The Author Training Manual Nina Amir, 2014-03-18 If you want to write a book that's going to sell to both publishers and readers you need to know how to produce a marketable work and help it become successful. It starts the moment you have an idea. That's when you begin thinking about the first elements of the business plan that will make your project the best it can be. The reality is that you don't want to spend time and energy writing a book that will never get read. The way to avoid that is to create a business plan for your book and evaluate it and yourself through the same lens that an agent or acquisitions editor would. The Author Training Manual will show you how to get more creative and start looking at your work with those high standards in mind. Whether you're writing fiction or non-fiction or intend to publish traditionally or self-publish, author Nina Amir will teach you how to conduct an effective competitive analysis for your work and do a better job at delivering the goods to readers than similar books that are already on the shelf. Packed with step-by-step instructions, idea evaluations, sample business plans, editor and agent commentaries, and much more, The Author Training Manual provides the information you need to transform from aspiring writer to career author.

[Introduction to Webometrics](#) Michael Thelwall, 2022-05-31 Webometrics is concerned with measuring aspects of the web: web sites, web pages, parts of web pages, words in web pages, hyperlinks, web search engine results. The importance of the web itself as a communication medium and for hosting an increasingly wide array of documents from journal articles to holiday brochures needs no introduction. Given this huge and easily accessible source of information, there are limitless possibilities for measuring or counting on a huge scale: e.g. the number of web sites, the number of web pages, the number of blogs, or on a smaller scale: e.g. the number of web sites in Ireland, the number of web pages in the CNN web site, the number of blogs mentioning Barack Obama before the 2008 presidential campaign. This book argues that it can be useful for social scientists to measure aspects of the web and explains how this can be achieved on both a small and large scale. The book is intended for social scientists with research topics that are wholly or partly online: e.g. social networks, news, political communication, and social scientists with offline research topics with an online reflection, even if this is not a core component: e.g. diaspora communities, consumer culture, linguistic change. The book is also intended for library and information science students in the belief that the knowledge and techniques described will be useful for them to guide and aid other social scientists in their research. In addition, the techniques and issues are all directly relevant to library

and information science research problems Table of Contents Introduction Web Impact Assessment Link Analysis Blog Searching Automatic Search Engine Searches LexiURL Searcher Web Crawling SocSciBot Search Engines and Data Reliability Tracking User Actions Online Advanced Techniques Summary and Future Directions [A Practical Guide to Fedora and Red Hat Enterprise Linux](#) Mark G.
