E - Learning Modules Dan Ryan, 2012-06-20 The term e Learning is a neologism for CSCL systems that came about during the emergence of website e learning modules From an e learning perspective conventional e learning systems were then based on instructional packets which were delivered to students using assignments Assignments were evaluated by the instructor In contrast the new e learning places increased emphasis on social learning and use of social software such as blogs wikis podcasts and virtual worlds such as Second Life This phenomenon has also been referred to as Long Tail Learning E learning by contrast to e learning systems not based on CSCL assumes that knowledge as meaning and

understanding is socially constructed Learning takes place through conversations about content and grounded interaction about problems and actions Advocates of social learning claim that one of the best ways to learn something is to teach it to others However it should be noted that many early online courses such as those developed by Murray Turoff and Starr Roxanne Hiltz in the 1970s and 80s at the New Jersey Institute of Technology courses at the University of Guelph in Canada the British Open University and the online distance courses at the University of British Columbia where Web CT now incorporated into Blackboard Inc was first developed have always made heavy use of online discussion between students Also from the start practitioners such as Harasim in 1995 have put heavy emphasis on the use of learning networks for knowledge construction long before the term e learning let alone CSCL was even considered There is also an increased use of virtual classrooms online presentations delivered live as an online learning platform and classroom for a diverse set of education providers such as Minnesota State Colleges and Universities and Sachem MN School District In addition to virtual classroom environments social networks have become an important part of e learning Social networks have been used to foster online learning communities around subjects as diverse as test preparation and language education Mobile Assisted Language Learning MALL is a term used to describe using handheld computers or cell phones to assist in language learning Some feel however that schools have not caught up with the social networking trends Few traditional educators promote social networking unless they are communicating with their own colleagues DLR Associates consulting group first became interested in e learning modules at the annual Distance Learning Conference held at the University of Maine I decided to offer e learning services since we were already evolved with computer assisted education techniques DLR Associates had been involved with CAE since computers were first used in engineering education It was our hope a trend could be started towards blended learning services where computer based activities were integrated with practical or classroom based situations Dan Ryan Professor Emeritus Clemson University

The Empire of Effects Julie A. Turnock,2022-06-14 2024 Finalist Marshall McLuhan Outstanding Book Award Media Ecology Association How one company created the dominant aesthetic of digital realism Just about every major film now comes to us with an assist from digital effects The results are obvious in superhero fantasies yet dramas like Roma also rely on computer generated imagery to enhance the verisimilitude of scenes But the realism of digital effects is not actually true to life It is a realism invented by Hollywood by one company specifically Industrial Light Magic The Empire of Effects shows how the effects company known for the puppets and space battles of the original Star Wars went on to develop the dominant aesthetic

of digital realism Julie A Turnock finds that ILM borrowed its technique from the New Hollywood of the 1970s incorporating lens flares wobbly camerawork haphazard framing and other cinematography that called attention to the person behind the camera In the context of digital imagery however these aesthetic strategies had the opposite effect heightening the sense of realism by calling on tropes suggesting the authenticity to which viewers were accustomed ILM s style on display in the most successful films of the 1980s and beyond was so convincing that other studios were forced to follow suit and today ILM is a victim of its own success having fostered a cinematic monoculture in which it is but one player among many
