Materials & Building Components, 1986 **Tutorial Guide**, 1994 Recent Library Additions, 1992 **Modern Steel Construction**, 2009 *Aluminum Structures* J. Randolph Kissell, Robert L. Ferry, 2002-10-02 On the First Edition The book is a success in providing a comprehensive introduction to the use of aluminum structures contains lots of useful information Materials examples of recently built aluminum structures from buildings to bridges and a comparison of aluminum to other structural materials particularly steel Topics covered include Structural properties of aluminum alloys Aluminum structural design for beams columns and tension members Extruding and other fabrication techniques Welding and mechanical connections Aluminum structural systems including space frames composite members and plate structures Inspection and testing Load and resistance factor design Recent developments in aluminum structures *Design of Steel Structures* Elias G. Abu-Saba, 2012-12-06 This book is intended for classroom teaching in architectural and civil engineering at the graduate and undergraduate levels Although it has been developed from lecture notes given in structural steel design it can be useful to practicing engineers Many of the examples presented in this book are drawn from the field of design of structures Design of Steel Structures can be used for one or two semesters of three hours each on the undergraduate level For a two semester curriculum Chapters 1 through 8 can be used during the first semester Heavy emphasis should be placed on Chapters 1 through 5 giving the student a brief exposure to the consideration of wind and earthquakes in the design of buildings With the new federal requirements vis a vis wind and earthquake hazards it is beneficial to the student to have some understanding of the underlying concepts in this field In addition to the class lectures the instructor should require the student to submit a term project that includes the complete structural design of a multi story building using standard design procedures as specified by AISC Specifications Thus the use of the AISC Steel Construction Manual is a must in teaching this course In the second semester Chapters 9 through 13 should be covered At the undergraduate level Chapters 11 through 13

should be used on a limited basis leaving the student more time to concentrate on composite construction and built up girders
