Hinterlands And Commodities:

Hinterlands and Commodities ,2014-11-20 In *Hinterlands and Commodities Place Space Time and the Political Economic Development of Asia over the Long Eighteenth Century* well known economic and social historians examine important questions concerning temporal and spatial relationships among central places hinterlands commodities and political economic developments in Asia and the Global economy over the long eighteenth century These timely essays engage hinterlands and commodities providing novel foci on historical impacts maritime trade on political economic developments involving place space and time in Asia thereby furnishing historical background for current conditions They contribute to discourse concerning historical interactions among indigenous Asian merchant activities and European commercial counterparts Contributors are George Bryan Souza Dennis O Flynn Marie A Lee Ghulam A Nadri Bhaswati Bhattacharya Tsukasa Mizushima Tomotaka Kawamura Atushi Ota Ryuto Shimada and Ei Murakami *Port-Cities and their Hinterlands* Robert Lee,Paul McNamara,2022-03-14 This interdisciplinary book brings together eleven original contributions by scholars in the United Kingdom continental Europe America and Japan which represent innovative and important research on the relationship between cities and their hinterlands They discuss the factors which determined the changing nature of port hinterland relations in particular and highlight the ways in which port cities have interacted and intersected with their different hinterlands as a result of both in and out migration cultural exchange and the wider flow of goods services and information Historically maritime commerce was a powerful driving force behind urbanisation and by 1850 seaports accounted for a significant proportion of the world's great cities Ports acted as nodal points for the flow of population and the dissemination of goods and services but their role as growth poles also affected the economic transformation of both their hinterlands and forelands In fact most ports irrespective of their size had a series of overlapping hinterlands whose shifting importance reflected changes in trading relations political frameworks migration patterns family networks and cultural exchange Urban historians have been criticised for being concerned primarily with self contained processes which operate within the boundaries of individual towns and cities and as a result the key relationships between cities and their hinterlands have often been neglected The chapters in this work focus primarily on the determinants of port hinterland linkages and analyse these as distinct but interrelated fields of interaction Marking a significant contribution to the literature in this field *Port Cities and their Hinterlands* provides essential reading for students and scholars of the history of economics

Colonial Ports, Global Trade, and the Roots of the American Revolution (1700 – 1776) Jeremy Land,2023-07-24 This title is published in Open Access with the support of the University of Helsinki Library This book takes a long run view of the global maritime trade of Boston New York and Philadelphia from 1700 to American Independence in 1776 Land argues that the three cities developed large global networks of maritime commerce and exchange that created tension between merchants and the British Empire which sought to enforce mercantilist policies to constrain American trade to within the

British Empire Colonial merchants created and then expanded their mercantile networks well beyond the confines of the British Empire This trans imperial trade often considered smuggling by British authorities formed the roots of what became known as the American Revolution

In Asian Waters Eric Tagliacozzo,2024-10-29 A sweeping account of how the sea routes of Asia have transformed a vast expanse of the globe over the past five hundred years powerfully shaping the modern world In the centuries leading up to our own the volume of traffic across Asian sea routes an area stretching from East Africa and the Middle East to Japan grew dramatically eventually making them the busiest in the world The result was a massive circulation of people commodities religion culture technology and ideas In this book Eric Tagliacozzo chronicles how the seas and oceans of Asia have shaped the history of the largest continent for the past half millennium leaving an indelible mark on the modern world in the process Paying special attention to migration trade the environment and cities In Asian Waters examines the long history of contact between China and East Africa the spread of Hinduism and Buddhism across the Bay of Bengal and the intertwined histories of Islam and Christianity in the Philippines The book illustrates how India became central to the spice trade how the Indian Ocean became a British lake between the seventeenth and nineteenth centuries and how lighthouses and sea mapping played important roles in imperialism The volume ends by asking what may happen if China comes to rule the waves of Asia as Britain once did A novel account showing how Asian history can be seen as a whole when seen from the water In Asian Waters presents a voyage into a past that is still alive in the present

Freedom Ship Marcus Rediker,2025-05-13

A definitive sweeping account of the Underground Railroad's long overlooked maritime origins from a pre-eminent scholar of Atlantic history and the award-winning author of *The Slave Ship*. As many as 100,000 enslaved people fled successfully from the horrors of bondage in the antebellum South finding safe harbor along a network of passageways across North America now known as the Underground Railroad. Yet imagery of fugitives ushered clandestinely from safe house to safe house fails to capture the full breadth of these harrowing journeys many escapes took place not by land but by sea. Deeply researched and grippingly told *Freedom Ship* offers a groundbreaking new look into the secret world of stowaways and the vessels that carried them to freedom across the North and into Canada. Sprawling through the intricate riverways of the Carolinas to the banks of the Chesapeake Bay to Boston's harbors these tales illuminate the little-known stories of freedom seekers who turned their sights to the sea among them the legendary abolitionist Frederick Douglass and Harriet Tubman one of the Underground Railroad's most famous architects. Marcus Rediker one of the leading scholars of maritime history puts his command of archival research on full display in this luminous portrait of the Atlantic waterfront as a place of conspiracy, mutiny and liberation. *Freedom Ship* is essential reading for anyone looking to understand the complete story of one of North America's most significant historical moments.

The Road Taken Sung Hee Ru, 2025-09-01

Traces China's transformations with a focus on China's incorporation process in the nineteenth century which help to grasp the historical origins of China's capitalism. As Europe's colonial powers reached China in the nineteenth century they became so strong that China could no longer ignore them. Given that the unprecedented geographical expansion of the European system undermined a China-centered world order and brought unprecedented changes to Chinese society an intriguing question why and how the Chinese empire entered into the capitalist world economy has attracted increasing attention among historians, historical sociologists and world systems researchers. Yet there has been no comprehensive monograph touching on China's incorporation process into the capitalist world economy. To rectify this *The Road Taken* investigates China's incorporation process. Incorporation studies based on world systems analysis aims to illustrate the long-term integration process of external arenas into the capitalist world economy. Ru traces China's transformations with a focus on how incorporation process unfolded over the course of a century 1780s-1890s which represents a watershed era in the relations between China and the capitalist world.

OECD Development Pathways Rural Development Strategy Review of Ethiopia Reaping the Benefits of Urbanisation OECD, Policy Studies Institute, 2020-04-16

This report takes a spatial approach to study Ethiopia's rural development strategies. It highlights the need to develop stronger and more functional linkages between rural and urban areas. As such the development of intermediary cities and small urban centres provides large scope for inclusive rural transformation. The report is the result of rigorous analysis and extensive consultations with national and international stakeholders. It identifies some of the key challenges faced by rural areas and provides a series of recommendations to enhance Ethiopia's rural
