Contemporary South Africa and the Political Economy of Regional Development Methembe

Mdlalose, Isaac Khambule, Nene Ernest Khalema, 2025-02-21 South Africa's struggle in balancing its domestic needs while playing a dynamic developmental role in the African region and global context exposes a complex web of relations shaped by its geostrategic location on the continent and the world and the staggering legacies of colonialism and apartheid. As such, understanding the complexities of the global economy and of South Africa's place in it is of great importance. This book builds upon an existing body of literature which has demonstrated that while the post-apartheid South African state has recast its nation building goals with advances having been made notably in the area of a stellar post-apartheid constitution, policy directives and democratic political integration, economic integration and policy implementation presents a projection of captured interests where big business concerns are entrenched in the post-apartheid state's apparent neo-liberal turn. The main focus of the book is to contextualise issues relating to three main trends in global discourses on development which are significant for South Africa and indeed for the study of the political economy of regional development in the country from the prism of South Africa as a global capitalist state. These trends include the impact of globalisation, regionalisation and the marginalisation of South Africa and indeed the African continent in the global economy, thus unpacking the possible role that South Africa might play in regional development. This volume will be a valuable resource to academics, researchers and students in the fields of regional studies, economics and political theory as well as policymakers, planners and local economic development practitioners.

By drawing on a combination of conceptual reflection, surveys, comparative research and systematic use of critical case studies, this book provides a new point of reference by identifying key features of the current and indeed next generation of regionally based economic development organisations.

Financialising City Statecraft and Infrastructure Andy Pike,Peter O'Brien,Tom

Strickland, John Tomaney, 2019 *Financialising City Statecraft and Infrastructure* addresses the struggles of national and local states to fund finance and govern urban infrastructure. It develops fresh thinking on financialisation and city statecraft to explain the socially and spatially uneven mixing of managerial entrepreneurial and financialised city governance in austerity and limited decentralisation across England. As urban infrastructure fixes for the London global city region risk undermining national rebalancing efforts in the UK, city statecraft in the rest of the country is having uneasily to combine speculation risk taking and prospective venturing with co ordination planning and regulation.
