

HEADQUARTERS INSTALLATION, 10TH AIR MATERIAL CENTER,
WATFIELD, LONDON, E. I.

(a) Report of 10th Air Material Center for Summary. This report stated that the installation, and location of items needed for shipment.

1. Material Center. One of the most important wartime activities of the 10th Air Section was the administrative control of a general center, establishment of which was dictated by a combination of circumstances. Following the realization of Japan's critical shortage of supply services manpower developed as a result of incipient losses and the assignment of numerous units to occupation duties. On the other hand, there was no shortage of 10th personnel. Rather, there was a surplus as a majority of 10th units became available almost immediately for non-tactical employment. Many of these were used to meet acute service needs, a total of forty units being allocated to base activities alone. In their new roles, these units were credited with performing valuable service as they helped "fill up" various military installations. Reliance of one problem, however, created another, involving huge quantities of surplus equipment rendered surplus by the non-tactical employment and demobilization of the organization. Instead of the loading services were unable to accept immediate delivery of this equipment as existing facilities for the actual ship and inventory of Japan continued to pour into the theater from the United States as the mid-pacific and closed first priority on handling and storage.

10TH AIR MATERIAL CENTER, WATFIELD, LONDON, E. I.

Having provided the answer to the manpower shortage problem, the 10th Air Command also found a solution for the equipment storage situation in the establishment of the 10th Air Material Center at Watfield, Hertfordshire, London. The location was approved by Headquarters, USAF/AFM, during the last week in August 1944 and the necessary buildings were constructed at once. The 10th Air Base Battalion and the 10th Air Force Maintenance Company (AMC) were designated to operate the center under direction of the 10th Section. Later they were assisted by the 10th Signal Squadron Maintenance Unit. The mission of the center was to receive, repair, and process for immediate storage all guns, fire control equipment, and tactical vehicles of 10th units as losses, and other equipment sent, and tactical vehicles from various islands in the Pacific. All the received by water shipment from various islands in the Pacific. All the equipment received and processed, including approximately 500 10th units of all materials from 10th to 10th units, eventually was turned in to depots of the loading services for permanent storage or was shipped direct to the United States.

2. Shipping Issues. The 10th Section also had administrative responsibility in connection with the operation of shipping areas for Category 10th units of the Command. Two such areas were allocated to the section.

10. Category 10th units were those units designated as 10th units.
