Principles Of IPR Dr. P. Tharmaraj, Dr. J. Shakina, 2023-02-27 Brands, inventions, designs and other works in which an individual or company has exclusive legal rights in India are all examples of intellectual property (IP). As a corporate asset, intellectual property is held by almost every company. The creator of an original and useful creation should be afforded legal protections for his or her efforts. To secure exclusive control over their discoveries, inventors might register them as the intellectual properties via the filing of an intellectual property application. Industrial property refers to the protection of industrial designs, patents and trademarks, whereas copyright refers to the protection of literary compositions, musical creations, artistic creations etc. Hence the exclusive rights granted to the inventor or creator are an integral part of the right to safeguard intellectual property. The term intellectual property rights refers not to the creation but to the legal protections afforded to the author. Knowing what intellectual property rights are and how they are safeguarded is essential. Trademarks, reprint rights, trade secrets, patents and designs are all protected under India's system of intellectual property rights. IPRs are explored in this book. Many types of property and creative output are under the scope of intellectual property.

Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 **Green Chemistry** Dr. P. Tharmaraj, Dr. J. Shakina, Dr. R. Sujatha, Dr. L. Alphonse, Misuse of chemistry such as the manufacturing of nonbiodegradable materials and the discharge of pollutants and poisonous compounds has harmed the environment and all forms of life including people. It is now clear that chemical science has to change its focus from exploiting finite resources and producing ever greater quantities of products that end up as waste to using chemistry to meet human needs in ways that do not compromise the health of the planet's life sustaining ecosystems. Fortunately, environmental friendliness, resource sustainability are becoming more important in the practice of the chemical science and business. Green chemistry is the term given to a method of chemistry that optimizes its advantages while eliminating or significantly decreasing its harmful aspects. Green chemistry, green chemical engineering aim to reduce waste and the production or use of especially hazardous materials by modifying or reimagining chemical goods and processes. Those that practice green chemistry take personal

responsibility for the impact their chemicals and procedures have on the environment To the contrary green chemistry seeks to boost profits and encourage innovation while safeguarding human health and the environment making it anything but an economic drag This accessible book covers a wide range of topics related to sustainable and environmentally friendly chemistry from a scientific technological and policy perspective With the goal of promoting global learning contemplation and scaling up action through a shared understanding of the notion it explores many aspects of the issue **Automobile Trade Solved Papers** YCT Expert Team , 2023 24 RRB ALP ISRO Automobile Trade Solved Papers *Industrial Water And Wastewater Treatment* Dr. P. Innovation Ecosystem: An Indian and Global Perspective Kashmir Singh, Nirmala Chongtham, Radhika Trikhya, Mamta Bhardwaj, Sukhdeep Kaur, 2024-07-22 Science Technology and Innovation STI are the key drivers of the economy and development of a country. The economic and social impacts of STI require a deep understanding of the STI ecosystem which includes the interactions between actors, their technologies and their business models. This book *Science Technology and Innovation Ecosystems: A National and Global Perspective* focuses on the STI ecosystem of India in comparison to other innovation backed global countries. It will include a study of the entire STI ecosystem focusing on the system interconnectedness required for strengthening it. The building of interconnection within actors of the STI ecosystem is one of the paramount requirements to reinvigorate the STI ecosystem as a whole. The book will also present the crucial role of STI in bringing socio-economic development from a national and international perspective. It addresses the development of viable solutions for a sustainable future and a positive societal transformation with the help of innovative science-based approaches. This book showcases the future of science in terms of emerging frontier and strategic technologies giving us a snapshot of future STI efforts worldwide. Emphasis is given to the policy directives and program interventions backed by evidence to revamp the STI system by addressing the societal and economic needs of the country. The book will strategically bring the concept of the relevance of the Intellectual Property (IP) ecosystem in building the country's innovation capacity along with specific pieces of evidence on how the IP system should be roped in to bring higher innovation efficiency. An insight is provided to chart out the pathway for creating a knowledge-based economy focusing on knowledge production to knowledge consumption through knowledge diffusion.
