areas whilst referring to the scenario I highly recommend it to pre registered student nurses Kris Paget Senior Lecturer Faculty of Health Social Work and Education Kingston University UK This collection of case studies provides a unique and user friendly guide to commonly seen pharmacological therapies and treatment options across the lifespan The case studies have been carefully selected to provide the diverse care needs of complex disease processes in a person centred way Each case study is relevant to the role of the Nurse and will provide essential and core information whether nurses are working in either a medical or surgical clinical setting Government Health Care Directives provide the essential clinical evidence based theory necessary to promote medicine adherence and each chapter provides the relevant pathophysiology which is essential to underpin the safe administration of medication therapies The role of the nurse in medicine management with respect to patient education and the professional responsibilities of monitoring and evaluating complex medication therapies is presented in each case study This provides an holistic approach to the care of patients receiving complex medication therapies Barry Ricketts Senior Lecturer Adult Nursing Oxford Brookes University UK

Quality of Life in Epilepsy Gus A Baker,Gus A. Baker,Ann Jacoby,2013-05-13 Though clinical aspects of epilepsy such as seizure control are crucially important to its management increasing attention is being given to wider quality of life issues Epilepsy continues to be an often misunderstood and stigmatising condition for the vast majority of people whose seizures can be well controlled the social and psychological repercussions are often of greater significance than the seizures themselves The increasing emphasis on the importance of non clinical outcomes in the assessment of new treatments and management strategies for chronic conditions such as epilepsy has stimulated interest in methodological issues in assessing quality of life This book reviews the recent literature on the impact of epilepsy on everyday experience and the methodological issues involved in assessing that impact It also considers the perspectives of a range of health professionals involved in caring for people with epilepsy and how through appropriate management the impact on their lives can be minimised
