Lerner,2014-05-13 The story of two doctors a father and son who practiced in very different times and the evolution of the ethics that profoundly influence health care As a practicing physician and longtime member of his hospital s ethics committee Dr Barron Lerner thought he had heard it all But in the mid 1990s his father an infectious diseases physician told him a stunning story he had physically placed his body over an end stage patient who had stopped breathing preventing his colleagues from performing cardiopulmonary resuscitation even though CPR was the ethically and legally accepted thing to do Over the next few years the senior Dr Lerner tried to speed the deaths of his seriously ill mother and mother in law to spare them further suffering These stories angered and alarmed the younger Dr Lerner an internist historian of medicine and bioethicist who had rejected physician based paternalism in favor of informed consent and patient autonomy *The Good Doctor* is a fascinating and moving account of how Dr Lerner came to terms with two very different images of his father a revered clinician teacher and researcher who always put his patients first but also a physician willing to play God opposing the very revolution in patients rights that his son was studying and teaching to his own medical students But the elder Dr Lerner s journals which he had kept for decades showed the son how the father s outdated paternalism had grown out of a fierce devotion to patient centered medicine which was rapidly disappearing And they raised questions Are paternalistic doctors just relics or should their expertise be used to overrule patients and families that make ill advised choices Does the growing use of personalized medicine in which specific interventions may be best for specific patients change the calculus between autonomy and paternalism And how can we best use technologies that were invented to save lives but now too often prolong death In an era of high technology medicine spiraling costs and health care reform these questions could not be more relevant As his father slowly died of Parkinson s disease Barron Lerner faced these questions both personally and professionally He found himself being pulled into his dad s medical care even though he had criticized his father for making medical decisions for his relatives Did playing God at least in some situations actually make sense Did doctors sometimes know best A timely and compelling story of one family s engagement with medicine over the last half century *The Good Doctor* is an important book for those who treat illness and those who struggle to overcome it

**Controlling Contagion** Sheilagh Ogilvie, 2025-02-18 How human institutions markets states communities religions guilds and families have helped both to control and to exacerbate epidemics throughout history How do societies tackle epidemic disease In *Controlling Contagion* Sheilagh Ogilvie answers this question by exploring seven centuries of pandemics from the Black Death to Covid 19 For most of history infectious diseases have killed many more people than famine or war and in 2019 they still caused one death in four Today we deal with epidemics more successfully than our ancestors managed plague smallpox cholera or influenza But we use many of the same approaches Long before scientific medicine human societies coordinated and innovated in response to biological shocks sometimes well sometimes badly Ogilvie uses historical epidemics to analyse how human societies deal with externalities situations where my action creates costs or benefits for others beyond those that I myself incur Social institutions markets states communities religions guilds and families help us manage the negative externalities of contagion and the positive externalities of social distancing sanitation and immunization Ogilvie shows how each institution enables us to coordinate innovate and inspire each other to limit contagion But each institution also has weaknesses that can make things worse Markets shut down voluntarily during every epidemic in history but they also brought people together spreading contagion States mandated quarantines sanitation and immunization but they also waged war and censored information exacerbating epidemics Religions admonished us to avoid infecting our neighbours but they also preached against science and medical innovations What decided the outcome Ogilvie argues was a temperate state an adaptable market and a strong civil society where a diversity of institutions played to their own strengths and checked each other's flaws
