The Handbook of Child and Adolescent Clinical Psychology Alan Carr,2015-12-24 The third edition of the hugely successful

Handbook of Child and Adolescent Clinical Psychology incorporates important advances in the field to provide a reliable and accessible resource for clinical psychologists. Beginning with a set of general conceptual frameworks for practice, the book gives specific guidance on the management of problems commonly encountered in clinical work with children and adolescents, drawing on the best practice in the fields of clinical psychology and family therapy. In six sections, thorough and comprehensive coverage of the following areas is provided: Frameworks for practice; Problems of infancy and early childhood; Problems of middle childhood; Problems of adolescence; Child abuse; Adjustment to major life transitions. Thoroughly updated throughout, each chapter dealing with specific clinical problems includes cases, examples, and detailed discussion of diagnosis, classification, epidemiology, and clinical features. New material includes the latest advances in child and adolescent clinical psychology, developmental psychology, and developmental psychopathology, assessment, and treatment programmes. This book is invaluable as both a reference work for experienced practitioners and as an up-to-date evidence-based practice manual for clinical psychologists in training. The Handbook of Child and Adolescent Clinical Psychology is one of a set of 3 books published by Routledge, which includes The Handbook of Adult Clinical Psychology: An Evidence-Based Practice Approach, Second Edition, Edited by Carr, McNulty, and The Handbook of Intellectual Disability and Clinical Psychology Practice, Edited by Alan Carr, Christine Linehan, Gary O'Reilly, Patricia Noonan Walsh, and John McEvoy.

Clinical Psychology Alan Carr, 2012-05-04. Clinical Psychology is for students studying clinical psychology as part of an undergraduate programme in psychology, nursing, sociology, or social and behavioural sciences. Undergraduate students who wish to know if postgraduate study in clinical psychology would be of interest to them will find this book particularly useful. The book will inform students about the profession of clinical psychology, how to get onto a clinical psychology postgraduate training programme, the way clinical psychologists work with children, adolescents, and adults with common psychological problems, the main models of practice used by clinical psychologists, and the scientific evidence for the effectiveness of psychological interventions. There is a focus on both clinical case studies and relevant research, and the book includes summaries, revision questions, advice on further reading, and a glossary of key terms, all of which make it an excellent student-friendly introduction to an exceptionally interesting subject.

Philosophical Issues in Psychiatry IV Kenneth S. Kendler, Josef Parnas, 2017-04-06. The revisions of both DSM-IV and ICD-10 have again focused the interest of the field of psychiatry and clinical psychology on the issue of nosology. This interest has been further heightened by a series of controversies associated with the development of DSM-5, including the fate of proposed revisions of the personality disorders, bereavement, and the autism spectrum. Major debate arose within the DSM process about the criteria for changing criteria, leading to the creation of first the Scientific Review Committee and then a series of other oversight committees which weighed in on the final debates on the most controversial proposed additions to DSM-5, providing important influences on the final decisions. Contained within these debates were a range of conceptual and philosophical issues. Some of these, such as the definition of mental disorder or the problems of

psychiatric epidemics have been with the field for a long time Others the concept of epistemic iteration as a framework for the introduction of nosologic change are quite new This book reviews issues within psychiatric nosology from clinical historical and particularly philosophical perspectives The book brings together a range of distinguished authors including major psychiatric researchers clinicians historians and especially nosologists including several leaders of the DSM 5 effort and the DSM Steering Committee It also includes contributions from psychologists with a special interest in psychiatric nosology and philosophers with a wide range of orientations The book is organized into four major sections The first explores the nature of psychiatric illness and the way in which it is defined including clinical and psychometric perspectives The second section examines problems in the reification of psychiatric diagnostic criteria the problem of psychiatric epidemics and the nature and definition of individual symptoms The third section explores the concept of epistemic iteration as a possible governing conceptual framework for the revision efforts for official psychiatric nosologies such as DSM and ICD and the problems of validation of psychiatric diagnoses The book ends by exploring how we might move from the descriptive to the etiologic in psychiatric diagnoses the nature of progress in psychiatric research and the possible benefits of moving to a living document or continuous improvement model for psychiatric nosologic systems The result is a book that captures the dynamic cross disciplinary interactions that characterize the best work in the philosophy of psychiatry

Diagnosing the Psychological Consequences of Trauma Jan Gysi, 2025-09-22 Tremendous progress has been made in the diagnosis and treatment of the consequences of trauma over the past two decades which have led to significant changes being introduced in the ICD 11 and the DSM 5 Navigating this wealth of new knowledge in psychotraumatology as well as keeping track of the various posttraumatic symptoms and disorders that can present in clients can be challenging The brilliantly structured full color navigation charts in this volume help both early career and experienced professionals to keep track of the variety of diagnostic options to be considered or excluded while not overlooking anything After an introduction to the trauma dissociation axis model the five axes are then presented in detail including case examples differential diagnoses recommendations decision paths and questionnaires Axis I Personality disorders including borderline Axis II Disorders specifically associated with stress including PTSD CPTSD and prolonged grief disorder Axis III Structural dissociation of the personality dissociative and partial dissociative identity disorder Axis IV Other dissociative disorders dissociative neurological symptom disorder depersonalization derealization disorder dissociative amnesia Axis V Comorbid disorders The last two chapters provide an overview of the special diagnostic aspects of reporting to law enforcement agencies and a catalog of questions collated by the author to help guide diagnosis and inform treatment This volume is an exceptional resource for psychiatrists clinical psychologists psychotherapists and other mental health professionals who work with traumatized individuals
