Historical Dimensions Of Psychological Discourse:

Gergen, 2006-12-14 In this volume prominent American and European scholars explore the historical shaping of psychological discourse Speaking from several disciplinary standpoints contributors focus on the ideological intellectual political economic and literary forces that enter into the cultural construction of mental life In its explorations the volume not only challenges the reality of the unquestioned world of everyday life but raises fundamental questions concerning the potential of psychological science to establish historically independent knowledge of mental process Contributions variously cover the emotions cognition the concept of child development psychotherapy gender differences and knowledge Additional chapters represent first hand accounts of historical change in psychological movements *Handbook of the History of Social Psychology* Arie W. Kruglanski, Wolfgang Stroebe, 2012 This is the first ever handbook to comprehensively cover the historical development of the field of social psychology including the main overarching approaches and all the major individual topics Contributors are all world renowned scientists in their subfields who engagingly describe the people dynamics and events that have shaped the discipline Provided by publisher

Social Construction in Context Kenneth J Gergen, 2001-05-23 This latest book by one the world s leading protagonists in the field will be welcomed not just by psychologists but by students academics and professionals interested in social constructionism across a wide range of subjects Social Construction in Context explores the potentials of social constructionist theory when placed in diverse intellectual and practical contexts It demonstrates the achievements of social constructionism and what it can now offer various fields of inquiry both academic professional and applied given the proliferation of the theory across the social sciences and humanities

The Hidden Roots of Critical Psychology Michael Billig, 2008-02-12 Billig s is a fascinating work of brilliant scholarship It is written in an elegant style spiced with humour and gives one the feeling that it was a labour of love It can be recommended without reservation Journal of Community and Applied Social Psychology This is a quite extraordinary and original book Billig has managed seamlessly to interweave History of Philosophy History of Psychology Critical Psychology and a deep grasp of the social nature of language and moreover do so in a very readable fashion Graham Richards Formerly Professor of History of Psychology Staffordshire University and Director of the British Psychological Society History of Psychology Centre London I can t quite capture how much I enjoyed this book In beautiful witty prose and through exemplary scholarship Billig has produced an historical work that engages with profoundly important ideas not just for contemporary critical psychology but for psychology in general Books as good as this are rare Alan Collins Senior Lecturer in Psychology Lancaster University Today new forms of critical psychology are challenging the cognitive revolution that has dominated psychology for the past three decades This book explores the historical roots of these new psychologies It demonstrates that their ideas are not quite as new as is often supposed In the early modern period thinkers like the Earl of Shaftesbury and Thomas Reid reacted against Locke s cognitive

psychology in ways that were surprisingly modern if not post modern However until now they have been virtually written out of psychology s history It is now time to recognize the great originality of their psychological thinking Writing in a non technical style Michael Billig seeks to overturn the dominant views of psychology s history In so doing he gives a fascinating account of the times bringing psychology s hidden past vividly back to life *Farewell to Variables* Jaan Valsiner,2023-02-01 This book presents a novel perspective on psychology s methodology moving it from quantification as a given imperative to science philosophical look at phenomena data relationship The idea for this volume emerged from inquiries into the history of psychology of the 18th 19th centuries where the developmental focus within German Naturphilosophie led philosophers to emphasize the dialectical nature of biological and psychological development The nature of the natural and social worlds is curvilinear and includes knot complexes that cannot be investigated in terms of the consensually accepted General Linear Model of the 20th century In this the new book continues the creative search for new forms of epistemological ways of thinking that was started in 2010 in the volume methodological thinking in psychology 60 years gone astray General Linear Model and turned into metaphoric complexes that acquire life of their own in psychologists thinking needs to be replaced by qualitative structural units of thinking about how human psychological organization can be presented **A History of Modern Psychology in Context** Wade Pickren,Alexandra Rutherford,2010-02-19 In A History of Modern Psychology in Context the authors resist the traditional storylines of great achievements by eminent people or schools of thought that rise and fall in the wake of scientific progress Instead psychology is portrayed as a network of scientific and professional practices embedded in specific contexts The narrative is informed by three key concepts indigenization reflexivity and social constructionism and by the fascinating interplay between disciplinary Psychology and everyday psychology **An Emotional History of the United States** Peter N. Stearns,Jan Lewis,1998 Emotions lie at our very core as human beings How we process and grapple with our emotions how and what we emote and how we respond to the emotions of others constitute the essence of our social universe In a very real sense we exist only through the prism of our emotions And yet the profound effect of human emotion on history politics religion and culture remains underexamined While the influence of emotion in such realms as American foreign policy has been well documented other emotional aspects of American history have escaped notice What role for instance does emotion have in the practice of African American religion How do shame and self hatred influence American conceptions of identity How does our emotional life change as we age To what degree is American consumerism driven by basic human emotion With this landmark anthology historians Peter N Stearns and Jan Lewis provide a road map of the American emotional landscape From the emotional world of working class Massachusetts to the prayers of evangelical and pentecostal women and the gendered nature of black rage these essays provide a multicultural snapshot of the unique nature and evolution of American emotions **A Guided Science** Jaan Valsiner,2017-07-05 That sciences are guided by explicit and implicit ties to their surrounding social world is not new Jaan Valsiner fills in the wide

background of scholarship on the history of science the recent focus on social studies of sciences and the cultural and cognitive analyses of knowledge making The theoretical scheme that he uses to explain the phenomena of social guidance of science comes from his thinking about processes of development in general his theory of bounded indeterminacy and on the relations of human beings with their culturally organized environments Valsiner examines reasons for the slow and nonlinear progress of ideas in psychology as a science at the border of natural and social sciences Why is that intellectual progress occurs in different countries at different times Most responses are self serving blinders for presenting science as a given rather than understanding it as a deeply human experience For Valsiner scientific knowledge is cultural at its core Major changes have occurred in contemporary sciences collective authorship fragmentation of knowledge into small quickly published and equally quickly retractable journal articles and the counting of numbers of such articles by institutions as if that is a measure of scientific productivity Scientists are inherently ambivalent about the benefit of these changes for the actual development of knowledge There is a gradual takeover of the domain of scientific knowledge creation by other social institutions with vested interests in defending and promoting knowledge that serves their social interests Sciences are entering into a new form of social servitude The Social Pathologies of Contemporary Civilization Kieran

Keohane,2016-03-03 The Social Pathologies of Contemporary Civilization explores the nature of contemporary malaises diseases illnesses and psychosomatic syndromes examining the manner in which they are related to cultural pathologies of the social body Multi disciplinary in approach the book is concerned with questions of how these conditions are not only manifest at the level of individual patients bodies but also how the social bodies politic are related to the hegemony of reductive biomedical and individual psychologistic perspectives Rejecting a reductive biomedical and individualistic diagnosis of contemporary problems of health and well being The Social Pathologies of Contemporary Civilization contends that many such problems are to be understood in the light of radical changes in social structures and institutions extending to deep crises in our civilization as a whole Rather than considering such conditions in isolation both from one another and from broader contexts this book argues that health and well being are not just located at the level of the individual body the integral human person or even collective social bodies rather they encompass the health of humanity as a whole and our relationship with Nature A ground breaking analysis of social malaise and the health of civilization this book will be of interest to scholars of sociology social theory social psychology philosophy and anthropology **Rediscovering the History of Psychology** Adrian Brock,Johann Louw,Willem van Hoorn,2006-02-07 For the last 25 years Kurt Danziger s work has been at the center of developments in history and theory of psychology This volume makes Danziger s work the focal point of a variety of contributions representing several active areas of research Written by the leading figures in history and theory of psychology from North America Europe and South Africa including Danziger himself it will serve as a point of departure for those who wish to acquaint themselves with some of the most important issues in this field The Oxford Handbook of the

Self Shaun Gallagher, 2011-02-10 The Oxford Handbook of the Self explores a fascinating diversity of questions about our understanding of self from a variety of interdisciplinary perspectives including philosophy ethics psychology neuroscience psychopathology narrative and postmodern theories *Freudian Repression* Michael Billig, 1999-11-04 This book presents a reinterpretation of Freud to show how language can be expressive and repressive **European Social Work - A Compendium** Fabian Kessl, Walter Lorenz, Hans-Uwe Otto, Sue White, 2019-11-25 The publication takes account of the fundamental developments transforming social work in Europe at the beginning of the 21st century A European standard of social work has already emerged but models for future European social work are absent Therefore the compendium gives an overview of the current transformation process for the first time discusses the visible and invisible changes and maps out where social work is positioned in the emerging post welfare states **The Social Mind** Jaan Valsiner, Rene van der Veer, 2000-07-10 In this book first published in 2000 the authors elaborate on their notion of intellectual interdependency in the development of scientific ideas *Constructive Therapies V2* Michael F. Hoyt, 1998-10-01 Like its predecessor *Constructive Therapies Volume 1* this engaging book presents a range of creative time effective approaches for helping clients build on their competencies and develop their own solutions In depth interviews with Michael White Steve de Shazer Bill O Hanlon Donald Meichenbaum and Kenneth Gergen are incorporated with other clinically oriented chapters from well known therapists Topics covered include different styles of constructive therapy the externalization and deconstruction of problems narrative work with ADHD diagnosed children a solution focused approach for dealing with cases of domestic violence EMDR and the MRI interactional approach actualizing the empty self in psychotherapy emotional and spiritual healing and more Illustrative case examples are featured throughout **Reconstructing the Psychological Subject** Betty M Bayer, John Shotter, 1998-01-12 This major book offers a comprehensive overview of key debates on subjectivity and the subject in psychological theory and practice In addition to social construction s long engagement with social relations this volume addresses questions of the body technology intersubjectivity writing and investigative practices The internationally renowned contributors explore the tensions and opposing viewpoints raised by these issues and show how analyzing the psychological subject interrelates with reforming the practices of psychology Drawing on perspectives that include feminism dialogics poststructuralism hermeneutics Lacanian psychoanalysis and cultural or social studies of science readers are guided through pivotal *Girlhood, Schools, and Media* Michele Paule, 2016-09-13 This book explores the circulation and reception of popular discourses of achieving girlhood and the ways in which girls themselves participate in such circulation It examines the figure of the achieving girl within wider discourses of neoliberal self management and post feminist possibility considering the tensions involved in being both successful and successfully feminine and the strategies and negotiations girls undertake to manage these tensions The work is grounded in an understanding of media educational and peer contexts for the production of the successful girl It traces narratives across school television and online in texts produced for and by girls

drawing on interviews with girls in schools online forum participation within the purpose built site [www smartgirls tv](http://www.smartgirls.tv) and girls discussions of a range of teen dramas *Realities and Relationships* Kenneth J. Gergen, 2009-06-01 Recent attempts to challenge the primacy of reason and its realization in foundationalist accounts of knowledge and cognitive formulations of human action have focused on processes of discourse Drawing from social and literary accounts of discourse Kenneth Gergen considers these challenges to empiricism under the banner of social construction His aim is to outline the major elements of a social constructionist perspective to illustrate its potential and to initiate debate on the future of constructionist pursuits in the human sciences generally and psychology in particular *Diagnostic Cultures* Svend Brinkmann, 2016-04-14 Some studies estimate that each year around a quarter of the population of Western countries will suffer from at least one mental disorder Should this be interpreted as evidence for the progress of psychiatry a discipline that is now able to identify and treat mental illnesses that have always existed or might it be the case that modern life somehow creates new conditions or social pathologies This book argues that in fact something more fundamental has been taking place in recent years the development of diagnostic cultures Taking account of the phenomenon of patients themselves pushing for pathologization and acknowledging therefore that this is not simply a case of psychiatry pursuing an agenda of medicalisation from above this volume examines the emerging trend towards interpreting our sufferings in terms of psychiatric conceptions and diagnostic categories Drawing on new empirical case studies of psychological diagnoses including depression and ADHD and employing both cultural psychological and sociological analyses it charts the development of contemporary diagnostic cultures and asks whether in transforming existential moral and political concerns into individual psychiatric disorders we risk losing sight of the larger historical and social forces that affect our lives A ground breaking examination of the shift towards the pathologization of suffering and the dangers that this presents to human self understanding *Diagnostic Cultures* will be of interest to scholars of social theory and philosophy the sociology of culture psychology and the sociology health and medicine *The Implicit Relation of Psychology and Law* Fiona Raitt, Suzanne Zeedyk, 2020-07-24 *The Implicit Relation of Psychology and Law* brings an innovative feminist analysis to these affiliated fields In addition to the explicit relationship between the two fields they argue that there is an unrecognised implicit relation existing within the intersection of psychology and law which they find works to the disadvantage of women
