Governance of Marine Fisheries and Biodiversity Conservation Serge M. Garcia, Jake Rice, Anthony Charles, 2014-07-15

Governance of Marine Fisheries and Biodiversity Conservation explores governance of the world's oceans with a focus on the impacts of two inter-connected but historically separate streams of governance one for fisheries the other for biodiversity conservation Chapters most co-authored by leading experts from both streams investigate the interaction of these governance streams from ecological economic social and legal perspectives with emphasis on policies institutions processes and outcomes on scales from the global to the local community and with coverage of a range of themes and regions of the world The book opens with chapters setting the historical context for the two marine governance streams and framing the book's exploration of whether as the streams increasingly interact there will be merger or collision convergence or co evolution The concluding chapter synthesizes the insights from throughout the book relative to the questions posed in the opening chapters It also draws conclusions about future needs and directions in the governance of marine fisheries and biodiversity vital to the future of the world's oceans With cutting edge chapters written by many leading international experts in fisheries management and biodiversity conservation and edited by three leading figures in this crucially important subject Governance of Marine Fisheries and Biodiversity Conservation is an essential purchase for fisheries scientists economists resource managers and policymakers and all those working in fields of biodiversity conservation marine ecology and coastal livelihoods Libraries in all universities and research establishments where environmental and or marine studies conservation ocean policy and law biological and life sciences and fisheries management are studied and taught should have copies of this most important book

Environmental Governance and Common Pool Resources Michael Faure, Peter Mascini, Jing Liu, 2017-09-07 This book analyses the drivers of specific common pool resource problems particularly in fisheries and forestry examining the way in which private and public regulation have intervened to fight the common pool resource problem by contributing to the establishment and maintenance of property rights It focuses on the various forms of regulation that have been put in place to protect fisheries and forestry over the past decades both from a theoretical as well as from a policy perspective comparing the concrete interaction of legal and policy instruments in eight separate jurisdictions

International Law for Small-Scale Fisheries Julia N. Nakamura, 2025-03-27 This book provides an original and groundbreaking account of the applicability and key contributions of international law to small scale fisheries a fisheries subsector that has been historically overlooked by governments and international legal scholarship Small scale fisheries constitute most of the world's capture fisheries workforce they sustain the livelihoods of fishers and their communities while building and transmitting traditional knowledge and culture Significant attention has been given to small scale fisheries by the international community over the past decade building the momentum for dedicated research on such a topic Nevertheless the literature examining small scale fisheries from an international legal perspective remains scarce This book

fills this gap by systemically examining different international legal regimes to unravel the normative foundations for securing the meaningful participation of small scale fisheries peoples in international fisheries management. It connects the ecosystem approach, a key principle of international fisheries law and the human rights regime to elucidate the benefits that participatory international fisheries management brings to enhance both the ecological and social aspects of fisheries sustainability. It also examines the extent to which fisheries governance is democratic and provides an enabling framework for the integration of fishers' knowledge into international fisheries management. It is thereby oriented toward more justice and fair outcomes for small scale fisheries. This book will be a valuable resource for academics and researchers with an interest in the governance of fisheries in international law, the law of the sea, environmental law and human rights law as well as to practitioners and policymakers working on the development and implementation of laws and policies governing fisheries and natural resources.

Rethinking Fisheries Governance Hoang Viet Thang, 2017-08-11. This book explores how the state can foster collective action by fisher's communities in fisheries management. It presents a different perspective from Elinor Ostrom's classic work on the eight institutional conditions that foster collective action in natural resource management and instead emphasizes the role of the state in fisheries co-management, engaging a state-centric notion of meta-governance. It argues that first the state is required to foster collective action by fishers and secondly that the current fisheries co-management arrangements are state-centric. The study develops these arguments through the analysis of three case studies in Japan, Vietnam and Norway. The author also makes a theoretical contribution to governance literature by developing Ostrom's society-centric framework in a way which makes it more amenable to the analysis of state capacity and government intervention in a comparative context. This book will appeal to students and scholars of global governance, fisheries management, co-management and crisis management as well as practitioners of fisheries management.

Governing Marine Living Resources in the Polar Regions Nengye Liu, Cassandra M. Brooks, Tianbao Qin, 2019. Bringing together leading scholars from across a diverse range of disciplines, this unique book examines a key question: How can we best conserve marine living resources in the polar regions where climate change effects and human activities are particularly pressing?

Area-Based Management Tools and Marine Fisheries Serge Michel Garcia, Jake Rice, 2024-09-20. This book provides a comprehensive review of Area Based Management Tools (ABMTs) used in fisheries or affecting their performance in relation to biodiversity and related socio-economic issues. The prologue provides historical, mystic, philosophical, political, economic and ecological points of view of ocean space since antiquity. The book describes the modern background of ABMTs, their role in living in harmony with nature, their human dimensions, their governance, the tensions they face, the role of the United Nations Convention on the Law of the Sea (UNCLOS) and that of the United Nations and other global policy frameworks. ABMTs are described thusly: definition, human dimensions, goals and objectives, old and new roles, possible typologies, tensions, synergies and complementarities, trade offs and effectiveness and related factors. Pathways to reduce

tensions mobilize synergies and increase effectiveness are described The perspectives offered are illustrated by a few case studies including an industry view [Report of the FAO Virtual Expert Workshop on the Toolbox for Fisheries Co-management Evaluation](#) Food and Agriculture Organization of the United Nations,2021-09-17 The FAO Virtual Expert Workshop on the Toolbox for Fisheries Co management was held on 24 26 and 28 May 2021 using the Zoom platform to finalize the outline and contents of the Toolbox for Fisheries Co management Evaluation and to find out what tools are available for evaluating fisheries co management effectiveness Twenty one participants attended the Workshop 11 experts 2 FAO observers and 8 FAO secretariat members During the Workshop the drafts of the Toolbox and the Guidebook for Evaluating Fisheries Co management Effectiveness were presented The experts were invited to advice on tools and reference materials to perform the evaluation process envisaged in the Guidebook The experts inputs and recommendations received on best practices indicators examples of approaches for measuring the indicators suggested tools and resources will be employed to improve the Toolbox and the Guidebook **Ocean Governance** Stefan Partelow,Maria Hadjimichael,Anna-Katharina Hornidge,2023-03-01 This Open Access book on Ocean Governance examines sustainability challenges facing our oceans today The book is organized into three sections knowledge systems policy foundations and thematic analyses The knowledge produced in the book was catalyzed by the scientific outcomes within the European funded Cooperation in Science and Technology COST network Ocean Governance for Sustainability Challenges Options and the Role of Science This network brings together scientists policy makers and civil society representatives from 28 nation states to cooperate on ocean governance research This book offers a compilation of new research material including focused case studies broad policy syntheses and reflective chapters on the history and current status of knowledge production systems on ocean governance New research material is presented although some chapters draw on secondary sources The book starts with synthetic review chapters from the editors outlining past and present knowledge systems addressing how and why ocean governance for sustainability is where it currently stands with critical reflections on existing narratives path dependencies and colonialist histories This is followed by chapters addressing synthesizing and analyzing different legal and policy frameworks for ocean governance both regionally and internationally At the core of the book are the thematic analyses which provide focused case studies with detailed contextual information in support of different ocean governance challenges and sustainability pathways around the world The book concludes with a chapter explicitly targeting students researchers and policy makers with key take away messages compiled by the editors [Breakthroughs in Fisheries and Aquaculture](#) Gaurav Shekhar,2025-02-20 Breakthroughs in Fisheries and Aquaculture Genetics and Biotechnology is a groundbreaking exploration into the dynamic and evolving world of aquatic science This comprehensive book presents the latest developments innovations and sustainable practices in fisheries and aquaculture serving as an essential resource for researchers practitioners and enthusiasts Delve into cutting edge research with insights into emerging technologies

Governing the Coastal Commons Derek Armitage,Anthony Charles,Fikret Berkes,2017-04-28 Coastal communities depend on the marine environment for their livelihoods but the common property nature of marine resources poses major challenges for the governance of such resources Through detailed cases and consideration of broader global trends this volume examines how coastal communities are adapting to environmental change and the attributes of governance that foster deliberate transformations and help to build resilience of social and ecological systems Governance here reflects how communities societies and organisations e g fisher cooperatives government agencies choose to organise themselves to make decisions about important issues such as the use and protection of coastal commons e g fishery resources The book shows how a governance approach generates insights into the specific forms and arrangements that enable coastal communities to steer away from unsustainable pathways It also provides an analytical lens to consider important questions of power knowledge and legitimacy in linked social ecological systems Chapters highlight examples in which communities are engaging in deliberative transformations to build resilience and enhance their well being These transformations and efforts to build resilience are emerging through multi level collaboration shared learning innovative policies and institutional arrangements such as new property rights regimes and co management methodologies that engage with indigenous cultural practices and entrepreneurial activities including income and livelihood diversification Case studies are included from a range of countries including Canada Japan Brazil Indonesia Mexico South Africa Thailand the South Pacific and Europe The authors integrate theory with practical examples to improve coastal marine policy and governance and draw upon emerging concepts from social ecological resilience and transformations adaptive governance and the scholarship on the commons

High Seas Governance Robert C. Beckman,Millicent McCreath,J. Ashley Roach,Zhen Sun,2018-11-26 High Seas Governance Gaps and Challenges identifies gaps in and challenges to the existing legal regime in the protection and preservation of the marine environment of the high seas including sensitive marine areas The gaps identified in the book include the failure of liability and compensation schemes to cover pollution of the high seas and the fact that no state has the responsibility to clean up pollution of the high seas One common theme of the book is that it is necessary to identify a state other than flag states port states or coastal states which should have an obligation to exercise

jurisdiction and control over certain activities on the high seas *A Research Agenda for Sustainable Ocean Governance* Justin Alger,U. R. Sumaila,2025-03-12 This prescient Research Agenda explores innovative and interdisciplinary pathways forward for ocean governance Justin Alger and U Rashid Sumaila bring together an international array of expert authors providing a roadmap for shaping ocean governance across the globe to achieve long term sustainability This title contains one or more Open Access chapters **Towards Legal, Sustainable and Equitable Wildlife Trade** Tien Ming Lee,Amy Hinsley,Miguel Pinedo Vasquez,Yan Zeng,2022-07-18 *World Ocean Assessment* Alan Simcock,2017-04-17 This United Nations report examines the current state of knowledge of the world s oceans for policymakers and provides a reference for marine science courses *Legislating for an ecosystem approach to fisheries - Revisited* Food and Agriculture Organization of the United Nations,2021-09-23 The ecosystem approach to fisheries EAF is a risk based management process for the planning management development regulation and monitoring of fishing and fishing related activities EAF addresses ecological consequences of fishing as well as social economic and institutional aspects of fisheries sustainability Adequate legislation and regulatory frameworks are key to successful implementation of the EAF The continuous review and update of information on legislation and regulatory instruments require the analysis of existing legal frameworks at all levels of governance to assess whether they remain in force valid and aligned with international fisheries law standards including the EAF The present work was prepared with a view to provide current information on how the EAF is being implemented through national legal frameworks of selected countries in Africa It revisits a previous legal study prepared by Anniken Skonhøft and published by FAO in 2011 A decade later based on the scope of that study the present work provides updated data and contributes to the knowledge on the current global and regional legal frameworks for an EAF which are vital for EAF implementation purposes This update also re analysed certain countries national legislation and their evolution with respect to capturing the EAF requirements Ultimately the present work supports the legal implementation of an EAF for a holistic integrated and innovative way of managing fisheries that promotes the participation of all relevant stakeholders and the use of best available knowledge for decision making whilst balancing the human dimensions with the care for the environment habitats ecosystems and biodiversity related with fishery resources on which they depend Marine Protected Areas Economics, Management and Effective Policy Mixes OECD,2017-06-05 Intense exploitation of our oceans and seas is degrading marine biodiversity and ecosystems at an alarming rate This report presents good practice insights for effectively managing marine protected areas MPAs one of the policy instruments available for the conservation and sustainable Sustainable Fishery Systems Anthony Charles,2023-06-20 SUSTAINABLE FISHERY SYSTEMS An up to date and interdisciplinary guide to sustainable fisheries Fisheries whether small scale or large scale are filled with complexity and uncertainty Making the right decisions to successfully manage fisheries for sustainability and resilience requires a systems approach including both natural and human elements and their many interactions To understand fisheries and how they

change over time a diverse range of fishery knowledge must be brought together Sustainable Fishery Systems 2nd edition meets these needs The new edition provides essential information that can be readily applied within government community industrial academic and research settings Sustainable Fishery Systems 2nd edition retains the first edition s emphasis on themes such as sustainability resilience uncertainty complexity and conflict and expands its treatment of topics that have since the first edition s publication become crucial to consider in the field of fisheries As a result readers will find Updated and expanded coverage of topics including coastal conservation ecosystem based management co management community based management and more New chapters covering connections between fisheries and marine protected areas biodiversity conservation climate and fisheries and multi sectoral management A more detailed introduction to the systems perspective of fisheries reflecting the substantial growth in that subject s importance and covering in detail the natural human and governance aspects of fisheries Sustainable Fishery Systems 2nd edition is an indispensable interdisciplinary resource for educators researchers government agencies and fisheries managers

The Law of the Sea Nele Matz-Lück, Øystein Jensen, Elise Johansen, 2022-09-19 The United Nations Convention on the Law of the Sea follows a comprehensive approach and can be interpreted dynamically to include the regulation of all potential human uses of the ocean but the law of the sea cannot be viewed in isolation from other fields of international law International law does not resemble a hierarchically structured legal system its different parts interact when different rules address the same activity or situation The academic discussion concerning the specialization and proliferation of international legal rules and dispute settlement bodies has theoretical as well as practical relevance for the law of the sea and its interaction with other parts of international law The intensified use of the oceans for different purposes and the ongoing proliferation of international rules addressing different activities from different perspectives and with distinct foci require a more thorough evaluation of how the law of the sea relates to other fields of international law how the normative context can be approached theoretically and if interdisciplinary interfaces can be adequately addressed This book discusses the normative context of the law of the sea and the interactions of the law of the sea with other legal regimes By connecting high quality research with new ideas and perspectives this book offers expertise from different fields and perspectives in which the interaction between the law of the sea and other fields of international law becomes particularly relevant

Interactive Governance for Small-Scale Fisheries Svein Jentoft, Ratana Chuenpagdee, 2015-05-30 Drawing on more than 30 case studies from around the world this book offers a multitude of examples for improving the governance of small scale fisheries Contributors from some 36 countries argue that reform transformation and innovation are vital to achieving sustainable small scale fisheries especially for mitigating the threats and vulnerabilities of global change For this to happen governing systems must be context specific and the governability of small scale fisheries properly assessed The volume corresponds well with the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries adopted in 2014 spearheaded by the United Nations Food and Agriculture

Organization FAO These affirm the importance of small scale fisheries for food security nutrition livelihoods rural development and poverty reduction The book arises from the project Too Big To Ignore Global Partnership for Small Scale Fisheries Research TBTI A nuanced diverse vibrant and local specific collection of essays just as the small scale fisheries around the world dealt with by this versatile array of authors Following on the heels of the recently adopted FAO Small Scale Fisheries Guidelines here is an erudite compendium which I heartily recommend to policy makers academics and activists who wish to come to terms with the complex issue of governance of this important field of human activity John Kurien Founding Member of the International Collective in Support of Fishworkers ICSF and Former Professor Centre for Development Studies Trivandrum India Likely to become a classic in its field this book is about small scale fisheries and interactive governance governance which is negotiated deliberated upon and communicated among stakeholders who often share governing responsibilities The authors show that interactive governance is not just a normative theory but a phenomenon that can be studied empirically here with 34 case studies from as many countries around the world north and south east and west Such force of example enables the editors to put together well developed arguments and sometimes surprising conclusions about the way ahead A must read for managers practitioners stakeholders and students Fikret Berkes University of Manitoba Canada and author of Coasts for People

Sustainable Fisheries Management and

International Law Abdullah-Al Arif,2021-12-30 This book presents a comprehensive analysis of the legal and policy frameworks for marine fisheries management and examines the efficiency of the institutions responsible for the formulation implementation and enforcement of marine fisheries laws and policies in Bangladesh Sustainable management of marine fisheries is a complex multi dimensional and multi stakeholder process that entails sustainable use of marine living resources and conservation of marine biodiversity Offering a critical analysis to these frameworks that play a crucial role in the conservation and management of fish stocks in areas within and beyond national jurisdiction this book examines inadequacies and implementation gaps in the legislative policy and institutional frameworks that contribute to the unsustainable exploitation of marine fish stocks in Bangladesh It recommends law and policy reform for conservation and sustainable management of marine fisheries in Bangladesh and the Bay of Bengal
