Ingegneria Gestionale Sapienza:

The Power of Algorithms Giorgio Ausiello, Rossella Petreschi, 2013-11-08 To examine analyze and manipulate a problem to the point of designing an algorithm for solving it is an exercise of fundamental value in many fields With so many everyday activities governed by algorithmic principles the power precision reliability and speed of execution demanded by users have transformed the design and construction of algorithms from a creative artisanal activity into a full fledged science in its own right This book is aimed at all those who exploit the results of this new science as designers and as consumers The first chapter is an overview of the related history demonstrating the long development of ideas such as recursion and more recent formalizations such as computability The second chapter shows how the design of algorithms requires appropriate techniques and sophisticated organization of data In the subsequent chapters the contributing authors present examples from diverse areas such as routing and networking problems Web search information security auctions and games complexity and randomness and the life sciences that show how algorithmic thinking offers practical solutions and also deepens domain knowledge The contributing authors are top class researchers with considerable academic and industrial experience they are also excellent educators and communicators and they draw on this experience with enthusiasm and humor This book is an excellent introduction to an intriguing domain and it will be enjoyed by undergraduate and postgraduate students in computer science engineering and mathematics and more broadly by all those engaged with algorithmic thinking

Teaching, Research and Academic Careers Daniele Checchi, Tullio Jappelli, Antonio Uricchio, 2022-08-12 This open access book evaluates research quality quality of teaching and the relationship between the two through sound statistical methods and in a comparative perspective with other European countries In so doing it covers an increasingly important topic for universities that affects university funding It discusses whether university evaluation should be limited to a single factor or consider multiple dimensions of research since academic careers teaching and awarding degrees are intertwined The chapters included in the book evaluate teaching and research also taking the gender dimension into account in order to understand where and when gender discrimination occurs in assessment Divided into five sections the book analyses the administrative data on the determinants of career completion of university students increasing precariousness of academic careers especially of young researchers methods designed to assess research productivity when co authorship and team production are becoming the standard practice and interrelations between students achievements and teachers careers driven by research assessment It brings together contributions from a large group of economists statisticians and social scientists working under a project sponsored by ANVUR the Italian agency for the evaluation of teaching and research of academic institutions From an international perspective the findings in this book are particularly interesting because despite low tuition costs tertiary education in Italy has relatively low enrolment rates and even lower completion rates compared to those in other European and American countries This book is of interest to researchers of the sociology of education

A View of Operations Research Applications in Italy, 2018 Mauro Dell'Amico, Manlio Gaudioso, Giuseppe Stecca, 2019-09-10 This book presents expert descriptions of the successful application of operations research in both the private and the public sector including in logistics transportation product design production planning and scheduling and areas of social interest Each chapter is based on fruitful collaboration between researchers and companies and company representatives are among the co authors The book derives from a 2017 call by the Italian Operations Research Society AIRO for information from members on their activities in promoting the use of quantitative techniques and in particular operations research techniques in society and industry A booklet based on this call was issued for the annual AIRO conference but it was felt that some of the content was of such interest that it deserved wider dissemination in more detailed form This book is the outcome It equips practitioners with solutions to real life decision problems offers researchers examples of the practical

application of operations research methods and provides Master s and PhD students with suggestions for research development in various fields

Design Tools and Methods in Industrial Engineering II Caterina Rizzi,Francesca Campana,Michele Bici,Francesco Gherardini,Tommaso Ingrassia,Paolo Cicconi,2021-12-01 This book gathers original papers reporting on innovative methods and tools in design modelling simulation and optimization and their applications in engineering design manufacturing and other relevant industrial sectors Topics span from advances in geometric modelling applications of virtual reality innovative strategies for product development and additive manufacturing human factors and user centered design engineering design education and applications of engineering design methods in medical rehabilitation and cultural heritage Chapters are based on contributions to the Second International Conference on Design Tools and Methods in Industrial Engineering ADM 2021 held on September 9 10 2021 in Rome Italy and organized by the Italian Association of Design Methods and Tools for Industrial Engineering and Dipartimento di Ingegneria Meccanica e Aerospaziale of Sapienza Universit di Roma Italy All in all this book provides academics and professionals with a timely overview and extensive information on trends and technologies in industrial design and manufacturing

Interdisciplinary Aspects of Information Systems Studies Alessandro D'Atri,Marco De Marco,Nunzio Casalino,2008-09-20 Chapters of this book offer a careful selection of the best contributions to the Italian Association for Information Systems ItAIS Annual Conference that took place in Venice San Servolo Island in October 2007 The main goal of this book is to disseminate academic knowledge both theoretical and pragmatic in the information systems community Recognizing the relevance of many different disciplines the book takes an interdisciplinary approach to the subject of information systems thus providing a comprehensive and current coverage of this important area ItAIS <http://www.itaiss.org> is the Italian chapter of the Association for Information Systems <http://www.aisnet.org> It was established in 2003 and has since been promoting the exchange of ideas experience and knowledge among both academics and professionals committed to the development management organization and use of information systems

Computational Intelligence Juan Julian Merelo,Agostinho Rosa,José M. Cadenas,António Dourado,Kurosh Madani,Joaquim Filipe,2015-11-30 The present book includes a set of selected extended papers from the sixth International Joint Conference on Computational Intelligence IJCCI 2014 held in Rome Italy from 22 to 24 October 2014 The conference was composed by three co located conferences The International Conference on Evolutionary Computation Theory and Applications ECTA the International Conference on Fuzzy Computation Theory and Applications FCTA and the International Conference on Neural Computation Theory and Applications NCTA Recent progresses in scientific developments and applications in these three areas are reported in this book IJCCI received 210 submissions from 51 countries in all continents After a double blind paper review performed by the Program Committee 15% were accepted as full papers and thus selected for oral presentation Additional papers were accepted as short papers and posters A further

selection was made after the Conference based also on the assessment of presentation quality and audience interest so that this book includes the extended and revised versions of the very best papers of IJCCI 2014 Commitment to high quality standards is a major concern of IJCCI that will be maintained in the next editions considering not only the stringent paper acceptance ratios but also the quality of the program committee keynote lectures participation level and logistics

strumenti per conoscere tutti i corsi di laurea scegliere con consapevolezza e mettersi alla prova con i test di ammissione Le università sono suddivise per regione e numerate progressivamente in modo da poterle reperire con facilità grazie all'indice geografico e all'indice delle università per classi di laurea Il volume completamente rivisto nella struttura consente di autovalutarsi grazie a un questionario di orientamento conoscere il percorso formativo universitario scoprire gli atenei regione per regione identificare grazie alle icone immediate i corsi di laurea con programmazione nazionale e locale simulare un test di ammissione completo di soluzione così da verificare la preparazione

Optimization and Decision Science: Operations Research, Inclusion and Equity Paola Cappanera, Matteo Lapucci, Fabio Schoen, Marco Sciandrone, Fabio Tardella, Filippo Visintin, 2023-07-15 This volume collects peer reviewed short papers presented at the Optimization and Decision Science conference ODS 2022 held in Florence Italy from August 30th to September 2nd 2022 organized by the Global Optimization Laboratory within the University of Florence and AIRO the Italian Association for Operations Research The book includes contributions in the fields of operations research optimization problem solving decision making and their applications in the most diverse domains Moreover a special focus is set on the challenging theme Operations Research inclusion and equity The work offers 30 contributions covering a wide spectrum of methodologies and applications Specifically they feature the following topics i Variational Inequalities Equilibria and Games ii Optimization and Machine Learning iii Global Optimization iv Optimization under Uncertainty v Combinatorial Optimization vi Transportation and Mobility vii Health Care Management and viii Applications This book is primarily addressed to researchers and PhD students of the operations research community However due to its interdisciplinary content it will be of high interest for other closely related research communities

Graphs and Combinatorial Optimization: from Theory to Applications Claudio Gentile, Giuseppe Stecca, Paolo Ventura, 2021-03-01 This book highlights new and original contributions on Graph Theory and Combinatorial Optimization both from the theoretical point of view and from applications in all fields The book chapters describe models and methods based on graphs structural properties discrete optimization network optimization mixed integer programming heuristics meta heuristics math heuristics and exact methods as well as applications The book collects selected contributions from the CTW2020 international conference 18th Cologne Twente Workshop on Graphs and Combinatorial Optimization held online on September 14 16 2020 The conference was organized by IASI CNR with the contribution of University of Roma Tre University Roma Tor Vergata and CNRS LIX and with the support of AIRO It is addressed to researchers PhD students and practitioners in the fields of Graph Theory Discrete Mathematics Combinatorial Optimization and Operations Research

Operations Research: Closing the Gap Between Research and Practice Massimo Di Francesco, Enrico Gorgone, Benedetto Manca, Simone Zanda, 2025-10-10 This book collects selected contributions of the Optimization and Decision Science ODS2024 International conference on the theme of Operations Research closing the gap between research and practice ODS2024 was held in Badesi Sardinia Italy 8 12 September 2024 and was organized by

AIRO the Italian Operations Research Society The book offers new and original contributions on operations research optimization decision science and prescriptive analytics from both a methodological and applied perspectives It provides a state of the art on problem models and solving methods to address a widely class of real world problems arising in different application areas such as logistics transportation energy management manufacturing health ICT and mobile networks and emergency disaster management In addition the scientific works collected in this book aim at providing significant contributions in the theme of a close connection between research and practice This book is aimed primarily at researchers and Ph D students in the Operations Research community However due to its interdisciplinary contents this book is of high interest also for students and researchers from other disciplines including artificial intelligence computer sciences finance mathematics and engineering as well as for practitioners facing complex decision making problems in logistics manufacturing production and services

Optimization and Decision Science Raffaele Cerulli, Mauro

Dell'Amico, Francesca Guerriero, Dario Pacciarelli, Antonio Sforza, 2022-01-03 This book collects selected contributions from the international conference Optimization and Decision Science ODS2020 which was held online on November 19 2020 and organized by AIRO the Italian Operations Research Society The book offers new and original contributions on optimization decisions science and prescriptive analytics from both a methodological and applied perspective using models and methods based on continuous and discrete optimization graph theory and network optimization analytics multiple criteria decision making heuristics metaheuristics and exact methods In addition to more theoretical contributions the book chapters describe models and methods for addressing a wide diversity of real world applications spanning health transportation logistics public sector manufacturing and emergency management Although the book is aimed primarily at researchers and PhD students in the Operations Research community the interdisciplinary content makes it interesting for practitioners facing complex decision making problems in the afore mentioned areas as well as for scholars and researchers from other disciplines including artificial intelligence computer sciences economics mathematics and engineering

Optimization in Artificial Intelligence and Data Sciences Lavinia Amorosi, Paolo Dell'Olmo, Isabella Lari, 2022-05-20 This book is addressed to

researchers in operations research data science and artificial intelligence It collects selected contributions from the first hybrid Optimization and Decision Science ODS2021 international conference on the theme Optimization and Artificial Intelligence and Data Sciences which was held in Rome 14 17 September 2021 and organized by AIRO the Italian Operations Research Society and the Department of Statistical Sciences of Sapienza University of Rome The book offers new and original contributions on different methodological optimization topics from Support Vector Machines to Game Theory Network Models from Mathematical Programming to Heuristic Algorithms and Optimization Methods for a number of emerging problems from Truck and Drone delivery to Risk Assessment from Power Networks Design to Portfolio Optimization The articles in the book can give a significant edge to the general themes of sustainability and pollution

reduction distributive logistics healthcare management in pandemic scenarios and clinical trials distributed computing scheduling and many others For these reasons the book is aimed not only at researchers in the Operations Research community but also for practitioners facing decision making problems in these areas and to students and researchers from other disciplines including Artificial Intelligence Computer Sciences Finance Mathematics and Engineering Mathematical Optimization for Efficient and Robust Energy Networks Natalia Selini Hadjidimitriou, Antonio Frangioni, Thorsten Koch, Andrea Lodi, 2021-03-19 This book presents a collection of energy production and distribution problems identified by the members of the COST Action TD1207 Mathematical Optimization in the Decision Support Systems for Efficient and Robust Energy Networks The aim of the COST Action was to coordinate the efforts of the experts in different fields from academia and industry in developing innovative tools for quantitative decision making and apply them to the efficient and robust design and management of energy networks The work covers three main goals to be a nimble while comprehensive resource of several real life business problems with a categorized set of pointers to many relevant prescriptive problems for energy systems to offer a balanced mix of scientific and industrial views to evolve over time in a flexible and dynamic way giving from time to time a more scientific or industrial or even political in a broad sense weighed perspective It is addressed to researchers and professionals working in the field
