Routledge Handbook of National and Regional Ocean Policies Biliana Cicin-Sain, David Vanderzwaag, Miriam C. Balgos, 2015-05-15 This comprehensive handbook prepared by leading ocean policy academics and practitioners from around the world presents in depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross cutting and integrated national and regional ocean policy All chapters follow a common framework for policy analysis While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean such as shipping fishing oil and gas development in the last two decades the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated ecosystem based vision for the governance of ocean areas under their jurisdiction This includes goals and procedures to harmonize existing uses and laws to foster sustainable development of ocean areas to protect biodiversity and vulnerable resources and ecosystems and to coordinate the actions of the many government agencies that are typically involved in oceans affairs The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992

2002 and 2012 sustainable development summits The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated precautionary and anticipatory Overall the book provides a definitive state of the art review and analysis of national and regional ocean policies around the world Science, Technology, and New Challenges to Ocean Law Harry N. Scheiber, James Kraska, Moon-Sang Kwon, 2015-08-25 Science Technology and New Challenges to Ocean Law offers fresh perspectives on a set of vital issues in the field of ocean law and policy Since the early period of the industrial revolution successive waves of revolutionary scientific discoveries and technological innovations have intensified the global population's exploitation of ocean and coastal resources In this volume several leading authorities in the field address major dimensions of the interface of science technology and ocean law both historically and in current day perspective and emergent challenges in legal ordering of ocean uses for sustainability and equitability Among the topics that are analysed in these readable accessible papers are ecosystem approaches to resource management the historic interplay of science and military concerns the place of science in dispute settlement processes the varied human uses of the seabed the roles in ocean governance of indigenous peoples legal issues in fisheries management and conservation and special regional problems of the Arctic the Bering Strait the South China Sea and the eastern Mediterranean The urgent importance of the subjects addressed here together with the variety of disciplinary approaches deployed by the authors enhance the value of this book's unique contribution to the literature of ocean studies

Conserving Biodiversity in Areas beyond National Jurisdiction David Freestone, 2019-02-19 Since 2006 the United Nations General Assembly UNGA has been discussing the question of the conservation and sustainable use of biodiversity in areas beyond national jurisdiction Following the issues raised by the Ad Hoc Working Group 2006 2015 and the Preparatory Commission 2016 2017 in 2017 the UNGA agreed to convene an intergovernmental conference to discuss these issues Conserving Biodiversity in Areas beyond National Jurisdiction edited by David Freestone brings together a collection of essays covering some of the key issues involved in these debates The essays are contributed by a number of distinguished scholars and practitioners many of whom are involved in the UNGA negotiations and are a useful reference for actors involved in the negotiations as well as for practitioners scholars and students following the process

Laws of the Sea Irus Braverman, 2022-08-03 Laws of the Sea assembles scholars from law geography anthropology and environmental humanities to consider the possibilities of a critical ocean approach in legal studies Unlike the United Nations monumental Convention on the Law of the Sea which imagines one comprehensive constitutional framework for governing the ocean Laws of the Sea approaches oceanic law in plural and dynamic ways Critically engaging contemporary concerns about the fate of the ocean the collection's twelve chapters range from hydrothermal vents through the continental shelf and marine genetic resources to coastal communities in France Sweden Florida and Indonesia Documenting the longstanding binary of land and sea the chapters pose a fundamental challenge to European law's terracentrism and its pervasive influence on juridical modes of knowing and making the world Together the

chapters ask is contemporary Eurocentric law and international law in particular capable of moving away from its capitalist and colonial legacies established through myriad oceanic abstractions and classifications toward more amphibious legalities. Laws of the Sea will appeal to legal scholars, geographers, anthropologists, cultural and political theorists as well as scholars in the environmental humanities, political ecology, ocean studies and animal studies. Environmental Security in the Arctic Ocean Paul Arthur Berkman, Alexander N. Vylegzhanin, 2012-11-29. This seminal book results from a NATO Advanced Research Workshop at the University of Cambridge with Russian co-directorship enabling the first formal dialogue between NATO and Russia about security issues in the Arctic Ocean. Involving interdisciplinary participation with experts from 17 nations including all of the Arctic states, this workshop itself reflects progress in Arctic cooperation and collaboration. Interests now are awakening globally to take advantage of extensive energy, shipping, fishing and tourism opportunities in the Arctic Ocean as it is being transformed from a permanent sea ice cap to a seasonally ice-free sea. This environmental state change is introducing inherent risks of political, economic and cultural instabilities that are centralized among the Arctic states and indigenous peoples with repercussions globally. Responding with urgency, environmental security is presented as an integrated approach for assessing and responding to the risks as well as the opportunities generated by an environmental state change. In this book, diverse perspectives on environmental security in the Arctic Ocean are shared in chapters from high-level diplomats, parliamentarians and government officials of Arctic and non-Arctic states, leaders of Arctic indigenous peoples, organizations, international law advisors from Arctic states as well as the United Nations, directors of intergovernmental organizations and non-governmental organizations, managers of multi-national corporations, political scientists, historians and economists along with Earth system scientists and oceanographers. Building on the common Arctic issues of sustainable development and environmental protection established by the Arctic Council, environmental security offers an holistic approach to assess opportunities and risks as well as develop infrastructure responses with law of the sea as the key international legal framework to promote the peaceful uses of the Arctic Ocean. With vision for future generations, environmental security is a path to balance national interests and common interests in the Arctic Ocean for the lasting benefit of all.
