Halfway To Anywhere Achieving Americas Destiny In Space:

Halfway to Anywhere G. Harry Stine, 1998 Halfway to Anywhere tells the story of the development and future potential of the reusable Single Stage To Orbit SSTO spaceship a spaceship NASA bureaucrats once said was impossible But an experimental rocket the DC X was built in twenty two months with a tiny government contract and parts scrounged from space junk yards and Wal mart The DC X first flew in 1993 and was repeatedly flown and tested until 1995 it proved the concepts of reusability and quick turnaround like an airliner SSTO means economical reliable on demand space transportation of people and cargos to and from low Earth orbit within a decade Commercial spaceships that operate like airliners are possible and profitable and Halfway to Anywhere tells how and why *Single Stage to Orbit* Andrew J. Butrica, 2004-12-01 Winner of the Michael C Robinson Prize for Historical Analysis given by the National Council on Public History While the glories and tragedies of the space shuttle make headlines and move the nation the story of the shuttle forms an inseparable part of a lesser known but no less important drama the search for a reusable single stage to orbit rocket Here an award winning student of space science Andrew J Butrica examines the long and tangled history of this ambitious concept from its first glimmerings in the 1920s when technicians dismissed it as unfeasible to its highly expensive heyday in the midst of the Cold War when conservative backed government programs struggled to produce an operational flight vehicle Butrica finds a blending of far sighted engineering and heavy handed politics To the first and oldest idea that of the reusable rocket powered single stage to orbit vehicle planners who belonged to what President Eisenhower referred to as the military industrial complex added experimental X aircraft like capabilities and eventually a faster cheaper smaller managerial approach Single Stage to Orbit traces the interplay of technology corporate interest and politics a combination that well served the conservative space agenda and ultimately triumphed not in the realization of inexpensive reliable space transport but in a vision of space militarization and commercialization that would appear settled United States policy in the early twenty first century A City on Mars Kelly Weinersmith, Zach Weinersmith, 2025-07-29 THE INSTANT NEW YORK TIMES BESTSELLER Winner of the Hugo Award Scientific American's 1 Book for 2023 Winner of Royal Society's Trivedi Prize A Guardian Best Book of 2024 A New York Times Book Review Editors Choice A Times Best Science and Environment Book of 2023 A Tor.com Best Book of 2023 Exceptional Forceful engaging and funny This book will make you happy to live on this planet a good thing because you're not leaving anytime soon New York Times Book Review From the bestselling authors of Soonish a brilliant and hilarious off world investigation into space settlement EARTH IS NOT WELL The promise of starting life anew somewhere far far away no climate change no war no doomscrolling beckons and settling the stars nally seems within our grasp Or is it Critically acclaimed bestselling authors Kelly and Zach Weinersmith set out to write the essential guide to a glorious future of space settlements but after years of research they aren't so sure it's a good idea Space technologies and space businesses are progressing fast but we lack the knowledge needed to have space kids build space

farms and create space nations in a way that doesn't spark conflict back home In a world hurtling toward human expansion into space A City on Mars investigates whether the dream of new worlds won't create nightmares both for settlers and the people they leave behind In the process the Weinersmiths answer every question about space you've ever wondered about and many you've never considered Can you make babies in space Should corporations govern space settlements What about space war Are we headed for a housing crisis on the Moon's Peaks of Eternal Light and what happens if you're left in the Craters of Eternal Darkness Why do astronauts love taco sauce Speaking of meals what's the legal status of space cannibalism With deep expertise a winning sense of humor and art from the beloved creator of Saturday Morning Breakfast Cereal the Weinersmiths investigate perhaps the biggest questions humanity will ever ask itself whether and how to become multiplanetary Get in we're going to Mars

Dick, Steven J. Dick, Roger D. Launius, 2006 In March 2005 the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history This volume is a collection of essays based on those deliberations The meeting took place at a time of extraordinary transformation for NASA stemming from the new Vision of Space Exploration announced by President George W Bush in January 2004 to go to the Moon Mars and beyond This Vision in turn stemmed from a deep reevaluation of NASA s goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board The new goals were seen as initiating a New Age of Exploration and were placed in the context of the importance of exploration and discovery to the American experiences Amazon **Reinventing NASA** Roger Handberg, 2003-12-30 From its beginnings NASA was convinced that its real mission was to create the opportunity for a much different and better society on Earth namely through human space flight Pursuit of such a goal has led the agency to persist in certain activities even when they conflict with the wishes of Congress and the President Recent changes in the international environment changes that

began well before September 11 2001 have brought the military back into the field of human space flight a situation that holds certain hazards for NASA since the military is more powerful politically Dramatic changes could be in store changes that could severely damage NASA's capacity for continuing what it sees as its primary objective While most analyses see the agency as riddled with incompetence Handberg argues that NASA's troubles are a product of its internal values He begins with an historical overview of the major themes in NASA's history followed by chapters on specific areas of concentration such as the space station space transportation space science and internal reforms He also discusses the long term future of the agency and human space flight in general both domestically and internationally
