The SAGE Encyclopedia of Journalism Gregory A. Borchard, 2022-02-22 Journalism permeates our lives and shapes our thoughts in ways that we have long taken for granted Whether it is National Public Radio in the morning or the lead story on the Today show the morning newspaper headlines up to the minute Internet news grocery store tabloids Time magazine in our mailbox or the nightly news on television journalism pervades our lives The Encyclopedia of Journalism covers all significant dimensions of journalism such as print broadcast and Internet journalism U S and international perspectives and history technology legal issues and court cases ownership and economics The encyclopedia will consist of approximately 500 signed entries from scholars experts and

journalists under the direction of lead editor Gregory Borchard of University of Nevada Las Vegas *Chinese Americans* Jonathan H. X. Lee, 2015-11-12 This in depth historical analysis highlights the enormous contributions of Chinese Americans to the professions politics and popular culture of America from the 19th century through the present day While the number of Chinese Americans has grown very rapidly in the last decade this group has long thrived in the United States in spite of racism discrimination and segregation This comprehensive volume takes a global view of the Chinese experience in the Americas While the focus is on Chinese Americans in the United States author Jonathan H X Lee also explores the experiences of Chinese immigrants in Canada Mexico and South America He considers why the Chinese chose to leave their home country where they settled and how the distinctive Chinese American identity was formed This volume is organized into four sections historical overview political and economic life cultural and religious life and literature the arts and popular culture Detailed essays capture the essence of everyday life for this immigrant group as they assimilated established communities and interacted with other ethnic groups Alphabetically arranged entries describe the political social and religious institutions begun by Chinese Americans and explores their roles as business owners activists and philanthropic benefactors for their communities Toward a Framework for Vietnamese American Studies Linda Ho Peché, Alex-Thai Dinh Vo, Tuong Vu, 2023-02-10 This collection is the first work of its kind to synthesize the current state of Vietnamese American studies Offering cutting edge analysis from social sciences and humanities perspectives this volume serves as a foundational resource and a site for interrogating underexplored facets of the field **Christianity and Migration** Peter C. Phan, Oxford Editor, 2025-10-07 This book essays a not the Christian theology of migration The phenomenon of human migration that is the movement of people to and settlement temporary or permanent in a new area or country its causes and reasons and its historical anthropological social political legal and cultural dimensions have been widely studied and reasonably well understood and the next chapter will discuss them in detail By contrast theology as an academic discipline seems least capable of illuminating this human phenomenon It appears to most people outside the church and its educational institutions to be at best an esoteric subject and at worst a convoluted and useless mumbo jumbo especially when liberally sprinkled with Greek and Latin phrases Why not leave the study of migration to scholars in history sociology anthropology economics politics and law who albeit no less infected with highfalutin language than theologians do at least try to offer practical policies and effective strategies either for or against immigration Provided by publisher *Asian American History Day by Day* Jonathan H. X. Lee, 2018-10-12 For student research this reference highlights the importance of Asian Americans in U S history the impact of specific individuals and this ethnic group as a whole across time documenting evolving policies issues and feelings concerning this particular American population Asian American History Day by Day A Reference Guide to Events provides a uniquely interesting way to learn about events in Asian American history that span several hundred years and the contributions of Asian Americans to U S culture in that time The book is organized in the form of a calendar with each day of

the year corresponding with an entry about an important event person or innovation that span several hundred years of Asian American history and references to books and websites that can provide more information about that event Readers will also have access to primary source document excerpts that accompany the daily entries and serve as additional resources that help bring history to life With this guide in hand teachers will be able to more easily incorporate Asian American history into their classes and students will find the book an easy to use guide to the Asian American past and an ideal jumping off point for more targeted research

Superior Angela Saini,2019-05-21 This fascinating critique of race science from the Enlightenment to the 21st century is an easy to read blend of science reporting cultural criticism and personal reflection Slate An important and timely reminder that race is a social construct with no basis in biology Kirkus Reviews After the horrors of the Nazi regime in World War II the mainstream scientific world turned its back on eugenics and the study of racial difference But a worldwide network of intellectual racists and segregationists quietly founded journals and funded research providing the kind of shoddy studies that were ultimately cited in Richard Herrnstein and Charles Murray s 1994 title *The Bell Curve* which purported to show differences in intelligence among races If the vast majority of scientists and scholars disavowed these ideas and considered race a social construct it was an idea that still managed to somehow survive in the way scientists thought about human variation and genetics Dissecting the statements and work of contemporary scientists studying human biodiversity most of whom claim to be just following the data Angela Saini shows us how again and again even mainstream scientists cling to the idea that race is biologically real As our understanding of complex traits like intelligence and the effects of environmental and cultural influences on human beings from the molecular level on up grows the hope of finding simple genetic differences between races to explain differing rates of disease to explain poverty or test scores or to justify cultural assumptions stubbornly persists At a time when racialized nationalisms are a resurgent threat throughout the world *Superior* is a rigorous much needed examination of the insidious and destructive nature of race science and a powerful reminder that biologically we are all far more alike than different
