respective topical areas contributed to the book's 33 chapters including the conceptual foundations and principles of gerontological occupational therapy, bio psychosocial age related changes, environmental forces shaping occupational participation for older adults, the continuum of health care as well as implications for communities and the attributes, ethical responsibilities and roles involved in gerontological occupational therapy. This edition also covers topical OT issues that are crucially important to an aging population such as diversity and inclusion, disability and aging, sexuality, technology, telehealth and virtual environments, intergenerational connections, updates on dementia research and caring for someone with dementia, occupational justice and aging, age inclusive communities and an expanded section on hearing to ensure your students are well versed in every aspect of this key practice area.

UNIQUE Intraprofessional and interprofessional approach to intervention emphasizes working holistically and collaboratively in serving older adults.

UNIQUE Chapter on the wide range of physiological, musculoskeletal and neurological changes among the aging patient population highlights related occupational performance issues. Case examples help you learn to apply new information to actual client and community situations.

Chapter on evidence based practice discusses how to incorporate evidence into clinical or community settings. Questions at the end of each chapter can be used for discussion or other learning applications.

UNIQUE Chapters on nutrition, food insecurity and oral health explore related challenges faced by older adults.

Chapter on ethics provides a deeper understanding of how to address challenging ethical dilemmas.

Textbook of Rapid Response Systems Michael A. DeVita, 2025-01-15 The latest edition of this text is the go to book and most authoritative source on Rapid Response Systems (RRS). Now in its fully revised and expanded third edition, *Textbook of Rapid Response Systems* remains the best selling and most comprehensive book on the topic. The new edition contains over fifty chapters written by world renowned experts in the field and over fifty percent new material. An entire new section of ten chapters was added on pediatric Rapid Response Systems which includes important how to chapters on managing critical situations during pediatric rapid response calls. The previous edition had increased attention paid to patient safety and this edition expands that work. The utility of Rapid Response Systems for the management of dying patients has been questioned while at the same time there has been an increased knowledge base in the field. As a result this edition contains two chapters on management for dying patients for those patients with and those without not for resuscitation orders. This helps guide clinicians who are often ill prepared medically and emotionally as they care for this important population of hospitalized patients. Written by experts in the field, this new edition is a valuable resource for medical practitioners, nurses, respiratory caregivers, safety experts and hospital administrators who want to implement and improve a rapid response system.
