Analysing Financial Performance Nic La Rosa, 2020-12-28 Despite a plethora of techniques to analyse the financial performance of a business there has been no single methodology that has been overwhelmingly preferred by users This could be an indication that either the methods themselves are deficient or they are limited by other factors that are not easily overcome Unlike the current offerings in the field which focus on issues relating to business performance management or non financial aspects such as market efficiency satisfaction and workforce productivity this book offers a solution to a major gap in the literature and understanding for those seeking to measure analyse and benchmark the financial performance of any organisation for profit not for profit and government agencies It clearly identifies why current techniques fail proposes and evidences a solution that overcomes these issues by including two algorithms that can be combined to solve this problem and demonstrates the practical application of the technique to the benefit of users in order to pinpoint real performance levels and insights One of the largest issues this book will help to overcome is the inability to compare the accounts of businesses organisations from different countries that report in different currencies This technique eliminates the need for currency translations and the issues that arise with that process This book is an invaluable and practical guide to assist accounting and finance practitioners in measuring and comparing financial performance across firms with different business models different accounting policies and different scales of operations *Financialisation in the Automotive Industry*

Marcelo José do Carmo, Mário Sacomano Neto, Julio Cesar Donadone, 2021-07-08 Where presidents or members of affluent families were previously seen it is increasingly the case that car manufacturers are owned by banks and investment funds which have taken control of the entire economic life of these firms This has significant impact on the terms of employment and layoffs wages and precarious work growing inequalities in income strata compensation levels for executives and the implementation of short termist strategies across business operations This book explores this increasing financialisation the predominance of the financial sector over the productive sector in the automotive industry In particular it is shown that the financial operations of these companies through leasing insurance loans and other financial instruments is now much more profitable than the manufacturing aspects of the business which was originally the reason for these firms The chapters demonstrate how there are great demands to increase the return to shareholders as a main concern despite other metrics and or other stakeholders The work studies the impact of financialisation at the world's five largest automakers which together represent almost 50% of car production providing an exploratory analysis of profitability shareholder composition compensation to executives workers salaries dividend payments to shareholders and employment Encouraging debate on contemporary economy this book marks a significant addition to the literature on financialisation contemporary forms of capitalism labour and economic sociology more broadly *Financial Report of the United States Government*, **U.
