Winokuer, Gordon Thornton, 2021-09-08 Grief and Bereavement in Contemporary Society is the authoritative guide to the study of and work with major themes in bereavement The classic edition includes a new preface from the lead editors discussing advances in the field since the book's initial publication The book's chapters synthesize the best of research based conceptualization and clinical wisdom across 30 of the most important topics in the field The volume's contributors come from around the world and their work reflects a level of cultural awareness of the diversity and universality of bereavement and its challenges that has rarely been approximated by other volumes This is a readable engaging and comprehensive book that shares the most important scientific and applied work on the contemporary scene with a broad international audience It's an essential addition to anyone with a serious interest in death dying and bereavement

Strategic Conflict Daniel J. Canary, Sandra Lakey, 2012-08-21 Strategic Conflict offers a research based accessible analysis of how people can manage conflict productively Moving beyond the basics of conflict it examines interpersonal situations in which conflict occurs and promotes strategic communicative responses based on the latest theoretical research Daniel J. Canary and his colleagues add personal observations media examples and samples of actual interaction to provide concrete illustrations of the research findings This comprehensive volume provides students with the tools to understand conflict in real world contexts

Close Encounters Laura K. Guerrero, Peter A. Andersen, Ph.D., Walid A. Afifi, 2007-05-31 Using a relational approach to the study of interpersonal communication this text provides comprehensive coverage of popular theories and concepts in interpersonal communication The research base of the book draws heavily from communication but also emphasizes the interdisciplinary nature of the study of personal relationships The book focuses on communication within close relationships and is organized using a developmental approach The early chapters focus on processes that shape initial interaction and relational escalation with the caveat that some of these processes e.g. self disclosure uncertainty also play important roles in established relationships The middle chapters examine issues related to maintaining a loving fair and intimate relationship The latter chapters focus on challenges relational partners face including coping with privacy needs relational transgressions and conflict The last chapter is on relationship endings The book includes research from various disciplines such as social psychology and family studies but the primary focus is communication

research **Advancing (Im)politeness Studies** Chaoqun Xie,2023-09-26 This volume pushes forward research on im politeness by focusing on interpersonal interaction s cultural digital and emotional aspects With contributions by established and emerging scholars in the field this collection explores and expounds with the combination of solid theoretical foundation and up close empirical demonstration how im politeness not only gives but also gives off communicative and interpersonal meaning in diverse cultural contexts Included are chapters on how im politeness contributes to the construction of social reality online and in social media and how im politeness prompts and is prompted by emotional sensitivities This book is of interest and value to students and researchers in the field and those keen to know how effective human existence and essence are possible through the lens of im politeness *Skilled Interpersonal Communication* Owen Hargie,2004-06-01

Previous editions *Social Skills in Interpersonal Communication* have established this work as the standard textbook on communication Directly relevant to a multiplicity of research areas and professions this thoroughly revised and updated edition has been expanded to include the latest research as well as a new chapter on negotiating Key examples and summaries have been augmented to help contextualise the theory of skilled interpersonal communication in terms of its practical applications Combining both clarity and a deep understanding of the subject matter the authors have succeeded in creating a new edition which will be essential to anyone studying or working in the field of interpersonal communication

Towards an embodied science of intersubjectivity: Widening the scope of social understanding research

Ezequiel Di Paolo,Hanne De Jaegher,2015-06-16 An important amount of research effort in psychology and neuroscience over the past decades has focused on the problem of social cognition This problem is understood as how we figure out other minds relying only on indirect manifestations of other people s intentional states which are assumed to be hidden private and internal Research on this question has mostly investigated how individual cognitive mechanisms achieve this task A shift in the internalist assumptions regarding intentional states has expanded the research focus with hypotheses that explore the role of interactive phenomena and interpersonal histories and their implications for understanding individual cognitive processes This interactive expansion of the conceptual and methodological toolkit for investigating social cognition we now propose can be followed by an expansion into wider and deeply related research questions beyond but including that of social cognition narrowly construed Our social lives are populated by different kinds of cognitive and affective phenomena that are related to but not exhausted by the question of how we figure out other minds These phenomena include acting and perceiving together verbal and non verbal engagement experiences of dis connection management of relations in a group joint meaning making intimacy trust conflict negotiation asymmetric relations material mediation of social interaction collective action contextual engagement with socio cultural norms structures and roles etc These phenomena are often characterized by a strong participation by the cognitive agent in contrast with the spectatorial stance typical of social cognition research We use the broader notion of embodied intersubjectivity to refer to this wider set of phenomena This

Research Topic aims to investigate relations between these different issues to help lay strong foundations for a science of intersubjectivity the social mind writ large To contribute to this goal we encouraged contributions in psychology neuroscience psychopathology philosophy and cognitive science that address this wider scope of intersubjectivity by extending the range of explanatory factors from purely individual to interactive from observational to participatory The Discourse of Comfort in Chinese Online Medical Consultations Ying Jin,2025-09-19 This book integrates perspectives from conversation analysis CA and discursive psychology to shed light on doctor patient communication in asynchronous web based interactions through the lens of the discourse of comfort While previous research has been done in this space on face to face encounters this book seeks to bring further attention to comfort in online text interactions between doctors and patients examining its capacity to convey emotional support encourage troubles telling and facilitate problem solving in medical encounters A discursive psychology approach provides a complementary perspective to ethnomethodology and CA frameworks applied to an extensive corpus with data scraping in Python While Chinese data is featured this integrated approach allows for a nuanced view of the differences between spoken and online interactions as well as the role of technology in the organization of talk and doctor patient communication more broadly This book will be valuable reading for students and scholars interested in talk in interaction CA health communication language and health pragmatics and social psychology Toward Multimodal Pragmatics Lihe Huang,2021-12-29 Classic pragmatic theories emphasize the linguistic aspect of illocutionary acts and forces However as multimodality has gained importance and popularity multimodal pragmatics has quickly become a frontier of pragmatic studies This book adds to this new research trend by offering a perspective of situated discourse in the Chinese context Using the multimodal corpus approach this study examines how speakers use multiple devices to perform illocutionary acts and express illocutionary forces Not only does the author use qualitative analysis to study the types characteristics and emergence patterns of illocutionary forces he also performs a quantitative corpus based analysis of the interaction of illocutionary forces emotions prosody and gestures The results show that illocutionary forces are multimodal in nature while meaning in discourse is created through an interplay of an array of modalities Students and scholars of pragmatics corpus linguistics and Chinese linguistics will benefit from this title

Feeling Hurt in Close Relationships Anita L. Vangelisti,2009-07-31 *Feeling Hurt in Close Relationships* presents a synthesis of cutting edge research and theory on hurt Being hurt is an inevitable part of close relationships What varies from relationship to relationship is not whether partners hurt each other but how their relationship is affected by hurtful episodes Given the potential influence of hurt feelings on people's interpersonal relationships it is not surprising that scholars have begun to study the antecedents processes and outcomes associated with hurt This collection integrates the various issues addressed by researchers theorists and practitioners who study the causes of hurt feelings the interpersonal events associated with hurt and the ways people respond to hurting and being hurt by others To capture the breadth and depth of

the literature in this area the work of scholars from a variety of disciplines including social psychology communication sociology and family studies is highlighted
