Screening Images of American Masculinity in the Age of Postfeminism Elizabeth Abele,, John A.

Gronbeck-Tedesco,2015-12-03 This collection of essays presents a sampling of film and television texts interrogating images of U S masculinity Rather than using postfeminist as a definition of contemporary feminism this collection uses the term to designate the period from the late 1980s on as a point when feminist thought gradually became more mainstream The movies and TV series examined here have achieved a level of sustained attention from critical acclaim to mass appeal to cult status Instead of beginning with a set hypothesis on the effect of the feminist movement on images of masculinity on film and television these chapters represent a range of responses that demonstrate how the conversations within these texts about American masculinity are often open ended allowing both male characters and male viewers a wider range of options Defining the relationship between U S masculinity and American feminist movements of the twentieth century is a complex undertaking The essays collected for this volume engage prominent film and television texts that directly interrogate images of U S masculinity that have appeared since second wave feminism The contributors have chosen textual examples whose protagonists actively struggle with the conflicting messages about masculinity These protagonists are more often works in progress acknowledging the limits of their negotiations and self actualization These chapters also cover a wide range of genres and decades from action and fantasy to dramas and romantic comedy from the late 1970s to today Taken together the chapters of Screening Images of American Masculinity in the Age of Postfeminism interrogate the possible screened in popular movies and television series confronting the multiple and competing visions of masculinity not after or beyond feminism but rather in its very wake **The American Portrait Gallery** Abner Dumont Jones,1855 **Redefining Irishness in a**

Jones, 1869 **Reading American Art** Professor and Department Head of Art & Art History Elizabeth Milroy, 1998-01-01

This anthology brings together twenty outstanding works of recent scholarship on the history of the visual arts in the United States from the colonial period to 1945. The selected essays all written within the past two decades reflect the interdisciplinary character of current art historiography in America and the variety of approaches that contribute to the dynamism in the field. The authors take up diverse subjects from colonial portraits to nineteenth century sculptures of women to photographic images of New York and invite those with a general knowledge of the history of American art to think more deeply about art and culture. Employing many interpretive methodologies including iconology, social history, structuralism, psychobiography and feminist theory, the contributors to this volume combine close analysis of specific art objects or groups of objects with discussion of how these works of art operated within their cultural contexts. The authors consider the works of such artists as John Singleton Copley, Charles Willson Peale, Winslow Homer, Thomas Eakins, Georgia O'Keeffe and Jackson Pollock as they assess how paintings, sculpture, prints, drawings and photographs have carried meaning within American society. And they investigate how the conceptualization, production and presentation of works of art both inform and are informed by prevailing attitudes toward the role of the arts and the artist in American culture. The American Almanac, Year-book, Cyclopaedia and Atlas, 1903 The American Almanac, Year-book, Cyclopaedia and Atlas, 1904 Mormon Visual Culture and the American West Nathan Rees, 2021-03-17

This book explores the place of art in Latter day Saint society during the first 50 years of the Utah settlement beginning in 1847. Nathan Rees uncovers the critical role that images played in nineteenth century Mormon religion, politics and social practice. These artists not only represented but actively participated in debates about theology, politics, race, gender and sexuality at a time when Latter day Saints were grappling with evolving doctrine, conflict with Native Americans and political turmoil resulting from their practice of polygamy. The book makes an important contribution to art history, Mormon studies, American studies and religious studies. *An Annotated Catalogue of the Edward C. Atwater Collection of American Popular Medicine and Health Reform: A-L* Christopher Hoolihan, 2001

This is a catalogue of the Edward C. Atwater Collection of rare books dealing with popular medicine in early America which is housed at the University of Rochester Medical School library. The books described in the catalogue were written by physicians and other professionals to provide information for the non medical audience. The books taught human anatomy, hygiene, temperance and diet, how to maintain health and how to cope with illness, especially when no professional help was available. The books promoted a healthy lifestyle for the readers, giving guidance on everything from physical fitness and recreation to the special health needs of women. The collection consists of works dealing with reproduction from birth control to delivering and caring for a baby, venereal disease, home nursing, epidemics and the need for public sex education. These books, covering areas largely ignored by the medical profession, made important contributions to the health of the American public and the collection is a vital piece of medical history. America's Use of Terror Stephen Huggins, 2019-11-07 From the first America has considered itself a shining city on a hill uniquely lighting the right way for the world But it is hard to reconcile this picture the very image of American exceptionalism with what America s Use of Terror shows us that the United States has frequently resorted to acts of terror to solve its most challenging problems Any war on terror Stephen Huggins suggests will fail unless we take a long hard look at ourselves and it is this discerning informed perspective that his book provides Terrorism as Huggins defines it is an act of violence against noncombatants intended to change their political will or support The United States government adds a qualifier to this definition only if the instigator is a subnational group On the contrary Huggins tells us terrorism is indeed used by the state a politically organized body of people occupying a definite territory in this case the government of the United States as well as by such predecessors as the Continental Congress and early European colonists in America In this light America s Use of Terror re examines key historical moments and processes many of them events praised in American history but actually acts of terror directed at noncombatants The targeting of women and children in Native American villages for instance was a use of terror as were the means used to sustain slavery and then to further subjugate freed slaves under Jim Crow laws and practices The placing of Philippine peasants in concentration camps during the Philippine American War the firebombing of families in Dresden and Tokyo the dropping of atomic bombs on Hiroshima and Nagasaki all are last resort measures to conclude wars and these too are among the instances of American terrorism that Huggins explores Terrorism in short is not only terrorism when they do it to us as many Americans like to think And only when we recognize this and thus the dissonance between the ideal and the real America will we be able to truly understand and confront modern terrorism Photo-Era Magazine, the American Journal of Photography , 1900 *The Jazz Image* K. Analysing American Advice Books for Single Mothers Raising Sons Berit Åström, 2023-02-07 Although single fathers as primary careers are on the rise most single parent households in the US are headed by women These women are a lucrative market for parenting books and most of these books are aimed at single mothers raising sons This intersectional study analyses the way in which these advice books draw on mother blame language misconceptions of neuropsychological research and traditional conceptualisations of masculinity and femininity to convince the mother readers that they are unable to raise a son to be a man The study further connects the advice books to a cultural backlash against ideas of involved fatherhood and caring masculinity exploring how the authors argue for a return to traditional family structures
