## **Hippocampus Deconstructed Poetry:**

Hippocampus: Deconstructed Jose Aviles-Acosta, 2015-06-20 Hippocampus Deconstructed is a psychological and deeply emotional journey through the paradox of being flawed unfitting and excluded Stagnant toward a courageous self acceptance and self love discarding the humiliation shame and ridicule to which the poet is subjected because he is seen as unworthy Jos F Avil s rediscovers his humanity his essential need to be loved to belong to be accepted and be totally authentic His hope is the will power that transforms change into growth Hippocampus In Visible it flourishes in adversity and gives the poet the power to be visible The poems are a magnificent work of art that capture empathically and drive us toward the understanding and final acceptance of diversity Prof Grisselle Acosta V lez Catedr tica Asociada Universidad Interamericana de Puerto Rico Hippocampus Deconstructed tackles the somber reality of shame social standards exclusions disconnection and apathy through the voices eyes in alluring and mesmerizing verses The voices explore their journey from callousness to the newly discovered array of emotions in a new reality where we believe we are defective a contagious virus that only spreads failure These molds asphyxiate their true selves leading them to the consequential struggle for authenticity Patrick Lopez Hippocampus Deconstructed is the following belief I must reach the root an antithesis of shame Stagnant The poet begins by recognizing faulty messages that the brain repeats endlessly I am the bother that tires and wears them to exhaustion Exclusion the voice goes on to question who is truly alive in Anguish Charred skin longs for light who would have noticed that I breathe among statues The voice quivers and fades as it is treated less than human in Daring Greatly my arms tire of carrying the weight of complacency I am less than human I am the label you have given me The realization begins when the poet realizes the following It hurts to be carefree it hurts to be happy and I cannot manage the impending doom Too Intense This collection of poems explore the physiological effects of being immersed in shame as seen in Dysthymia Out of focus the world is the blur My limbs lose their lightness the courage to walk through white columns Heavy I have become the weight of a world a decrepit world Deceased This book invites us to analyze the messages we constantly play into our conscious thoughts the cultural messages that force us to fear vulnerability and our actions that exacerbate feelings of self disgust Hippocampus Deconstructed teaches an absolute truth in Silent Epidemic Labels have done to us what we have done to the sea disconnection Follow the poet into his ruminating verses that explore the pain of imperfection the fear of humiliation and ridicule as the voice transitions from bleak thoughts toward self acceptance self worth self compassion self love and the realization of a true identity authenticity The Author Jose Francisco Aviles Acosta **Blanca Andreu, Galicia, and the New Iberian Mysticism** Robert Simon, 2019-01-15 This book contributes to the ongoing discussion of the place of contemporary Galician writer Blanca Andreu s work within the 1980s post nov simo movement as part of a larger resurgence of the Surrealist in Spanish poetry and its possible placement in the more recent mystical poetry of Spain It provides a detailed textual analysis of her poetry and in doing so reveals not only that her work encompasses notions of the surreal and

the mystical but also although Andreu has so far written entirely in Castilian Spanish that her poetry utilizes a variety of traditional Galician and Portuguese symbols and images In this way her work challenges the boundaries between what we as readers may accept as a solely Castilian Galician or Spanish poetic It bases its transtheoretical framework on findings from such fields as Galician studies Iberian studies mysticism studies paradigm shift studies and regional studies over the past two decades Ultimately this comprehensive and unique study shows how Andreu s multifaceted transnational work may pertain to and expand our knowledge of each of these areas of focus *Open Letter* ,2008 Lovecraft and Influence Robert H. Waugh,2013-05-30 Recognized as a major innovator in the weird story H P Lovecraft 1890 1937 was an author whose influence was felt by nearly every writer of horror fantasy and science fiction in the second half of the twentieth century Considered one of the leading writers of gothic horror Lovecraft and his work continue to inspire writers today In Lovecraft and Influence His Predecessors and Successors Robert H Waugh has assembled essays that are vast in scope ranging from the Bible through the Edwardian period and well into the present This collection is devoted to authors whose work had an impact on Lovecraft Alexander Pope Jonathan Swift Nathaniel Hawthorne Edgar Allan Poe and Lord Dunsany and those who drew inspiration from him including William S Burroughs Ramsey Campbell Thomas Ligotti and Stephen King A fascinating anthology Lovecraft and Influence will appeal to aficionados of classic horror fantasy and science fiction and those with an interest in modern authors whose works reflect and honor Lovecraft s enduring legacy Encyclopedia of Trauma Charles R. Figley,2012-06-19 Trauma is defined as a sudden potentially deadly experience often leaving lasting troubling memories Traumatology the study of trauma its effects and methods to modify effects is exploding in terms of published works and expanding in terms of scope Originally a narrow specialty within emergency medicine the field now extends to trauma psychology military psychiatry and behavioral health post traumatic stress and stress disorders trauma social work disaster mental health and most recently the subfield of history and trauma with sociohistorical examination of long term effects and meanings of major traumas experienced by whole communities and nations both natural Pompeii Hurricane Katrina and man made the Holocaust 9 11 One reason for this expansion involves important scientific breakthroughs in detecting the neurobiology of trauma that is connecting biology with human behavior which in turn is applicable to all fields involving human thought and response including but not limited to psychiatry medicine and the health sciences the social and behavioral sciences the humanities and law Researchers within these fields and more can contribute to a universal understanding of immediate and long term consequences both good and bad of trauma both for individuals and for broader communities and institutions Trauma encyclopedias published to date all center around psychological trauma and its emotional effects on the individual as a disabling or mental disorder requiring mental health services This element is vital and has benefited from scientific and professional breakthroughs in theory research and applications Our encyclopedia certainly will cover this central element but our expanded conceptualization will include the other disciplines and will move

beyond the individual      *The Evolution of Memory Systems* Elisabeth A. Murray, Steven P. Wise, Kim S. Graham, 2016-11-10

Current theories about human memory have been shaped by clinical observations and animal experiments This doctrine holds that the medial temporal lobe subserves one memory system for explicit or declarative memories while the basal ganglia subserves a separate memory system for implicit or procedural memories including habits Cortical areas outside the medial temporal lobe are said to function in perception motor control attention or other aspects of executive function but not in memory The Evolution of Memory Systems advances dramatically different ideas on all counts It proposes that several memory systems arose during evolution and that they did so for the same general reason to transcend problems and exploit opportunities encountered by specific ancestors at particular times and places in the distant past Instead of classifying cortical areas in terms of mutually exclusive perception executive or memory functions the authors show that all cortical areas contribute to memory and that they do so in their own ways using specialized neural representations The book also presents a proposal on the evolution of explicit memory According to this idea explicit declarative memory depends on interactions between a phylogenetically ancient navigation system and a representational system that evolved in humans to represent one's self and others As a result people embed representations of themselves into the events they experience and the facts they learn which leads to the perception of participating in events and knowing facts The Evolution of Memory Systems is an important new work for students and researchers in neuroscience psychology and biology      *Dissertation Abstracts International* ,2004      **Blue Jay and Found Objects** Carmine Giordano, 2022-12-07 On the front jacket of this volume is a photograph I took at a museum ecology exhibit of a Blue Jay sculpted by trash artist artist Thomas Deininger from the collected flotsam and jetsam of the sea pieces of iron mesh wood plastic and other cast away items from many water ways items which appear close up on the back cover The artist's work is a literal reflection of the way the ragtag emotional and physical pieces of a life may also be compiled and wonderfully transformed through the language of poetry the way in this collection one's struggle with religious guilt is portrayed as an all night wrastle with an angel the way the arc of one's life is mirrored in the bud and blossom of potted amaryllis bulbs the way heaven might be traded in another poem for a slice of pizza the way one's troubling thoughts need to be extracted on another page with the help of an exorcist      **PASCAL explore** ,1985      *Student of the Hippocampus* Casey Bush, 2018      *MLA International Bibliography of Books and Articles on the Modern Languages and Literatures* ,2007      **The Cumulative Book Index** ,1994 A world list of books in the English language      *Classics and Contemporaries* S. T. Joshi, 2009 S T Joshi has established himself as a leading critic and scholar of the weird tale Having begun by studying the work of H P Lovecraft Joshi has expanded his interests to include the entire range of horror fiction from such classics as Lord Dunsany and Algernon Blackwood to such contemporaries as Ramsey Campbell Stephen King and Clive Barker In this generous sampling of the reviews that Joshi has written in nearly thirty years as a critic we find trenchant analyses of writers ranging from Arthur Machen E F Benson and Shirley Jackson to Peter Straub

Thomas Ligotti Norman Partridge and David J Schow Joshi also addresses such significant themes in horror fiction as the subgenre of dark suspense the haunted house Arkham House and its legacy and the work of the small press Of particular note is a lengthy section devoted to H P Lovecraft including studies of an array of Cthulhu Mythos writings and detailed examinations of recent Lovecraft scholarship Joshi s essays and reviews are enlivened with a pungent wit and literary flair that bring to mind the work of John Clute and Brian Aldiss S T Joshi is the author of such works as The Weird Tale 1990 H P Lovecraft A Life 1996 and The Modern Weird Tale 2001 He has edited or coedited such important reference works as Supernatural Literature of the World An Encyclopedia 2005 and Icons of Horror and the Supernatural 2006 His numerous publications have received the World Fantasy Award the British Fantasy Award the Horror Writers Association Award and the International Horror Guild Award
