaders guided by heartfelt values Every day education leaders find themselves swamped in a maelstrom of pressures that add to the complex challenges of educating all students to a high level With humor and compassion *Dancing in the Rain* shows educators how to lead lives of consequence and purpose in the face of life s inescapable downpours
