V. Titow, 2012-12-06 This book originated from my Publisher's request for a new concise account of PVC plastics in terms of their nature properties processing and applications There is thus inevitably an extensive thematic overlap with my still relatively recent PVC Technology 4th edition and I have drawn liberally on that source for a substantial amount of relevant basic material However the present book is by no means merely an abridgement of the earlier one whilst indeed considerably shorter it is not only comparable in scope and general coverage of the subject but also contains much new information I have made a point of again strongly featuring the numerous standards relevant and in many cases cardinal to the testing and characterisation of PVC materials and products and to the evaluation of their properties and performance these standards are an indispensable part of the technology of PVC plastics and nobody concerned with any aspect of this complex subject should fail to recognise that fact It is ever a pleasure to express appreciation and thanks where they are due I am grateful to Dipl Ing H E Luben of Brabender OHG Duisburg FRG not only for the up to date information he provided on Brabender equipment but also most particularly for his exceptionally friendly helpful attitude in all our contacts and for the trouble he took to make some illustrations and figures available in the form convenient for direct reproduction **Extrusion** Harold F.
