Handbook of Research on Cyber Crime and Information Privacy Cruz-Cunha, Maria Manuela,Mateus-Coelho, Nuno,2020-08-21 In recent years industries have transitioned into the digital realm as companies and organizations are adopting certain forms of technology

to assist in information storage and efficient methods of production This dependence has significantly increased the risk of cyber crime and breaches in data security Fortunately research in the area of cyber security and information protection is flourishing however it is the responsibility of industry professionals to keep pace with the current trends within this field The Handbook of Research on Cyber Crime and Information Privacy is a collection of innovative research on the modern methods of crime and misconduct within cyber space It presents novel solutions to securing and preserving digital information through practical examples and case studies While highlighting topics including virus detection surveillance technology and social networks this book is ideally designed for cybersecurity professionals researchers developers practitioners programmers computer scientists academicians security analysts educators and students seeking up to date research on advanced approaches and developments in cyber security and information protection **Choice** ,2007 Designing Social Research Norman Blaikie,Jan Priest,2019-01-15 Designing Social Research is a uniquely comprehensive and student friendly guide to the core knowledge and types of skills required for planning social research The authors organize the book around four major steps in social research focusing framing selecting and distilling placing particular emphasis on the formulation of research questions and the choice of appropriate logics of inquiry to answer them The requirements for research designs and proposals are laid out at the beginning of the book followed by a discussion of key design issues and research ethics Four sample research designs on environmental issues illustrate the role of research questions and the application of the four logics of inquiry and this third edition includes new material dedicated to social research in a digital networked age Fully revised and updated Designing Social Research continues to be an invaluable resource to demystify the research process for advanced undergraduate and graduate students Together with the authors Social Research Paradigms in Action and Blaikie s Approaches to Social Enquiry it offers social scientists an informative guide to designing social research **Effektive informationssökning på webben** Jonas Fransson,2007 *Computer Information Systems and Industrial Management* Khalid Saeed,Jiří Dvorský,2021-09-17 This book constitutes the proceedings of the 20th International Conference on Computer Information Systems and Industrial Management Applications CISIM 2021 held in E k Poland September 24 26 2021 The 38 papers presented together with 1 invited speech and 3 abstracts of keynotes were carefully reviewed and selected from 69 submissions The main topics covered by the chapters in this book are mobile and pervasive computing machine learning high performance computing image processing industrial management Additionally the reader will find interesting papers on computer information systems biometrics security systems and sensor network service The contributions are organized in the following topical sections biometrics and pattern recognition applications computer information systems and security industrial management and other applications machine learning and artificial neural networks modelling and optimization and others Chapter 24 A first step towards automated species recognition from camera trap images of mammals using AI in a European temperate forest is published open access under a CC BY license Creative

Commons Attribution 4.0 International License Particles Separation in Microfluidic Devices Takasi Nisisako, Naotomo Tottori, 2020-12-10 Microfluidic platforms are increasingly being used for separating a wide variety of particles based on their physical and chemical properties. In the past two decades many practical applications have been found in chemical and biological sciences including single cell analysis, clinical diagnostics, regenerative medicine, nanomaterials synthesis, environmental monitoring, etc. In this Special Issue we invited contributions to report state of the art developments in the fields of micro and nanofluidic separation, fractionation, sorting, and purification of all classes of particles including but not limited to active devices using electric, magnetic, optical, and acoustic forces; passive devices using geometries and hydrodynamic effects at the micro/nanoscale; confined and open platforms; label based and label free technology; and separation of bioparticles including blood cells, circulating tumor cells, live/dead cells, exosomes, DNA, and non bioparticles including polymeric or inorganic micro and nanoparticles, droplets, bubbles, etc. Practical devices that demonstrate capabilities to solve real world problems were of particular interest.

Camera Trapping Paul Meek, Peter Fleming, Guy Ballard, Peter Banks, Andrew Claridge, Jim Sanderson, Don Swann, 2014-11-20 Camera trapping in wildlife management and research is a growing global phenomenon. The technology is advancing very quickly providing unique opportunities for collecting new biological knowledge. In order for fellow camera trap researchers and managers to share their knowledge and experience the First International Camera Trapping Colloquium in Wildlife Management and Research was held in Sydney, Australia. Camera Trapping brings together papers from a selection of the presentations at the colloquium and provides a benchmark of the international developments and uses of camera traps for monitoring wildlife for research and management. Four major themes are presented: case studies demonstrating camera trapping for monitoring; the constraints and pitfalls of camera technologies; design standards and protocols for camera trapping surveys; and the identification, management, and analyses of the myriad images that derive from camera trapping studies. The final chapter provides future directions for research using camera traps. Remarkable photographs are included showing interesting, enlightening, and entertaining images of animals doing their thing.
