Ruminant formula for the future: nutrition or pathology Sylvie Andrieu, Helen Warren, 2023-09-04 In an ever changing market ruminant milk and meat production must continually develop cost effective ways to promote animal health performance and product safety Food safety and traceability as well as animal welfare are beginning to play key roles in consumer decisions However these deliverables can often increase already excessive production costs meaning that producers must look to new technologies such as nutritional solutions in order to maximise production efficiency The link between animal nutrition and health is well founded and now needs to be exploited further in order to ensure a progressive industry It is becoming clear that nutritional influences at pivotal stages in dairy and beef production can positively impact rumen and gut health and subsequently performance There has been particular focus on

transition period and antioxidant nutrition acknowledging the changing needs of the modern high producing animal The threat of mycotoxins highlights the issue of climate change and its impact on modern animal production Solutions are required that minimise or eliminate that threat if the issue is to remain and effective knowledge transfer initiatives must be integrated into all advisory services Ruminant formula for the future nutrition or pathology Elevating performance and health unites the relevant expertise of researchers from across the globe Pertinent topics such as calf management and cow lameness are discussed in conjunction with novel protocols aimed at the reduction of production pathologies and the promotion of rumen and gut health This book is aimed at nutritionists veterinarians consultants and animal producers as well as animal and biological science researchers and students **Clinical naturopathic medicine - eBook** Leah

Hechtman,2013-06-03 Clinical Naturopathic Medicine is a foundation clinical text integrating the holistic traditional principles of naturopathic philosophy with the scientific rigour of evidence based medicine EBM to support contemporary practices and principles The text addresses all systems of the body and their related common conditions with clear accessible directions outlining how a practitioner can understand health from a naturopathic perspective and apply naturopathic medicines to treat patients individually These treatments include herbal medicine nutritional medicine and lifestyle recommendations All chapters are structured by system and then by condition so readers are easily able to navigate the content by chapter and heading structure The content is designed for naturopathic practitioners and students both undergraduate and postgraduate levels and for medical and allied health professionals with an interest in integrative naturopathic medicine detailed coverage of naturopathic treatments provides readers with a solid understanding of the major therapeutic modalities used within naturopathic medicine each system is reviewed from both naturopathic and mainstream medical perspectives to correlate the variations and synergies of treatment only clinically efficacious and evidence based treatments have been included information is rigorously researched over 7500 references from both traditional texts and recent research papers the content skilfully bridges traditional practice and EBM to support confident practitioners within the current health care system Brief Existential Psychotherapy for Life Stress Massimo Biondi,2025-06-13 The book

presents a detailed description of brief existential psychotherapy BEP based on an articulated model integrating knowledge from existential psychotherapy psychobiology of human stress mind body techniques and principles of positive psychiatry and psychology BEP is conducted according to a pragmatic method centered on the view of one's existence analysis and response to critical life stress events designing a route of acceptance and search for meaning in life BEP does not substitute other psychotherapies or their indications It is born for the short term treatment of crises after severe life stress events such as deaths of loved ones losses divorce retirement personal or collective emotional traumas major violations of law and detention in jail with a particular emphasis on severe somatic diseases cancer myocardial infarction stroke degenerative diseases and other subacute or chronic conditions that change life's perspective The volume presents a methodology of BEP based on

traditional clinical psychopathology with a first step of medical and psychopathological assessment establishing a categorical and a dimensional diagnosis. Then subsequent steps are provided in a brief psychotherapy course with a more common format of 12-20 sessions, 1-hr duration. The issues and aims of treatment are transversal across different psychiatric diagnoses, meaning the intervention follows similar activity lines independently from the specific categorical diagnosis. The intervention is dedicated to people with existential suffering without psychopathological diagnosis too. Medical therapy and psychopharmacological treatment are given according to patient needs; there is no preclusion toward the integration between psychotherapy and psychopharmacotherapy as well as other techniques with evidence of efficacy. Moreover, in some cases appropriate psychopharmacotherapy consents to psychotherapy impossible otherwise. This volume will be an invaluable tool for psychotherapists, psychologists, psychiatrists, counselors, social workers, and other medical professionals.

Nursing Diagnosis Handbook - E-Book Betty J. Ackley, Gail B. Ladwig, Mary Beth Flynn Makic, 2016-01-27. Ackley's Nursing Diagnosis Handbook: An Evidence-Based Guide to Planning Care, 11th Edition, helps practicing nurses and nursing students select appropriate nursing diagnoses and write care plans with ease and confidence. This convenient handbook shows you how to correlate nursing diagnoses with known information about clients on the basis of assessment findings, established medical or psychiatric diagnoses, and the current treatment plan. Extensively revised and updated with the new 2015-2017 NANDA-I approved nursing diagnoses, it integrates the NIC and NOC taxonomies, evidence-based nursing interventions, and adult, pediatric, geriatric, multicultural, home care, and client/family teaching and discharge planning considerations to guide you in creating unique individualized care plans. Comprehensive up-to-date information on all the 2015-2017 NANDA-I nursing diagnoses so you stay in the know. UNIQUE: Provides care plans for every NANDA-I approved nursing diagnosis plus two unique care plans for Hearing Loss and Vision Loss. Includes pediatric, geriatric, multicultural, client/family teaching and discharge planning, home care, and safety interventions as necessary for plans of care. Presents examples of and suggested NIC interventions and NOC outcomes in each care plan. UNIQUE Care Plan Constructor on the companion Evolve website offers hands-on practice creating customized plans of care. 150 NCLEX exam-style review questions are available on Evolve. Promotes evidence-based interventions and rationales by including recent or classic research that supports the use of each intervention. Classic evidence-based references promote evidence-based interventions and rationales. Clear, concise interventions are usually only a sentence or two long and use no more than two references. Safety content emphasizes what must be considered to provide safe patient care. Step-by-step instructions show you how to use the Guide to Nursing Diagnoses and Guide to Planning Care sections to create a unique individualized plan of care. List of Nursing Diagnosis Index in back inside cover of book for quick reference. Three-column index is easy to use. Easy-to-follow sections I and II guide you through the nursing process and selecting appropriate nursing diagnoses. Alphabetical thumb tabs allow quick access to specific symptoms and nursing diagnoses.
