childhood students and staff with a broad and diverse range of teaching techniques to support children's learning. It examines 26 techniques ranging from simple ones such as describing and listening to more complex techniques such as deconstruction and scaffolding. It defines each technique and discusses how, when, and why staff might use it. Vignettes and examples clarify how to use these techniques in everyday situations and outline different ways to reach children, support their learning, and help them with learning difficulties. A final chapter presents a strategic approach to selecting the appropriate techniques for specific teaching methods and situations. This chapter also goes one step further explaining how educational theories link with different technique choices, giving both teaching students and experienced teachers a wide range of options and approaches, which is invaluable when teaching classes of children with varying abilities.

Research in Young Children's Literacy and Language Development Olivia N. Saracho, 2019-12-13 The importance of the early years in young children's lives and the rigid inequality in literacy achievement are a stimulating backdrop to current research in young children's language and literacy development. This book reports new data and empirical analyses that advance the theory of language and literacy with researchers using different methodologies in conducting their study, with both a sound empirical underpinning and a captivating analytical rationalization of the results. The contributors to this volume used several methodological methods, e.g., quantitative, qualitative, to describe the complete concept of the study, the achievement of the study, and the study in an appropriate manner based on the study's methodology. The contributions to this volume cover a wide range of topics, including dual language learners, Latino immigrant children, children who have hearing disabilities, parents' and teachers' beliefs about language development, early literacy skills of toddlers and preschool children, interventions, multimodalities in early literacies, writing, and family literacy. The studies were conducted in various early childhood settings, such as child care, nursery school, Head Start, kindergarten, and primary grades, and the subjects in the studies represent the pluralism of the globe: a pluralism of language backgrounds, ethnicity, abilities, and disabilities. This book was originally published as a special issue of *Early Child Development and Care*.

Handbook of Early Literacy Research Susan B. Neuman, David K. Dickinson, 2003-04-07 Current research increasingly highlights the role of early literacy in young children's development and facilitates the growth of practices and policies that promote success among diverse learners. The *Handbook of Early Literacy Research* presents cutting-edge knowledge on all aspects of literacy learning in the preschool years. Volume 1 covers such essential topics as major theories of early literacy, writing development, understanding learning disabilities, including early intervention approaches, cultural and socioeconomic contexts of literacy development, and tutoring programs and other special intervention efforts.

Educational Research Burke Johnson, Larry B. Christensen, 2000 This informal and highly readable text helps students acquire the knowledge they need to conduct educational research and evaluate published research. *Educational Research* introduces students to the fundamental logic of empirical research and explores the sources of research ideas. Detailed descriptions guide students through the design and implementation of actual

research studies One of the strongest features of this book is its focus on both quantitative and qualitative research While quantitative research strategies are covered extensively various qualitative approaches such as ethnography historical methods phenomenology grounded theory and case studies are also discussed The authors show students how to prepare a proposal for submission to an Institutional Review Board and present detailed coverage of the key elements of research including sampling techniques ethical considerations data collection methods measurement judging validity experimental and nonexperimental methods descriptive and inferential statistics qualitative data analysis and report preparation **Lifespan**
