Technical Arts in the Han Histories Mark Csikszentmihalyi, Michael Nylan, 2021-11-01 While cultural literacy in early China was grounded in learning the Classics basic competence in official life was generally predicated on acquiring several forms of technical knowledge Recent archaeological finds have brought renewed attention to the use of technical manuals and mantic techniques within a huge range of discrete contexts pushing historians to move beyond the generalities offered by past scholarship To explore these uses *Technical Arts in the Han Histories* delves deeply into the rarely studied Treatises and Tables compiled for the first two standard histories the Shiji Historical Records and Hanshu History of Han important supplements to the better known biographical chapters and models for the inclusion of technical subjects in the twenty three later Standard Histories of imperial China Indeed for a great many aspects of life in early imperial society they constitute our best primary sources for understanding complex realities and perceptions The essays in this volume seek to explain how different social groups thought of disseminated and withheld technical knowledge relating to the body body politic and cosmos in the process of detailing the preoccupations of successive courts from Qin through Eastern Han in administering the localities the frontier zones and their numerous subjects at the time roughly one quarter of the world's population

The Ice at the End of the World Jon Gertner, 2019-06-11 A riveting urgent account of the explorers and scientists racing to understand the rapidly melting ice sheet in Greenland a dramatic harbinger of climate change Jon Gertner takes readers to spots few journalists or even explorers have visited The result is a gripping and important book Elizabeth Kolbert Pulitzer Prize winning author of *The Sixth Extinction* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post The Christian Science Monitor Library Journal Greenland a remote mysterious island five times the size of California but with a population of just 56 000 The ice sheet that covers it is 700 miles wide and 1 500 miles long and is composed of nearly three quadrillion tons of ice For the last 150 years explorers and scientists have sought to understand Greenland at first hoping that it would serve as a gateway to the North Pole and later coming to realize that it contained essential information about our climate Locked within this vast and frozen white desert are some of the most profound secrets about our planet and its future Greenland's ice doesn't just tell us where we've been More urgently it tells us where we're headed In *The Ice at the End of the World* Jon Gertner explains how Greenland has evolved from one of earth's last frontiers to its largest scientific laboratory The history of Greenland's ice begins with the explorers who arrived here at the turn of the twentieth century first on foot then on skis then on crude motorized sleds and embarked on grueling expeditions that took as long as a year and often ended in frostbitten tragedy Their original goal was simple to conquer Greenland's seemingly infinite interior Yet their efforts eventually gave way to scientists who built lonely encampments out on the ice and began drilling one mile two miles down Their aim was to pull up ice cores that could reveal the deepest mysteries of earth's past going back hundreds of thousands of years Today scientists from all over the world are deploying every technological tool available to uncover the secrets of this frozen island before it's too late As Greenland's ice melts and runs off into the sea it not only threatens to affect hundreds of millions of people who live in coastal areas It will also have drastic effects on ocean currents weather systems economies and migration patterns Gertner chronicles the unfathomable hardships amazing discoveries and scientific achievements of the Arctic's explorers and researchers with a transporting deeply intelligent style and a keen sense of what this work means for the rest of us The melting ice sheet in Greenland is in a way an analog for time It contains the past It reflects the present It can also tell us how much time we might have left Cosmopolitan Dreams Jennifer

Dubrow, 2018-10-31 In late nineteenth century South Asia the arrival of print fostered a dynamic and interactive literary culture There within the pages of Urdu language periodicals and newspapers readers found a public sphere that not only catered to their interests but encouraged their reactions to featured content *Cosmopolitan Dreams* brings this culture to light showing how literature became a site in which modern daily life could be portrayed and satirized the protocols of modernity challenged and new futures imagined Drawing on never before translated Urdu fiction and prose and focusing on the novel and satire Jennifer Dubrow shows that modern Urdu literature was defined by its practice of self critique and parody Urdu writers resisted the cultural models offered by colonialism creating instead a global community of imagination in which

literary models could freely circulate and be readapted mixed and drawn upon to develop alternative lines of thinking Highlighting the participation of readers and writers from diverse social and religious backgrounds the book reveals an Urdu cosmopolis where lively debates thrived in newspapers literary journals and letters to the editor shedding fresh light on the role of readers in shaping vernacular literary culture Arguing against current understandings of Urdu as an exclusively Muslim language Dubrow demonstrates that in the late nineteenth century Urdu was a cosmopolitan language spoken by a transregional transnational community that eschewed identities of religion caste and class The Urdu cosmopolis pictured here was soon fractured by the forces of nationalism and communalism Even so Dubrow is able to establish the persistence of Urdu cosmopolitanism into the present and shows that Urdu's strong tradition as a language of secular critical modernity did not end in the late nineteenth century but continues to flourish in film television and on line In lucid prose Dubrow makes the dynamic world of colonial Urdu print culture come to life in a way that will interest scholars of modern Asian literatures South Asian literature and history cosmopolitanism and the history of print culture *Unseeing Empire* Bakirathi

Mani,2020-10-26 In *Unseeing Empire* Bakirathi Mani examines how empire continues to haunt South Asian American visual cultures Weaving close readings of fine art together with archival research and ethnographic fieldwork at museums and galleries across South Asia and North America Mani outlines the visual and affective relationships between South Asian diasporic artists their photographic work and their viewers She notes that the desire for South Asian Americans to see visual representations of themselves is rooted in the use of photography as a form of colonial documentation and surveillance She examines fine art photography by South Asian diasporic artists who employ aesthetic strategies such as duplication and alteration that run counter to viewers demands for greater visibility These works fail to deliver on viewers desires to see themselves producing instead feelings of alienation estrangement and loss These feelings Mani contends allow viewers to question their own visibility as South Asian Americans in U S public culture and to reflect on their desires to be represented

Cultural Life at the Abyss B. L. Molyneaux,2022-07-14 Ideology dominates social research encouraged by rejections of nature and the past and often ignores the direct experience of actual people This archaeological study takes a different approach grounding concepts of culture landscape and art in ecological relations that embrace all of life An ecological approach considers that life exists in the interactions of people with the environment surrounding them This theoretical grounding therefore supports research at a local scale and validates the analysis of individual effort The case studies explore individual perception action and expression in a startlingly diverse set of objects and features from the past natural and constructed monuments ancient and recent rock paintings petroglyphs fresco paintings and impressionist landscape art While traditional cultural approaches render ordinary people as proxies these individuals as members of families and communities do the actual work of society using their senses bodies and minds The analysis here therefore turns away from traditional speculations about the meanings of cultural things to look for evidence of the personal choices of travelers
