Lost In Transition Lost In Transition:

Russia--lost in Transition Lilia Shevtsova, 2007 Russian history is first and foremost a history of personalized power As Russia startles the international community with its assertiveness and faces both parliamentary and presidential elections Lilia Shevtsova searches the histories of the Yeltsin and Putin regimes She explores within them conventional truths and myths about Russia paradoxes of Russian political development and Russia's role in the world *Russia Lost in Transition* discovers a logic of government in Russia a political regime and the type of capitalism that were formulated during the Yeltsin and Putin presidencies and will continue to dominate Russia's trajectory in the near term Looking forward as well as back Shevtsova speculates about the upcoming elections as well as the self-perpetuating system in place the legacies of Yeltsin and Putin and how it will dictate the immediate political future She also explores several scenarios for Russia's future over the next decade *Lost in Transition* Tommy McGregor, 2007-11 *Lost in Transition* is for high school seniors and

college freshmen who want to continue to grow in their relationships with Jesus once they go off to college Tommy challenges students to have realistic expectations of college and to learn how to take ownership of their faith from publisher description ***Lost in Transition*** Yiu-Wai Chu, 2013-05-13 In this timely and insightful book Yiu Wai Chu takes stock of Hong Kong's culture since its transition to a Special Administrative Region of the People's Republic of China in 1997 Hong Kong had long functioned as the capitalist and democratic stepping stone to China for much of the world Its highly original popular culture was well known in Chinese communities and its renowned film industry enjoyed worldwide audiences and far-reaching artistic influence Chu argues that Hong Kong's culture was lost in transition when it tried to affirm its international visibility and retain the status quo after 1997 In an era when China welcomed outsiders and became the world's most rapidly developing economy Hong Kong's special position as a capitalist outpost was no longer a privilege By drawing on various cultural discourses such as film popular music and politics of everyday life Chu provides an informative and critical analysis of the impact of China's ascendancy on the notion of One Country Two Cultures Hong Kong can no longer function as a bridge between China and the world writes Chu and must now define itself from global local and national perspectives

Lost in Transition Alan J. DeYoung, 2011-03-01 Being a student has been and remains a highly desirable status for young people and their families in Kyrgyzstan Giving their children education dat detyam obrazovaniye meaning higher education has become an imperative for many parents even in a time of serious economic and social decline The numbers of universities and university enrollments have increased dramatically in fact quadrupled since Kyrgyz independence from the former USSR in 1991 All this is happening just as the overall system of secondary education has basically collapsed School quality and outcomes of learning for most Kyrgyz youth have become increasingly marginal even as those who run universities widely proclaim quality improvements and desires intentions to join international higher education space The book thus seeks to explain the manifest versus the latent functions of higher education in Kyrgyzstan Relying on explanations

of lived experience the research attempts to explain how the seeming contradiction of a declining resource and intellectual base of universities yet appeals to parents and students as the system continues to expand with easily compromised accountability measures The study approaches these topics by seeking to define what it now means to be a university student in Kyrgyzstan as well as what many state universities have turned into in contrast to how they were remembered by those who attended and taught within them two decades ago The work also considers a number of private and inter governmental universities which are allowed to operate in Kyrgyzstan and award both state and international diplomas I portray the different organizational and ideological pursuits of these universities as they contrast with those of the state universities Lost in Transition is an empirical look at higher education reform in Kyrgyzstan employing several methodological strategies These include a student survey given to over 200 students at five different universities surveys and interviews with senior instructors and administrators at these same institutions and a two year case study of a student and faculty cultures and subcultures at one particular national university particular university faculty in one of the larger state universities The case study utilized participant observation ethnographic interviews document analysis and social media

Lost in Transition? ,2019 Lost in Transition Mary C. Brinton,2010-11-01 Lost in Transition tells the story of the lost generation that came of age in Japan s deep economic recession in the 1990s The book argues that Japan is in the midst of profound changes that have had an especially strong impact on the young generation The country s renowned permanent employment system has unraveled for young workers only to be replaced by temporary and insecure forms of employment The much admired system of moving young people smoothly from school to work has frayed The book argues that these changes in the very fabric of Japanese postwar institutions have loosened young people s attachment to school as the launching pad into the world of work and loosened their attachment to the workplace as a source of identity and security The implications for the future of Japanese society and the fault lines within it loom large **Bioscience - Lost in Translation?**

Richard Barker,2016-09-08 Medical innovation as it stands today is fundamentally unsustainable There is a widening gap between what biomedical research promises and the impact that it is currently achieving in terms of patient benefit and health system improvement This book highlights the global problem of the ineffective translation of bioscience innovation into health system improvements and its consequences analyses the underlying causative factors and provides powerful prescriptions for change to close the gap It contrasts the progress in biomedicine with other areas of scientific and technological endeavour such as information technology in which there are faster and more reliable returns for society The author s career has spanned pharmaceuticals diagnostics and health informatics and he draws lessons from a host of case examples in which bottlenecks have prevented progress such as in dementia and antibiotic resistant infections and from many in which these barriers have been overcome such as HIV therapy and targeted cancer treatment The new era of precision medicine holds the greatest promise of closing this innovation gap Along with techniques such as open innovation

and adaptive development powerful new genomics and digital health tools are poised to transform the productivity of life sciences Bioscience Lost in Translation lays out a fresh and provocative strategy for advancing the innovation process shaping the right policy environment and building an ecosystem to deliver the 21st century cures that are urgently needed
