God And Logic In Islam The Caliphate Of Reason:

God and Logic in Islam John Walbridge, 2010-11-15 This book investigates the central role of reason in Islamic intellectual life. Despite widespread characterization of Islam as a system of belief based only on revelation, John Walbridge argues that rational methods, not fundamentalism, have characterized Islamic law, philosophy, and education since the medieval period. His research demonstrates that this medieval Islamic rational tradition was opposed by both modernists and fundamentalists, resulting in a general collapse of traditional Islamic intellectual life and its replacement by more modern but far shallower forms of thought. However, the resources of this Islamic scholarly tradition remain an integral part of the Islamic intellectual tradition and will prove vital to its revival. The future of Islam, Walbridge argues, will be marked by a return to rationalism.

Islam's Reformation of Christianity Zulfiqar Ali Shah, 2022 Jesus was a product of Semitic monotheism, moral law, piety, and humility. His kingdom was the otherworldly. His ethical monotheism was transformed by the Roman Empire and mythology. The supernatural, Trinitarian, and miraculous Roman Christianity transitioned into unintelligible dogmas, the abolition of law, moral laxity, this worldly kingdom, and divine right absolutism. Natural theology, law, cosmology, and politics were all compromised. Religious freedom was barred, and persecutions were normalised. Latin Christendom was a persecutory society. Islam was an intellectual cure to Christian paradoxes and an egalitarian, pluralistic alternate to Christian inquisitions and religiopolitical absolutism. It spread in the Eastern Christian territories like a bush fire. This reformation of Christian excesses in religiopolitical theology reformed its paradoxical, incarnational theology, antinomianism, grace-based salvation scheme, divine right, Church, and monarchy, interventionist cosmology, and religious persecutions. This insightful and groundbreaking new book provides an in-depth study of the Islamic Southern Reformation of Christianity, a reformation seldom acknowledged or studied by the historians. It explores how the Islamic reformative scheme emphasised ethical, transcendental monotheism, natural theology, and rational discourse. It limited monarchy and placed significance on an inclusive, pluralistic, and free society. The Seventh Century Islamic natural, rational, moral, republican, and egalitarian reformation was the Southern Reformation of Christianity, long before the partial Northern Reformation of Luther and Calvin.

Ibn Miskawayh, the Soul, and the Pursuit of Happiness John Peter Radez, 2019-10-17 Ibn Miskawayh, the Soul and the Pursuit of Happiness explores the moral philosophy and context of Ibn Miskawayh (932-1030), an advocate of the intellectually cultivated life with a strong religious bent. Though not necessarily a major innovator, he sought through his writings to provide a moral compass for turbulent times, much like thinkers such as Petrarch (1304-1374), Pico della Mirandola (1463-1494), Francois Rabelais (1494-1553), Montesquieu (1689-1755), or more recently Mortimer Adler (1902-2001). Despite the tumultuous times in which they lived, these thinkers offered the world hope through a humanism that cultivated both civic and moral character. Whether directly expressed in his moral philosophy or illustrated in the examples of renowned or notorious historical figures, Miskawayh's core idea is that one's character is much easier kept than recovered. In this book,

John Peter Radez shows how Miskawayh stands out not only as one of Islam's first ethicists but also one of its true intellectuals, thinker, historian, codifier of the science of adab and a truly happy sage who represented the best of his generation's intellectual and cultural elite. Miskawayh's message of how to create lives worthy of human beings, his civic humanism, resonates today. **Islam, Religious Liberty and Constitutionalism in Europe** Mark Hill KC, Lina Papadopoulou, 2024-02-08. For centuries since the Roman Empire's adoption of Christianity, the continent of Europe has been perceived as something of a Christian fortress. Today, the increase in the number of Muslims living in Europe and the prominence of Islamic belief pose questions not only for Europe's religious traditions but also for its constitutional make-up. This book examines these challenges within the legal and political framework of Europe. The volume's contributors range from academics at leading universities to former judges and politicians. Its 19 chapters focus on constitutional challenges, human rights, with a focus on religious freedom, securitisation, and Islamophobia, while adopting supranational and comparative approaches. This book will appeal not merely to academics and law students in the UK and the EU but to anyone involved in diplomacy and international relations, including political scientists, lobbyists, and members of NGOs. It explores these contested relationships to open up new spaces in how we think about religious freedom and co-existence in Europe and the crucial role that Islam has had and continues to have in its development. **A New Introduction to Islam** Daniel W. Brown, 2017-04-24. Covering the origins, key features, and legacy of the Islamic tradition, the third edition of *A New Introduction to Islam* includes new material on Islam in the 21st century and discussions of the impact of historical ideas, literature, and movements on contemporary trends. Includes updated and rewritten chapters on the Qur'an and hadith literature that covers important new academic research. Compares the practice of Islam in different Islamic countries as well as acknowledging the differences within Islam as practiced in Europe. Features study questions for each chapter and more illustrative material, charts, and excerpts from primary sources. *The Rise of Early Modern Science* Toby E. Huff, 2017-06-06. Now in its third edition, *The Rise of Early Modern Science* argues that to understand why modern science arose in the West, it is essential to study not only the technical aspects of scientific thought but also the religious, legal, and institutional arrangements that either opened the doors for enquiry or restricted scientific investigations. Toby E. Huff explores how the newly invented universities of the twelfth and thirteenth centuries and the European legal revolution created a neutral space that gave birth to the scientific revolution. Including expanded comparative analysis of the European, Islamic, and Chinese legal systems, Huff now responds to the debates of the last decade to explain why the Western world was set apart from other civilisations. *Scientific Development in Islamic Civilization* Aijaz Ahmad, 2023-01-01. This book, *Scientific Development in Islamic Civilization*, is a humble effort to highlight the scientific research conducted by Islamic scholars of the mediaeval world between the seventh and seventeenth centuries. The Quranic verses and the traditions of the Prophet dealing with scientific enterprise have also been analysed and quoted in this work. The works of the majority of Muslim scientists are also

discussed in depth The scientific development during the periods of various ruling dynasties and caliphates is properly mentioned in various chapters Above all the goal of writing this book is to make Muslims in particular and non Muslims in general aware of the glorious past of Islamic civilization which has been washed out or purposefully ignored in historical texts these days
