Handbook Of Logic And Language Elsevier Insights:

Handbook of Logic and Language J. van Benthem, Alice G. B. ter Meulen, 1997 This Handbook documents the main trends in current research between logic and language including its broader influence in computer science linguistic theory and cognitive science The history of the combined study of Logic and Linguistics goes back a long way at least to the work of the scholastic philosophers in the Middle Ages At the beginning of this century the subject was revitalized through the pioneering efforts of Gottlob Frege Bertrand Russell and Polish philosophical logicians such as Kazimierz Ajdukiewicz Around 1970 the landmark achievements of Richard Montague established a junction between state of the art mathematical logic and generative linguistic theory Over the subsequent decades this enterprise of Montague Grammar has flourished and diversified into a number of research programs with empirical and theoretical substance This appears to be the first Handbook to bring logic language interface to the fore Both aspects of the interaction between logic and language are demonstrated in the book i e firstly how logical systems are designed and modified in response to linguistic needs and secondly how mathematical theory arises in this process and how it affects subsequent linguistic theory The Handbook presents concise impartial accounts of the topics covered Where possible an author and a commentator have cooperated to ensure the proper breadth and technical content of the papers The Handbook is self contained and individual articles are of the highest quality

Handbook of Logic and Language Johan F.A.K. van Benthem, Alice ter Meulen, 2010-12-17 The logical study of language is becoming more interdisciplinary playing a role in fields such as computer science artificial intelligence cognitive science and game theory This new edition written by the leading experts in the field presents an overview of the latest developments at the interface of logic and linguistics as well as a historical perspective It is divided into three parts covering Frameworks General Topics and Descriptive Themes Completely revised and updated includes over 25% new material Discusses the interface between logic and language Many of the authors are creators or active developers of the theories

book introduces formal grammar theories that play a role in current linguistic theorizing Phrase Structure Grammar Transformational Grammar Government Binding Generalized Phrase Structure Grammar Lexical Functional Grammar Categorical Grammar Head Driven Phrase Structure Grammar Construction Grammar Tree Adjoining Grammar The key assumptions are explained and it is shown how the respective theory treats arguments and adjuncts the active passive alternation local reorderings verb placement and fronting of constituents over long distances The analyses are explained with German as the object language The second part of the book compares these approaches with respect to their predictions regarding language acquisition and psycholinguistic plausibility The nativism hypothesis which assumes that humans possess genetically determined innate language specific knowledge is critically examined and alternative models of language acquisition are discussed The second part then addresses controversial issues of current theory building such as the question of flat or binary branching structures being more appropriate the question whether constructions should be treated on the phrasal or the lexical level and the question whether abstract non visible entities should play a role in syntactic analyses It is shown that the analyses suggested in the respective frameworks are often translatable into each other The book closes with a chapter showing how properties common to all languages or to certain classes of languages can be captured

Games Johan Van Benthem,2014-01-24 A comprehensive examination of the interfaces of logic computer science and game theory drawing on twenty years of research on logic and games This book draws on ideas from philosophical logic computational logic multi agent systems and game theory to offer a comprehensive account of logic and games viewed in two

complementary ways It examines the logic of games the development of sophisticated modern dynamic logics that model information flow communication and interactive structures in games It also examines logic as games the idea that logical activities of reasoning and many related tasks can be viewed in the form of games In doing so the book takes up the intelligent interaction of agents engaging in competitive or cooperative activities and examines the patterns of strategic behavior that arise It develops modern logical systems that can analyze information driven changes in players knowledge and beliefs and introduces the Theory of Play that emerges from the combination of logic and game theory This results in a new view of logic itself as an interactive rational activity based on reasoning perception and communication that has particular relevance for games Logic in Games based on a course taught by the author at Stanford University the University of Amsterdam and elsewhere can be used in advanced seminars and as a resource for researchers Languages: From Formal to Natural Orna Grumberg, Michael Kaminski, Shmuel Katz, Shuly Wintner, 2009-05-12 This Festschrift volume published in honor of Nissim Francez on the occasion of his 65th birthday contains 15 papers written by friends and colleagues many of whom congregated at a celebratory symposium held on May 2009 in Haifa Israel The Foundations of Cognitive Science Joao Branquinho, 2001-07-26 The Foundations of Cognitive Science is a set of thirteen new essays on key topics in this lively interdisciplinary field by a stellar international line up of authors Philosophers psychologists and neurologists here come together to investigate such fascinating subjects as consciousness vision rationality artificial life the neural basis of language cognition and emotion and the relations between mind and world for instance our representation of numbers and space The contributors are Ned Block Margaret Boden Susan Carey Patricia Churchland Paul Churchland Antonio Damasio Hanna Damasio Donald Davidson Daniel Dennett Ilya Farber James Higginbotham Christopher Peacocke Will Peterman Zenon Pylyshyn John Searle Anyone interested in the exploration of the human mind will enjoy this book *Type Noun Constructions in Slavic, Germanic and Romance Languages* Wiltrud Mihatsch, Inga Hennecke, Anna Kisiel, Alena Kolyaseva, Kristin Davidse, Lieselotte Brems, 2023-04-27 This volume is the first dedicated to the comprehensive in depth analysis of constructions with nouns like type and sort It focuses on type noun constructions in Romance Germanic and Slavic languages integrating the different descriptive traditions that had been developed for each language family As a result a greater variety of type noun constructions is revealed than in the hitherto more fragmented literature But attention is also drawn to the cross linguistic similarity of the new pragmatic meanings such as ad hoc and approximative categorization hedging focus and filler uses and the new grammatical functions in NPs e g phoric uses clauses e g adverbial uses and complex sentences e g quotatives The volume offers survey chapters of type noun constructions in each language family as well as contributions focusing on specific aspects in one or two languages such as their grammar semantics and pragmatics diachronic development discursive and sociolinguistic variety These complementary methodologies elucidate the unique cross linguistic field of type noun constructions both descriptively and theoretically Hence this volume can also serve as a

model for similar surveys in other functional domains *The Routledge Handbook of Propositions* Chris Tillman, Adam Murray, 2022-09-30 Propositions are routinely invoked by philosophers linguists logicians and other theorists engaged in the study of meaning communication and the mind To investigate the nature of propositions is to investigate the very nature of our connection to each other and to the world around us As one of the only volumes of its kind The Routledge Handbook of Propositions provides a comprehensive overview of the philosophy of propositions from both historical and contemporary perspectives Comprising 33 original chapters by an international team of scholars the volume addresses both traditional and emerging questions concerning the nature of propositions and our capacity to engage with them in thought and in communication The chapters are clearly organized into the following three sections I Foundational Issues in the Theory of Propositions II Historical Theories of Propositions III Contemporary Theories of Propositions Essential reading for philosophers of language and mind and for those working in neighboring areas The Routledge Handbook of Propositions is suitable for upper level undergraduate study as well as graduate and professional research **The International Handbook on Innovation** Larisa V Shavinina, 2003-10-16 The breadth of this work will allow the reader to acquire a comprehensive and panoramic picture of the nature of innovation within a single handbook **Увод в съвременната теория на познанието** Анета Карагеоргиева, 2013-03-26 *Arsyad al-Banjari's Insights on Parallel Reasoning and Dialectic in Law* Muhammad Iqbal, 2022-06-16 This book provides an epistemological study of the great Islamic scholar of Banjarese origin Syekh Muhammad Arsyad al Banjari 1710 1812 who contributed to the development of Islam in Indonesia and in general Southeast Asia The work focuses on Arsyad al Banjari s dialectical use and understanding of qiy s or correlational inference as a model of parallel reasoning or analogy in Islamic jurisprudence This constituted the most prominent instrument he applied in his effort of integrating Islamic law into the Banjarese society This work studies how Arsyad al Banjari integrates jadal theory or dialectic in Islamic jurisprudence within his application of qiy s The author develops a framework for qiy s which acts as the interface between jadal dialogical logic and Per Martin L f s Constructive Type Theory CTT One of the epistemological results emerging from the present study is that the different forms of qiy s applied by Arsyad al Banjari represent an innovative and sophisticated form of reasoning The volume is divided into three parts that discuss the types of qiy s as well their dialectical and argumentative aspects historical background and context of Banjar and demonstrates how the theory of qiy s comes quite close to the contemporary model of parallel reasoning for sciences and mathematics developed by Paul Bartha 2010 This volume will be of interest to historians and philosophers in general and logicians and historians of philosophy in particular *Common Ground in First Language and Intercultural Interaction* Istvan Kecskes, 2023-03-06 In recent years the traditional approach to common ground as a body of information shared between participants of a communicative process has been challenged Taking into account not only L1 but also intercultural interactions and attempting to bring together the traditional view with the egocentrism based view of cognitive

psychologists it has been argued that construction of common ground is a dynamic emergent process It is the convergence of the mental representation of shared knowledge that we activate assumed mutual knowledge that we seek and rapport as well as knowledge that we co construct in the communicative process This dynamic understanding of common ground has been applied in many research projects addressing both L1 and intercultural interactions in recent years As a result several new elements aspects and interpretations of common ground have been identified Some researchers came to view common ground as one component in a complex contextual information structure Others analyzing intercultural interactions pointed out the dynamism of the interplay of core common ground and emergent common ground The book brings together researchers from different angles of pragmatics and communication to examine i what adjustments to the notion of common ground based on L1 communication should be made in the light of research in intercultural communication ii what the relationship is between context situation and common ground and iii how relevant knowledge and content get selected for inclusion into core and emergent common ground
