　　 Reforming the Malawian Public Sector Richard Tambulasi,2010-06-01 Reforming the Malawian Public Sector argues that the new public management model that Malawi like most African countries adopted under the influence of donor organisations has not led to the intended development The book examines decentralisation performance contracting and publicprivate partnerships as key aspects of the reforms and comes to the conclusion that at best it can be argued that the failures have been due to poor implementation and this could be attributed to the fact that the process was led by donors who lacked the necessary institutional infrastructure The book uses the 2005 6 fertiliser subsidy programme which the government embarked on despite donor resistance that it went against market models but which turned out to be overwhelmingly successful to demonstrate the states developmental ability and potential This volume is essential reading for academics students and practitioners seeking a deeper understanding of public administration management policy development and governance in Africa and the rest of the developing world The book is dedicated to the memory Guy Mhone a Malawian who was among Africas leading scholars in public administration and governance His works focused mainly on public sector reforms and development **The Politics of Public Sector Performance** Michael Roll,2014-01-10 It is widely believed that the state in developing countries is weak The public sector in particular is often regarded as corrupt and dysfunctional This book provides an urgently needed corrective to such overgeneralized notions of bad governance in the

developing world It examines the variation in state capacity by looking at a particularly paradoxical and frequently overlooked phenomenon effective public organizations or pockets of effectiveness in developing countries Why do these pockets exist How do they emerge and survive in hostile environments And do they have the potential to trigger more comprehensive reforms and state building This book provides surprising answers to these questions based on detailed case studies of exceptional public organizations and state owned enterprises in Africa Asia the Caribbean Latin America and the Middle East The case studies are guided by a common analytical framework that is process oriented and sensitive to the role of politics The concluding comparative analysis develops a novel explanation for why some public organizations in the developing world beat the odds and turn into pockets of public sector performance and service delivery while most do not This book will be of strong interest to students and scholars of political science sociology development organizations public administration public policy and management **Routledge Handbook of Civil and Uncivil Society in Southeast Asia** Eva Hansson,Meredith L. Weiss,2023-02-28 The Routledge Handbook of Civil and Uncivil Society in Southeast Asia explores the nature and implications of civil society across the region engaging systematically with both theoretical approaches and empirical nuance for a systematic comparative and informative approach The handbook actively analyses the varying definitions of civil society critiquing the inconsistent scrutiny of this sphere over time It brings forth the need to reconsider civil society development in today s Southeast Asia including activist organisations and platforms composition claims resources and potential to effect sociopolitical change Structured in five parts the volume includes chapters written by an international set of experts analysing topics relating to civil society Spaces and platforms Place within politics Resources and tactics Identity formation and claims Advocacy The handbook highlights the importance of civil society as a domain for political engagement outside the state and parties across Southeast Asia as well as the prevalence and weight of uncivil dimensions It offers a well informed and comprehensive analysis of the topic and is an indispensable reference work for students and researchers in the fields of Asian Studies Asian Politics Southeast Asian Politics and Comparative Politics The Open Access version of this book available at www taylorfrancis com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license Funded by The Research Foundation for State University of New York USA and The Stockholm Center for Global Asia Sweden **Strengthening Local Governance in Bangladesh** Shuvra Chowdhury,Pranab Kumar Panday,2018-02-23 This book explores the impact of Bangladesh s Local Government Act of 2009 on the functioning of the local governments or Union Parishads UP with a particular emphasis on people s participation and accountability Throughout the chapters the authors review the existing legal framework of UP and its relation to social accountability examine how much of the social participation is spontaneous and how much is politically induced question the success of the Citizen s Charter and Right to Information acts as mechanisms for social accountability and present suggestions to remedy some of the problems facing people s participation and accountability in the UP This book

fills existing gaps in the discourse by adding new information to the literature on development research and legal reforms in Bangladesh specifically in how those legal reforms have led to strengthening or weakening people s participation in local government The target audience for this book are students and researchers in Asian studies international development studies and public administration as well as practitioners working in the local governments discussed   Decentralizing Governance G. Shabbir Cheema,Dennis A. Rondinelli,2007-08-01 The trend toward greater decentralization of governance activities now accepted as commonplace in the West has become a worldwide movement This international development largely a product of globalization and democratization is clearly one of the key factors reshaping economic political and social conditions throughout the world Rather than the top down centralized decisionmaking that characterized communist economies and Third World dictatorships in the twentieth century today s world demands flexibility adaptability and the autonomy to bring those qualities to bear In this thought provoking book the first in a new series on Innovations in Governance experts in government and public management trace the evolution and performance of decentralization concepts from the transfer of authority within government to the sharing of power authority and responsibilities among broader governance institutions This movement is not limited to national government it also affects subnational governments NGOs private corporations and even civil associations The contributors assess the emerging concepts of decentralization e g devolution empowerment capacity building and democratic governance They detail the factors driving the movement including political changes such as the fall of the Iron Curtain and the ascendance of democracy economic factors such as globalization and outsourcing and technological advances e g increased information technology and electronic commerce Their analysis covers many different contexts and regions For example William Ascher of Claremont McKenna College chronicles how decentralization concepts are playing out in natural resources policy while Kadmeil Wekwete United Nations outlines the specific challenges to decentralizing governance in sub Saharan Africa In each case contributors explore the objectives of a decentralizing strategy as well as the benefits and difficulties that will likely result   **Policy Making and Implementation** Ronald James May,2009-09-01 There is a vast literature on the principles of public administration and good governance and no shortage of theoreticians practitioners and donors eager to push for public sector reform especially in less developed countries Papua New Guinea has had its share of public sector reforms frequently under the influence of multinational agencies and aid donors Yet there seems to be a general consensus both within and outside Papua New Guinea that policy making and implementation have fallen short of expectations that there has been a failure to achieve good governance This volume which brings together a number of Papua New Guinean and Australian based scholars and practitioners with deep familiarity of policy making in Papua New Guinea examines the record of policy making and implementation in Papua New Guinea since independence It reviews the history of public sector reform in Papua New Guinea and provides case studies of policy making and implementation in a number of areas including the economy agriculture

mineral development health education lands environment forestry decentralization law and order defence women and foreign affairs privatization and AIDS Policy is continuously evolving but this study documents the processes of policy making and implementation over a number of years with the hope that a better understanding of past successes and failures will contribute to improved governance in the future **Managing Development in a Globalized World** Habib Zafarullah,Ahmed Shafiqul Huque,2017-09-25 Traditionally development has been rooted in ideologies and assumptions prevalent in the developed world and in practices and strategies adopted by leading industrial nations However historically eclectic ideas and approaches often clash with existing long established notions of progress and modes of realizing social and economic change Managing Development in a Globalized World Concepts Processes Institutions explores this topic by incorporating ideas and interpretations that have previously been neglected or given inadequate attention in the discourse on developing countries It underscores development as a continuous process that must be supported by sound policies and efficient management supplying a wider understanding of the field The authors argue that the application of innovative development techniques and best practices is essential for obtaining optimum results in meeting the needs of society They examine the style of managing development with a new perspective that links the phenomenon with changing demands and the interplay of internal external actors and a host of stakeholders An exploration of key sectors in development provides clear comprehension of problems and solutions A careful synthesis of theoretical conceptual and empirical literature the book assesses real world situations and provides insight into the operational dynamics of development policies programs and institutions It focuses on goals values and dynamics of development management that are undergoing rapid changes and continue to be enhanced to alleviate poverty and improve living standards in an era of globalization and inter regional and inter institutional synergies It highlights best practices essential for the efficient and effective delivery of human development services that are designed and put in place to obtain optimum results in meeting the needs of society *The Changing Role of Government* R. Batley,G. Larbi,2004-05-25 Batley and Larbi examine how governments of developing countries are organized to deliver public services The book is based on comparative international studies of four service sectors Health care urban water business promotion and agricultural marketing Governments everywhere are being driven to adopt an indirect approach managing contracting and regulating public agencies or private partners rather than providing services directly It questions how governments are responding and whether this approach is appropriate to the capacities of developing countries **The Conundrum of Corruption** Michael Johnston,Scott Fritzen,2020-12-30 This book argues that it is time to step back and reassess the anti corruption movement which despite its many opportunities and great resources has ended up with a track record that is indifferent at best Drawing on many years of experience and research the authors critique many of the major strategies and tactics employed by anti corruption actors arguing that they have made the mistake of holding on to problematical assumptions ideas and strategies rather than addressing the power imbalances that enable

and sustain corruption The book argues that progress against corruption is still possible but requires a focus on justice and fairness considerable tolerance for political contention and a willingness to stick with the reform cause over a very long process of thoroughgoing sometimes discontinuous political change Ultimately the purpose of the book is not to tell people that they are doing things all wrong Instead the authors present new ways of thinking about familiar dilemmas of corruption politics contention and reform These valuable insights from two of the top thinkers in the field will be useful for policymakers reform groups grant awarding bodies academic researchers NGO officers and students
