AI System Support for Conceptual Design John E.E. Sharpe, 2012-12-06 It is well known that some 85% of the resources necessary to design and bring to market a product are committed by decisions taken in the first 10% of the design activity This together with the wish to reduce further the time to market of high quality innovative products has increased the need for computer support at the conceptual design stage of the engineering design process life style This proceedings firmly focuses on the continuing research into new uses of Artificial Intelligence AI during the conceptual design process It shows how novel applications of AI may be integrated with aspects of solid modelling simulation optimisation and multiple criterion decision making A particular emphasis is placed on the use of AI methods in the overall design of products from major Civil Engineering structures to Consumer Electronics **Indexes** United States. ASHRAE Handbook , 1996 **Urban Operating Systems** Andres Luque-Ayala, Simon Marvin, 2020-12-15 A new wave of enthusiasm for smart cities urban data and the Internet of Things has created the impression that computation can solve almost any urban problem Subjecting this claim to critical scrutiny in this book Andr s Luque Ayala and Simon Marvin examine the cultural historical and contemporary contexts in which urban computational logics have emerged They consider the rationalities and techniques that constitute emerging computational forms of urbanization including work on digital urbanism smart cities and more recently platform urbanism They explore the modest potentials and serious contradictions of reconfiguring urban life city services and urban networked infrastructure through computational operating systems an urban OS Luque Ayala and Marvin argue that in order to understand how digital technologies transform and shape the city it is necessary to analyze the underlying computational logics themselves Drawing on fieldwork that stretches across eleven cities in American European and Asian contexts they investigate how digital products services and ecosystems are reshaping the ways in which the city is imagined known and governed They discuss the reconstitution of the contemporary city through digital technologies practices and techniques including data driven governance predictive analytics digital mapping urban sensing digitally enabled control rooms civic hacking and open data narratives Focusing on the relationship between the emerging operating systems of the city and their traditional infrastructures they shed light on the political implications of using computer technologies to understand and generate new urban spaces and flows Sound & Vision , 2006

System-Level Synthesis Ahmed Amine Jerraya, Jean Mermet, 2012-12-06 System Level Synthesis deals with the concurrent design of electronic applications including both hardware and software The issue has become the bottleneck in the design of electronic systems including both hardware and software in several major industrial fields including telecommunications automotive and aerospace engineering The major difficulty with the subject is that it demands contributions from several research fields including system specification system architecture hardware design and software design Most existing book cover well only a few aspects of system level synthesis The present volume presents a
