Poverty Strategies in Asia John Weiss, Haider Khan, 2006-01-01 the volume makes interesting reading The language of the text is indeed lucid and the organization of the materials could not have been better Arup Mitra The Developing Economies This is an important book making a convincing case that structural elements are of crucial importance in filtering the impact of growth on poverty A successful development strategy needs to address these structural elements at the country level and modify them in order to

take greater advantage of the potential benefits of globalization in reducing poverty Erik Thorbecke Cornell University US This volume makes an important contribution to our understanding of the complex relationship between economic growth and poverty reduction The focus on assessing the impact of specific poverty reduction interventions at the disaggregated case study level marks an important and welcome departure from the standard approach to research in this area researchers and practitioners working in the field of poverty reduction and development in Asia and beyond will find much to interest them in this stimulating and informative volume Colin Kirkpatrick University of Manchester UK Poverty Strategies in Asia is an examination of a wide range of measures aimed at reducing poverty in the region It is widely recognized that while high and sustained economic growth is critical for poverty reduction there are other policy interventions that may also be significant in a growth plus approach to poverty reduction This volume brings together a series of case studies on the poverty impact of alternative interventions in a broad range of Asian economies The measures examined within the book cover trade liberalization both in general and in a specific market infrastructure investment particularly in roads population policies cash transfers microfinance employment guarantee programs and contract farming The countries covered include the Philippines Lao PDR Pakistan India and Thailand While the results illustrated by the contributors are mixed they demonstrate the potential for further progress in poverty reduction This latest joint publication by the ADBI and Edward Elgar Publishing will be warmly welcomed by scholars and researchers of Asian studies and development Professional economists within international and bilateral development agencies and policymakers will also find much to engage them

The Impact of IMF-Supported Programs on FDI in Low-income Countries Mr.Ali J Al-Sadiq,2015-07-16 It is common for IMF supported adjustment programs with low income member countries LICs to project that they will facilitate FDI inflows The main objective of this paper is to empirically examine this hypothesis Using an unbalanced panel dataset for 73 low income countries over the period 1980 2012 and two different econometric methods that address the selection bias problem the empirical results robustly show that participating in IMF supported program is associated with a significant increase in FDI inflows

Oil Abundance and Economic Growth Elkhani Richard Sadik-Zada,2016-11-07 This book deals with the role of oil abundance in economic growth The major theoretical contribution of the analysis is the transformation of the rentier state theory into the language of mathematical economics The mathematical formalization of the rentier state theory enables a more sophisticated analytical tool for the assessment of the role of nonrenewable resource revenues in economic growth and institutional dynamics The embedding of the elements of a rentier state into the labor surplus economy framework leads to grave consequences as reflected in the quantitative part of the survey The augmented labor surplus economy model shows that both the political economy and the purely economic causes of the resource curse can have similar effects on the resource allocation in the affected nation Hence it is not possible to use econometric tools to compartmentalize the effects of the Dutch disease and those explanations based upon political economy This is the reason why one can only estimate the

total growth effects of oil revenues Besides cross country panel estimations a case study of Azerbaijan provides additional insights into petroleum based economic development These international panel and country specific estimations are partly based on the two sector model of economic growth In the case of Azerbaijan a vector error correction model which is based upon the behavioral model of the equilibrium exchange rate is applied to detect the Dutch disease tendencies *Global Outsourcing Strategies* Roxane Gervais,2017-03-02 One of the most significant techniques to which companies and organizations have turned to improve service delivery and reduce costs has been outsourcing Over the last 10 years almost any process has been successfully outsourced But during that period there have been failures too projects that never realised their objectives or that had unforeseen impact on business *Global Outsourcing Strategies* is a state of the art guide to the best lessons to be learned for successfully implementing and outsourcing projects or for revisiting existing operations The 22 chapters explore some of the new areas for outsourcing after traditional targets such as IT and finance Information is provided on the different facets of the outsourcing process such as contract negotiation the risks involved in outsourcing the need for service level agreements the critical requirements needed to build and sustain outsourcing relationships and ethical supply chain issues There are also sections exploring the impact of outsourcing on organizational structures the long term effects legal issues management control and inter firm relationships as well as case studies from both the public and private sector on the practical side of outsourcing The book will appeal to practitioners and researchers alike This is a must have guide for any organization approaching outsourcing as a global or local strategy and for those organizations now reviewing or developing their outsourcing partnerships **Financial Mathematics, Volatility and Covariance Modelling** Julien Chevallier,Stéphane Goutte,David Guerreiro,Sophie Saglio,Bilel Sanhaji,2019-06-28 This book provides an up to date series of advanced chapters on applied financial econometric techniques pertaining the various fields of commodities finance mathematics academics and students seeking convenient access to an unfamiliar area It will also be of great interest established researchers seeking a single repository on the current state of knowledge current debates and relevant literature

Exchange Rates and Global Financial Policies Paul de Grauwe,2014 The book covers problems relating to international macroeconomics and international finance The first part develops new approaches to exchange rate modeling The second part is a collection of papers on the theory and empirical analysis of monetary unions The third part contains criticism of the mainstream macroeconomic models and proposes alternative modeling approaches *Handbook Of Investment Analysis, Portfolio Management, And Financial Derivatives (In 4 Volumes)* Cheng Few Lee,Alice C Lee,John C Lee,2024-04-08 This four volume handbook covers important topics in the fields of investment analysis portfolio management and financial derivatives Investment analysis papers cover technical analysis fundamental analysis contrarian analysis and dynamic asset allocation Portfolio analysis papers include optimization minimization and other methods which will be used to obtain the optimal weights of portfolio and their applications Mutual fund and hedge fund papers are also included as one of the applications of

portfolio analysis in this handbook The topic of financial derivatives which includes futures options swaps and risk management is very important for both academicians and practitioners Papers of financial derivatives in this handbook include i valuation of future contracts and hedge ratio determination ii options valuation hedging and their application in investment analysis and portfolio management and iii theories and applications of risk management Led by worldwide known Distinguished Professor Cheng Few Lee from Rutgers University this multi volume work integrates theoretical methodological and practical issues of investment analysis portfolio management and financial derivatives based on his years of academic and industry experience

The Operations of Chinese Infrastructure Multinationals in Africa Yuxuan Tang, 2021-08-26 The book aims to analyse and evaluate the strategic positioning of China's participation in terms of firm level performance in the generation of infrastructure capacity in African countries Africa counts among its development challenges a major bottleneck of infrastructure capacity and shortage of investable capital China's long period of high growth generates the strengths to secure availability of energy from Africa by enhancing infrastructure provision for the region To achieve this complementary macro level development beyond the traditional dimension of infrastructure provision ODA Chinese IMNEs become the vital players on the intersection of these processes Thus this research makes practical and analytical contributions to international business studies and development issues by making concrete the analysis of bilateral development processes from a macro context to a micro level framework e.g. focusing on ICT and construction sectors then fitting this into the real world story Infrastructure itself is a key element for potential investment and development processes Therefore how IMNEs achieve not only exist simply in a way of a commercial oriented investment but also in their implications for development and political related issues

Spatial Dynamics, Networks and Modelling Reggiani, A. Nijkamp, P., 2006 the editors have done an excellent job in bringing together a comprehensive collection of cutting edge research findings on network theory Sierdjan Koster European Spatial Research and Policy

Education in Sub-Saharan Africa Kirsten Majgaard, Alain Mingat, 2012-06-26 Education in Sub Saharan Africa A Comparative Analysis takes stock of education in Sub Saharan Africa by drawing on the collective knowledge gained through the preparation of Country Status Reports for more than 30 countries

Business Impacts of COVID-19 Tomasz Bernat, Joanna Duda, 2023-07-21 The coronavirus disease COVID 19 pandemic has caused serious disruptions to the economy and business activities The COVID 19 crisis has also exposed important weaknesses in business and supply chains It pointed to specific sectors of the economy primarily related to services that suffered the most On the other hand it has highlighted the great flexibility of the activities of entrepreneurs in their attempts to fight the crisis The role of government has also been important in tackling this pandemic crisis to contain the epidemic and adopt activities to help entrepreneurs who were most affected by the crisis Numerous national aid and recovery packages have been announced to support businesses and workers At the same time financial decisions were made at the international level resulting in the mobilization of huge funds that were intended to

support the functioning of enterprises This book shares observations and conclusions from contemporary research and analyses as well as from personal experiences in creating and implementing anti crisis solutions in economies and enterprises caused by the COVID 19 pandemic on the economy and its entities It will be of interest to researchers academics policymakers and students in the fields of international business economics crisis management and entrepreneurship

Urban Consumption Peter Wesley Newton,2011-11-21 Growth in human consumption is the transcending problem of our times In the short span of 50 years high income societies have shifted from an era when a simple life was the norm to one where material consumption is pervasive Consumption has become the engine for post industrial societies The liveability of cities in these societies is directly attributable to the consumption of resources indirectly via their built environments and directly by their residents This pattern of development is not sustainable Nor is it equitable Urban Consumption explores the prospect for winding back current levels of household consumption in high income societies covering such critical areas as energy water food housing and travel *History Of Marketing Science, The (Second Edition)* Russell S Winer,Scott A Neslin,2023-06-16 The field of marketing science has evolved significantly in the last 70 years Throughout its rich history developments in this field have always been anchored on marketing phenomena that drew on economics statistics operations research and related disciplines This book reviews the accomplishments of notable marketing scientists in several research areas It emphasizes both the role and the importance that pioneers in marketing science have had in the rapid development of this field and honors those contributions This second edition of the book offers updates of the former chapters and six new chapters on emerging areas of marketing science including machine learning field experimentation methods and internet marketing Combined with older areas of research like endogeneity services and market segmentation this book provides a road map for the development of 22 areas of marketing science which not only is useful from a historical perspective but also identifies important gaps in the literature which can provide an impetus for future research As such it provides an important resource for the main consumers of the academic marketing research literature doctoral students faculty and marketing science practitioners in consulting firms and companies The Pattern of Aid Giving Eric Neumayer,2003-04-24 Practically all donor countries that give aid claim to do so on the basis on the recipient s good governance but do these claims have a real impact on the allocation of aid Are democratic human rights respecting countries with low levels of corruption and military expenditures actually likely to receive more aid than other countries Using econo **Business Forecasting** A. Reza Hoshmand,2009-12-04 The information age has brought greater interconnection across the world and transformed the global marketplace To remain competitive business firms look for ways of improving their ability to gauge business and economic conditions around the world At the same time advances in technology have revolutionized the way we process information and prepare business and economic forecasts Secondary data searches data collection data entry and analysis graphical visualization and reporting can all be accomplished with the help of computers that provide access to information not

previously available Forecasters should therefore learn the techniques and models involved as applied in this new era Business Forecasting A Practical Approach is intended as an applied text for students and practitioners of forecasting who have some background in economics and statistics The presentation is conceptual in nature with emphasis on rationale application and interpretation of the most commonly used forecasting techniques The goal of this book is to provide students and managers with an overview of a broad range of techniques and an understanding of the strengths and weaknesses of each approach It is based on the assumption that forecasting skills are best developed and retained by starting with simple models followed by repeated exposure to real world examples The book makes extensive use of international examples to amplify concepts

Bank Solvency and Funding Cost Mr.Stefan W. Schmitz,Michael Sigmund,Ms.Laura Valderrama,2017-05-15 This paper presents new evidence on the empirical relationship between bank solvency and funding costs Building on a newly constructed dataset drawing on supervisory data for 54 large banks from six advanced countries over 2004 2013 we use a simultaneous equation approach to estimate the contemporaneous interaction between solvency and liquidity Our results show that liquidity and solvency interactions can be more material than suggested by the existing empirical literature A 100 bps increase in regulatory capital ratios is associated with a decrease of bank funding costs of about 105 bps A 100 bps increase in funding costs reduces regulatory capital buffers by 32 bps We also find evidence of non linear effects between solvency and funding costs Understanding the impact of solvency on funding costs is particularly relevant for stress testing Our analysis suggests that neglecting the dynamic features of the solvency liquidity nexus in the 2014 EU wide stress test could have led to a significant underestimation of the impact of stress on bank capital ratios
